Two stamps that now say what they mean.

`stamp-mark` is a faint diagonal watermark again, and `stamp-bar` names its state on the bar.

STAMP-MARK · DRAFT

The watermark sits over the content without hiding it.

DRAFT

Signal Intake

Weekly structured collection across customer conversations.

Scoring Model

Each signal scored on three dimensions.

Decision Log

Every decision recorded with its signals.

Calibration Loop

A monthly retrospective that compares outcomes.

STAMP-MARK · CONFIDENTIAL

A long state shrinks to fit, so CONFIDENTIAL stays on the slide.

CONFIDENTIAL

Pricing floor

No deal below the floor without a second approver.

Renewal terms

Multi-year renewals carry the current list price.

DRAFT

STAMP-BAR · DRAFT

The redaction bar now names its state.

Signal Intake

Weekly structured collection across customer conversations.

Scoring Model

Each signal scored on three dimensions.

Decision Log

Every decision recorded with its signals.

Calibration Loop

A monthly retrospective that compares outcomes.

CONFIDENTIAL

STAMP-BAR · CONFIDENTIAL

A longer state widens the bar instead of clipping the word.

Pricing floor

No deal below the floor without a second approver.

Renewal terms

Multi-year renewals carry the current list price.

STAMPS

Every stamp should say which state the slide is in.
