

3 COMPONENTS

# progression

Progression — ordered movement through stages or time.

## THE WATER CYCLE

# Nothing is spent — only moved.

### Evaporation

The sun lifts water from ocean and leaf into vapor.

### Condensation

Vapor cools into cloud, a reservoir held aloft.

### Precipitation

Rain and snow return the water to the ground.

### Collection

Rivers gather it back to the sea, and it begins again.

# Criteria are gates: clear them in order.

---

01

## **State the bar**

Each criterion is a pass-or-fail line, not a preference.

02

## **Order by veto power**

The criterion most likely to kill goes first.

03

## **Keep the list short**

Three gates decide; six gates stall.

# Steps promise an order and keep it.

STEP 01

## **Name the step**

A verb-first title and  
one clause of body.

STEP 02

## **Keep steps parallel**

Same shape every  
step, or sequence  
breaks.

STEP 03

## **Number honestly**

Order is the promise  
this layout makes.

STEP 04

## **Stop at five**

Six fits; seven is two  
slides.
