A FIX DEMO

# One bar, in the tone's color

`split-panel` and `split-compare` with `tone-edge`: the tone replaces the ribbon, it does not stack on it.

CONTROL

# No tone: the deck's ribbon

The bar across the supporting zone is the deck spectrum.

**Reference**

This is what one bar looks like.

**Compare against**

The next slides must show the same bar height.

PASS

# Tone pass recolors the ribbon

The supporting zone's bar is the pass color. There is no second bar above it.

**On track**

One bar, tone-colored.

**No doubling**

Same height as the control.

FAIL

# Tone fail, same rule

The failure color carries the edge.

**Off track**

One bar, fail-colored.

**Same height**

As the control slide.

CONTROL

# Compare, no tone

Reference bar for the compare frame.

OPTION A

- a1
- a2

OPTION B

- b1
- b2

RECOMMENDATION

The deck's ribbon is the bar.

WARN

# Compare with a warn edge

The supporting zone's bar is the warn color.

### OPTION A

- a1
- a2

### OPTION B

- b1
- b2

**RECOMMENDATION**

One bar, tone-colored, same height as the control.
