LATTICE · STRESS TEST

State chart vs. content we've never seen.

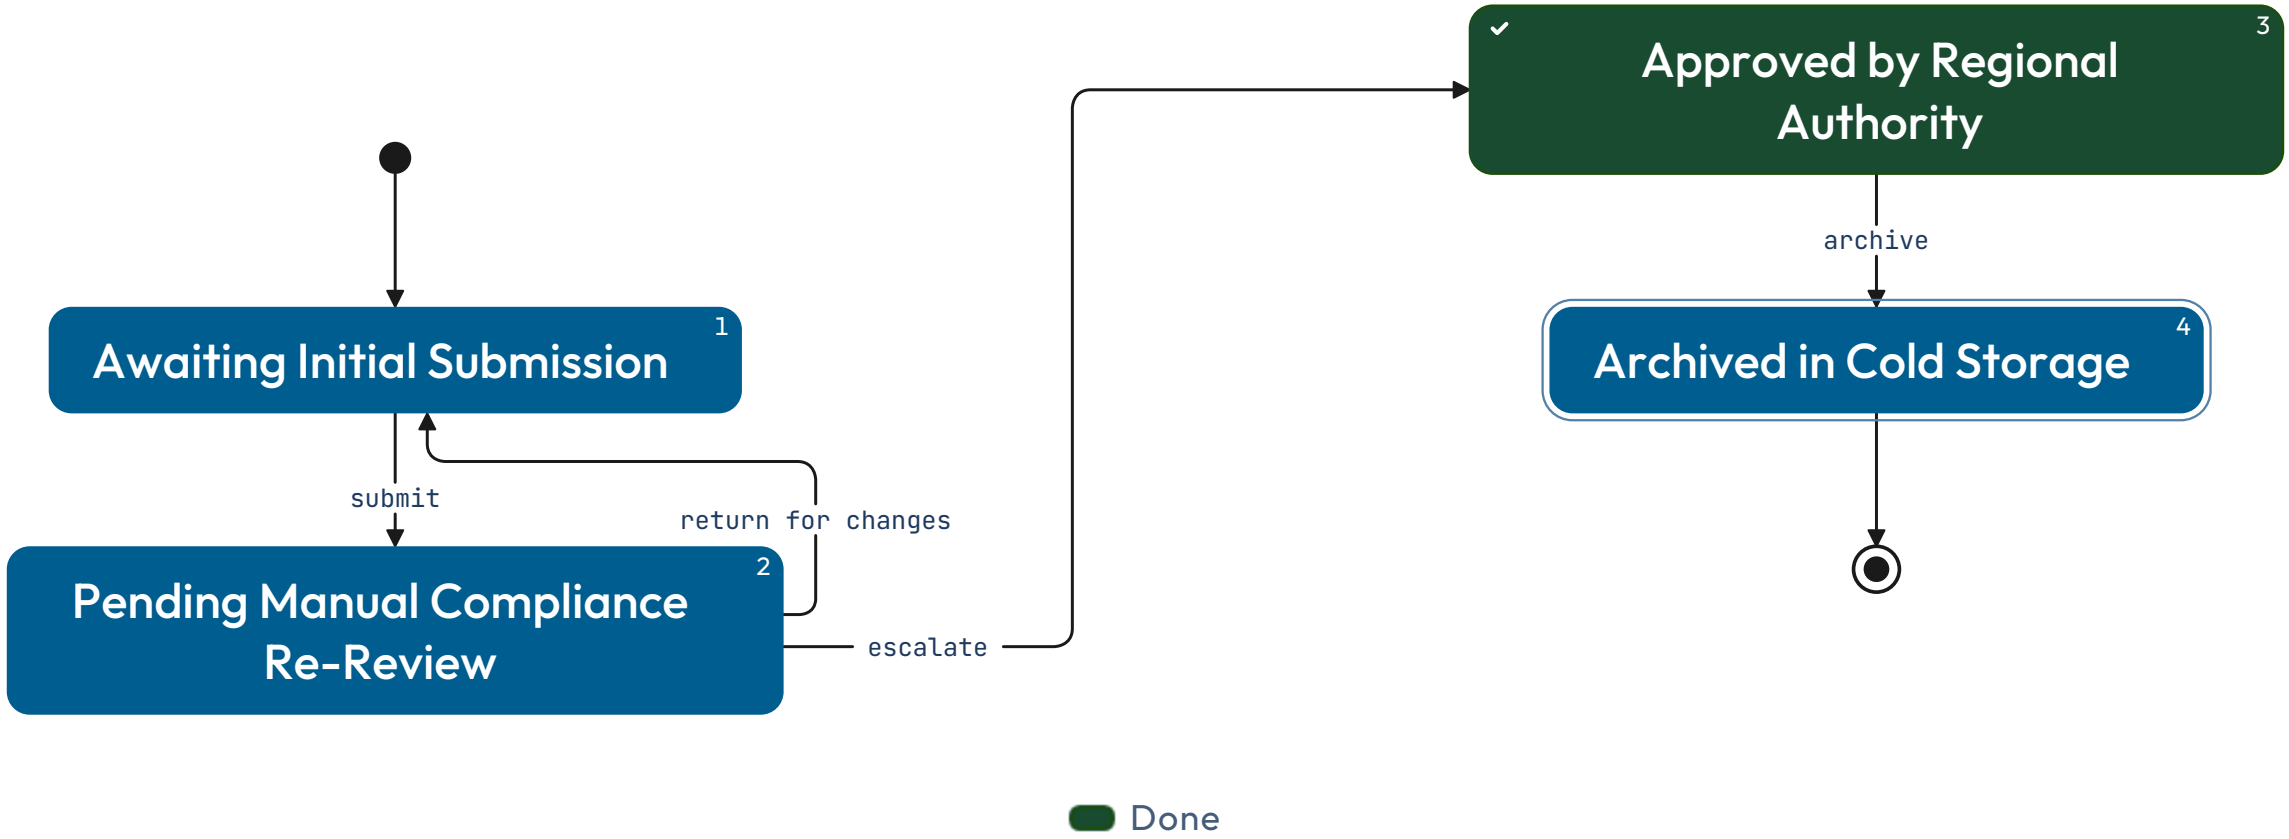

Browser-measured layout: nodes are sized by the real text engine, edges are drawn from measured rects. These slides try to break it.

Single-letter states.

1 — very short labels

Long state names.

2 — long labels that would overflow a fixed box

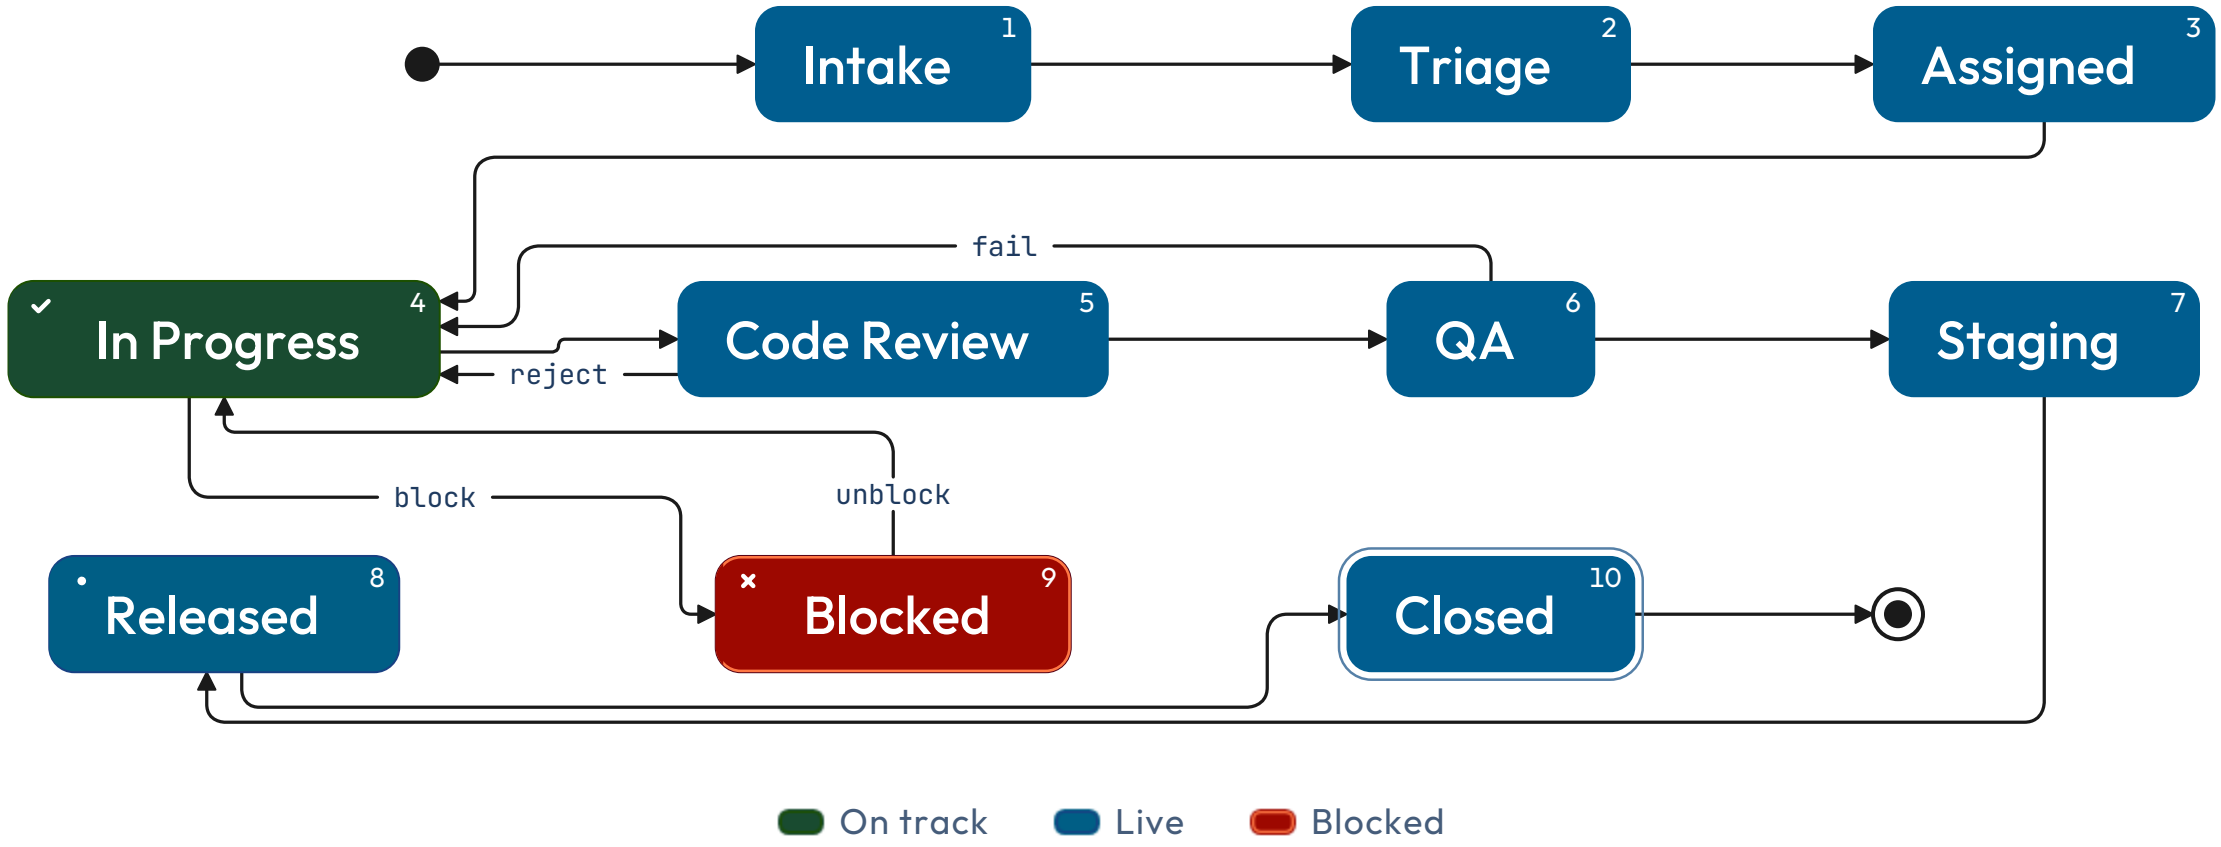

状態遷移

CJK state labels.

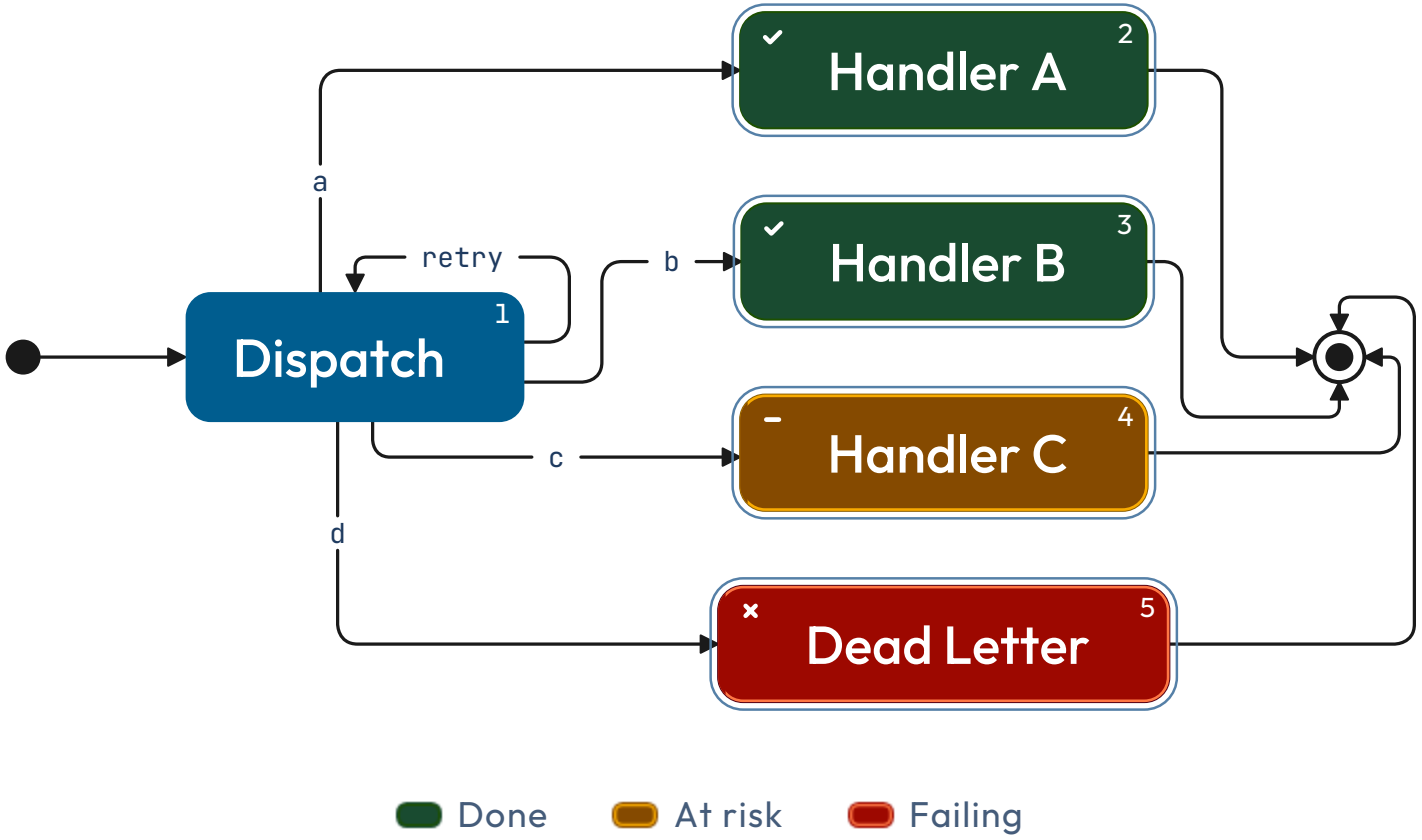

On track

Ten-step pipeline.

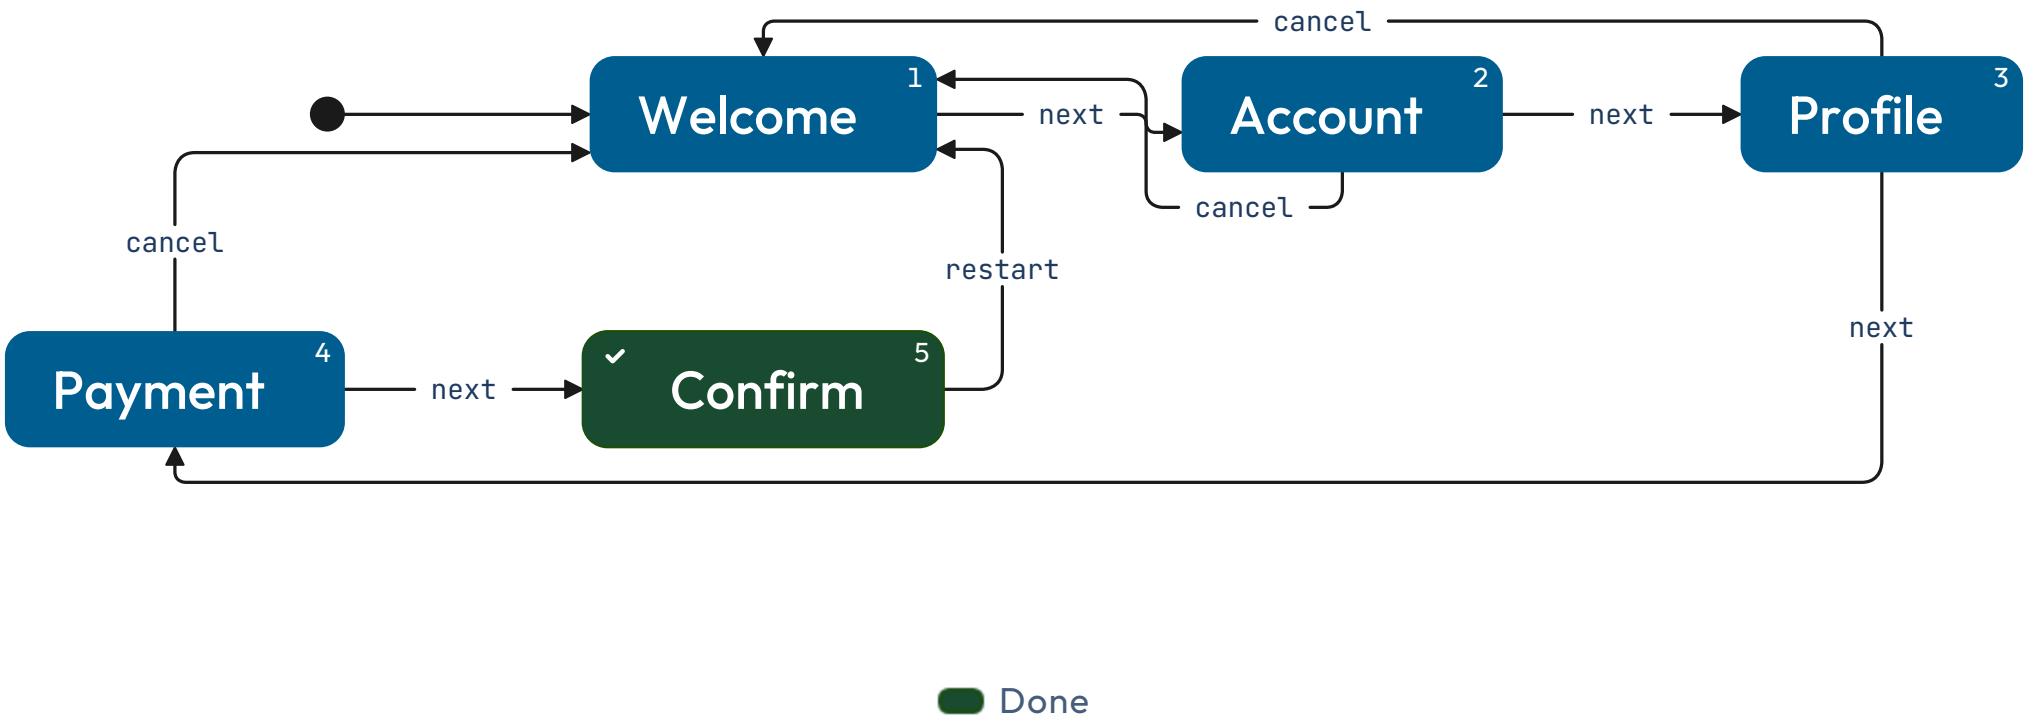

Router with many exits.

5 — dense branching from one state

Wizard with escape hatches.

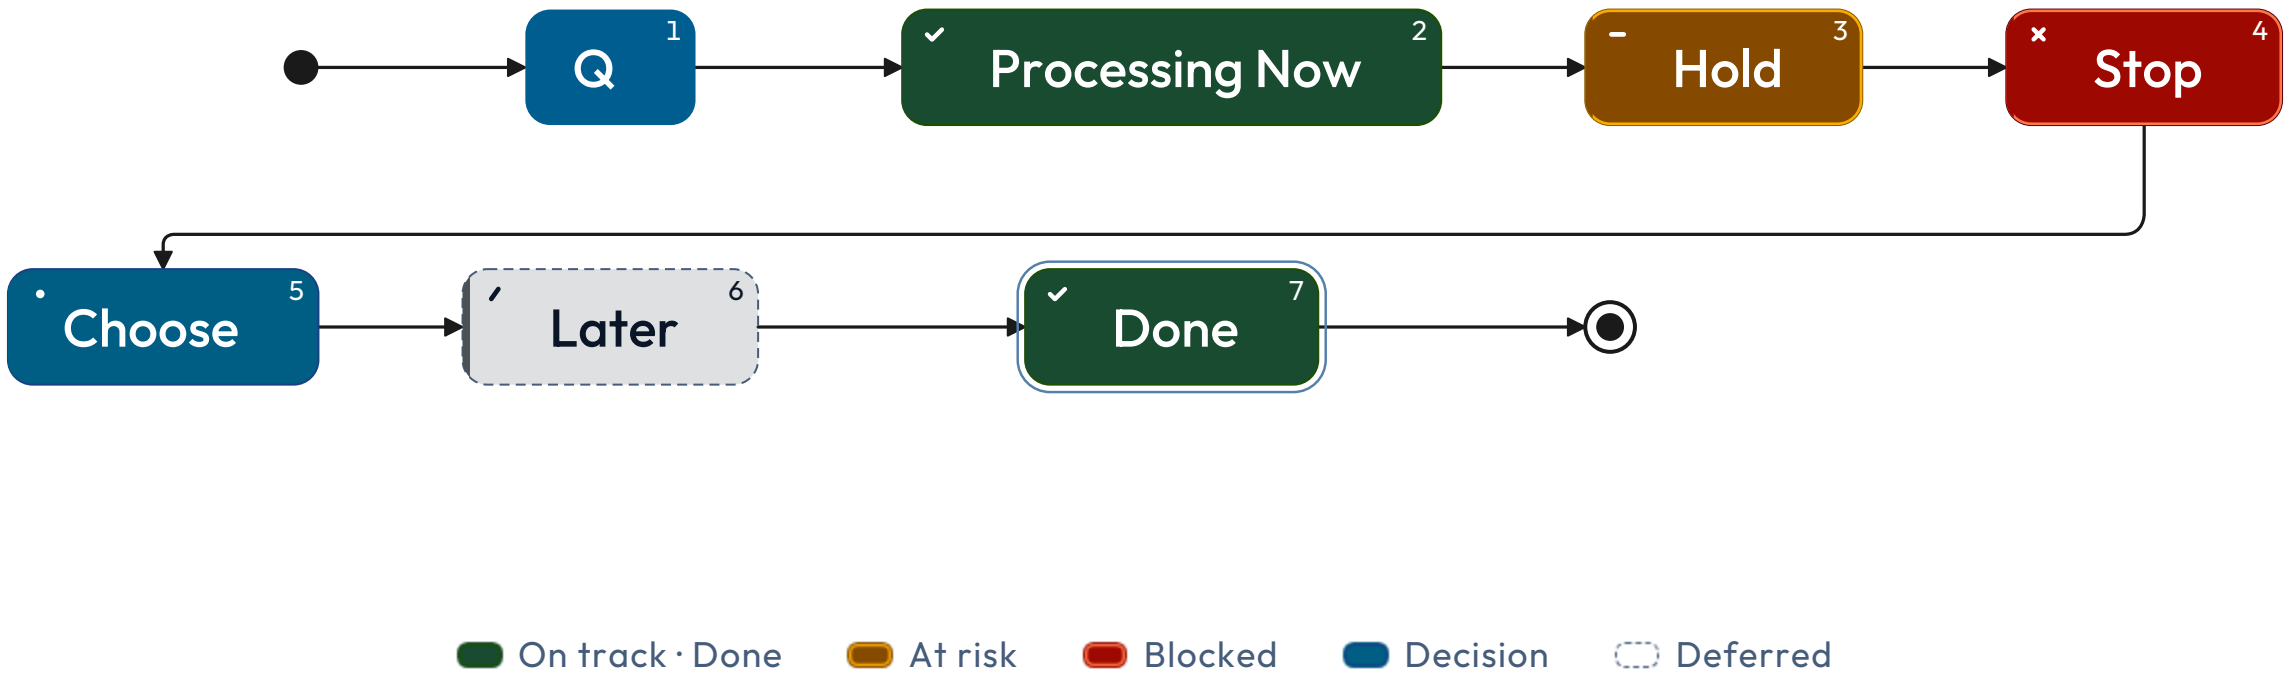

6 — heavy back-edges (everything returns to start)

Degenerate: one state.

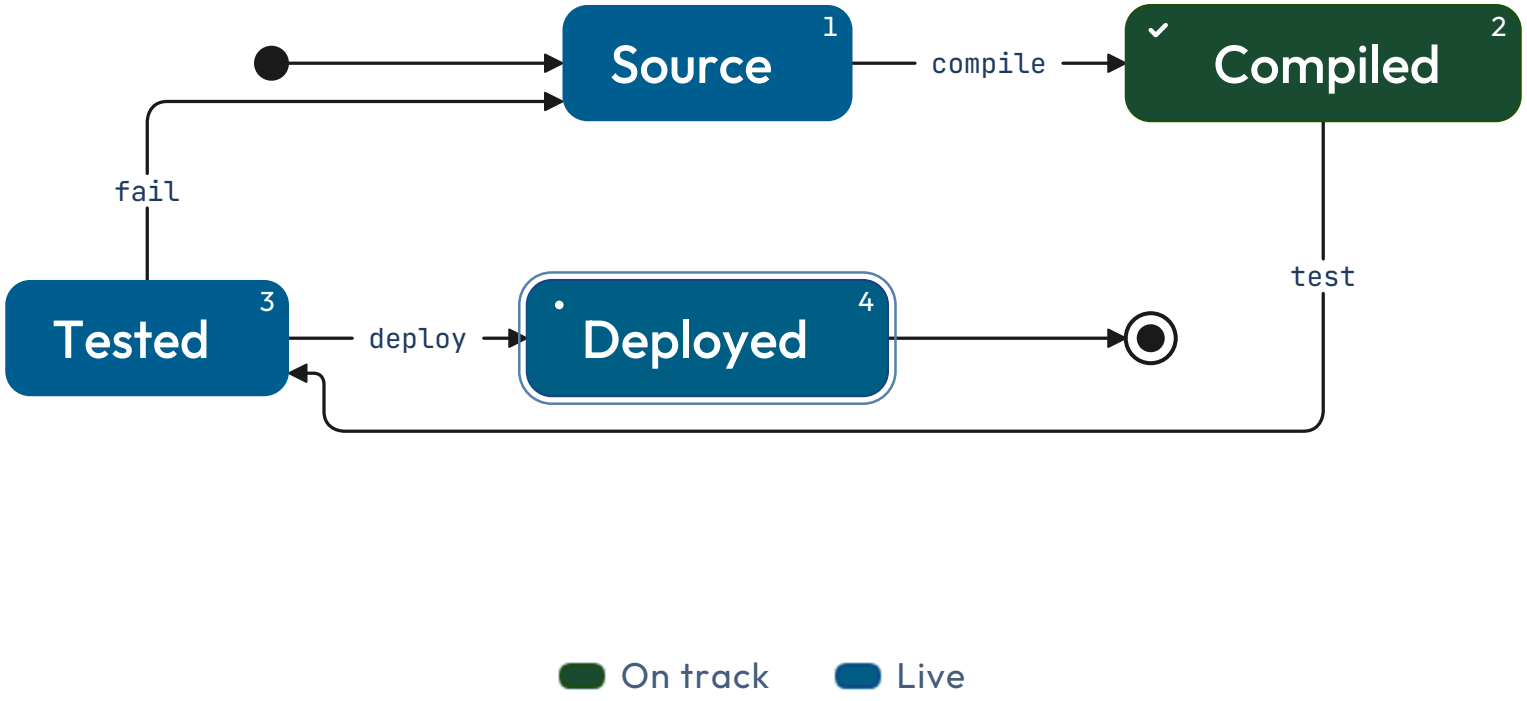

7 — single state, no transitions

Status palette across widths.

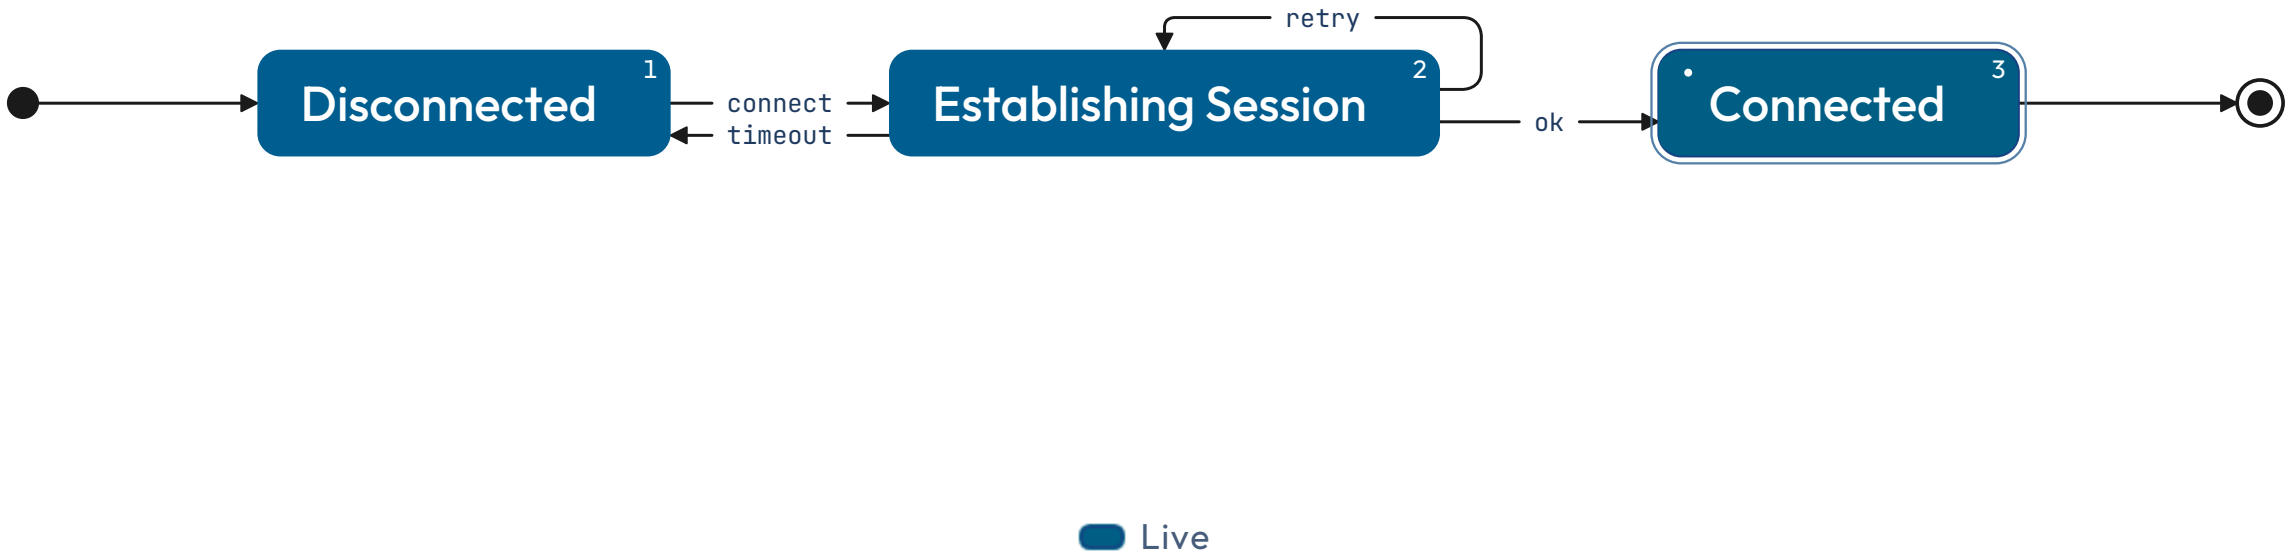

8 — mixed widths + every status color

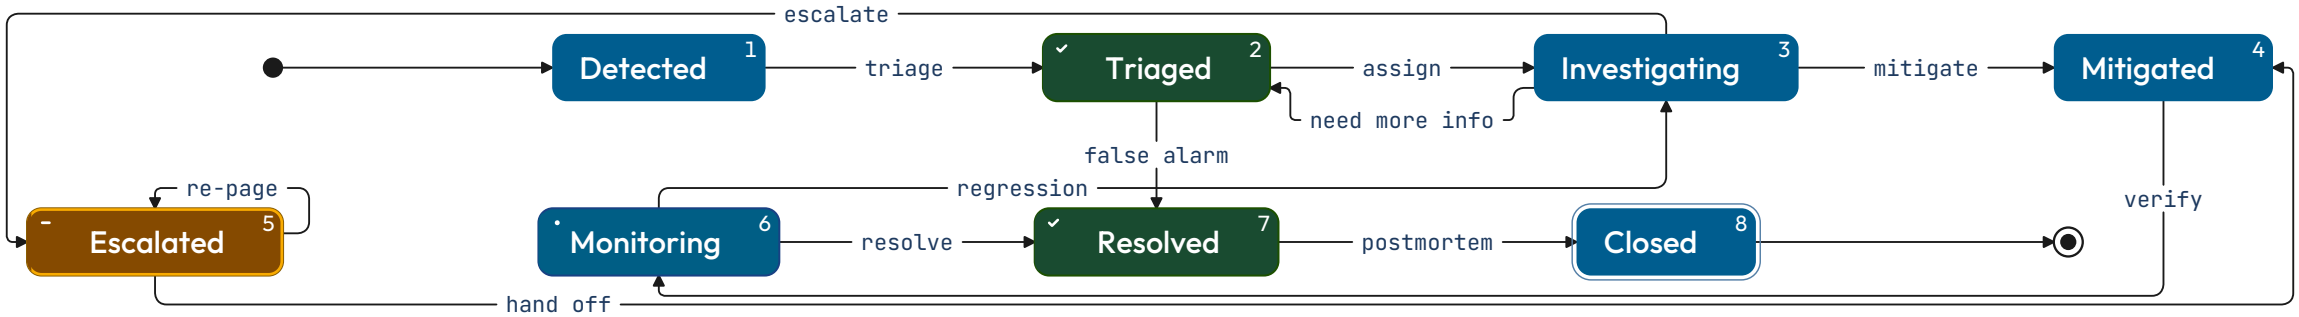

Left-to-right pipeline.

Connection (left-to-right).

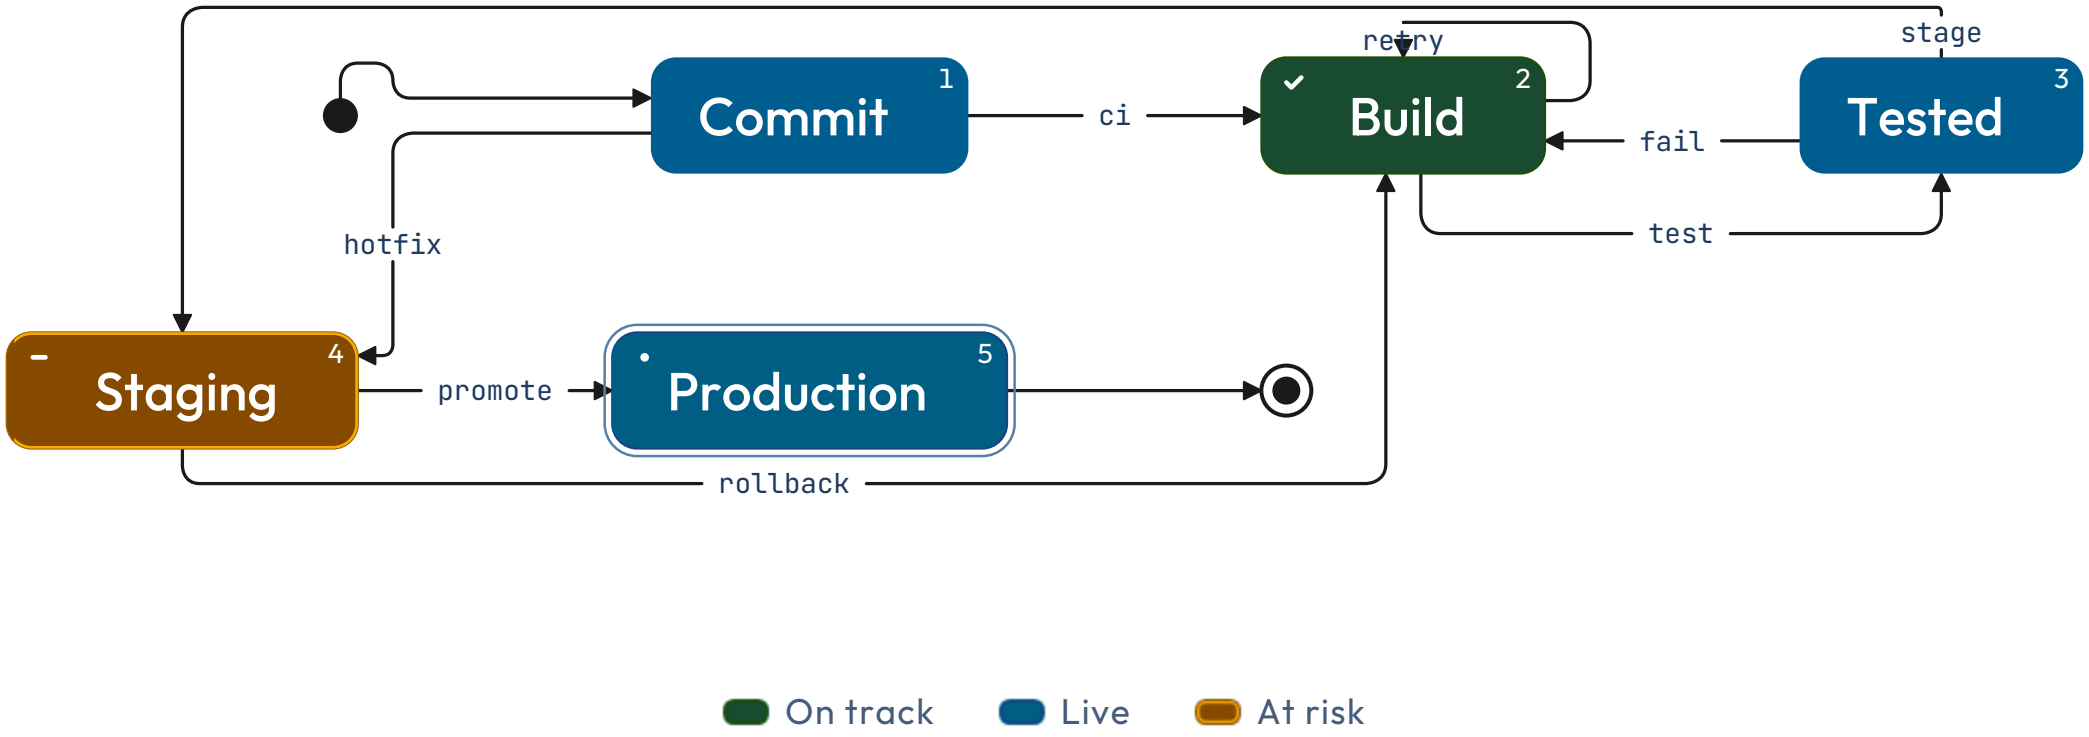

Incident response.
