

FIX DEMO • STATE MARKERS

An empty box means the same thing everywhere.

A tour of every component that draws the four marks, and the one that reads them differently on purpose.

The four marks, as every component now reads them.

 Done — a green check

 Partial — an amber dash

 Not yet — a gray open ring

 Out of scope — a gray slash, label struck

The legend under the cards now matches the cards.

A mark in a sentence draws the same shape.

- Audit log on Starter  — coming in Q3
- Seats on Starter  — capped at five
- Single sign-on on Growth  — Enterprise only
- Shared workspace everywhere  — every plan

Write a mark in inline code and it draws the disc, wherever inline code can go.

Verdict-grid is the one place an empty box means "not met".

Vendor North

✓ Speed ✗ Auditability ✓ Adoption

Fast and adopted, but fails the audit.

Vendor South

✓ Speed ✓ Auditability — Adoption

Passes the audit. Adoption is partial.

STATE MARKERS • ONE VOCABULARY

Learn the four marks once.

Only verdict-grid reads an empty box as a failure, because a verdict scores against a bar.
