QUARTERLY PROGRAM REVIEW · Q2 FY2027

Benefits Modernisation

Where the rebuild of the state's unemployment-insurance claims system stands at the end of its second year.

The headline: the new system now handles 70% of claims, on time and on budget.

Two years in, the modernised platform processes seven of every ten initial claims end-to-end. The legacy mainframe carries the remainder, on track to retire in Q4. The program is within its $58M authorisation.

Ahead on adoption, inside cost and quality targets.

PLAN · FY2027 → FY2028

What ships in each phase, by workstream.

WORKSTREAM	NOW (Q2 2027)	NEXT (Q4 2027)	LATER (Q2 2028)
Claims platform	Initial claims	Appeals module	Employer portal
Legacy retirement	Read-only	Mainframe off	Data archive
Integrations	Tax-agency feed	Federal reporting	Fraud screening
Accessibility	WCAG 2.1 AA	Multilingual	Voice channel

Shipped · In flight · Planned

STATUS · AS-OF THIS REVIEW

Delivery status by workstream, plainly stated.

WORKSTREAM	FOUNDATION (FY26)	BUILD (FY27)	SCALE (FY28)
Claims platform	✓ Core engine	– 70% of volume	○ Full cutover
Legacy retirement	✓ Inventory	– Phased cutover	○ Decommission
Integrations	✓ Tax feed	– Federal reporting	○ Fraud API
Accessibility	✓ AA baseline	– Multilingual	○ Voice channel

✓ Shipped – In flight ○ Planned

Where the open program risks sit on likelihood against impact.

Likely · Low impact.

Minor UI rework after appeals launch

Likely · High impact.

Mainframe retirement slips past Q4

Unlikely · Low impact.

Vendor staffing churn

Unlikely · High impact.

Federal reporting spec changes mid-build

The one risk worth the board's attention: the mainframe retirement date.

Retiring the legacy mainframe in Q4 depends on the appeals module shipping on time, since appeals is the last function still running on legacy. A two-month appeals slip pushes the $2.1M-a-year mainframe maintenance contract into a fourth year. Mitigation is under way.

DIGITAL BENEFITS SERVICE · BENEFITS.GOV.EXAMPLE

On track to retire the mainframe and finish the rebuild on budget.
