redline

Clause-by-clause comparison — verbatim language with inline `<ins>` / `<del>` tracking the amendment.

The redline tracks an amendment verbatim.

Cal. Civ. Code §1798.135 · amendment SB-362 (2024)

A business that ~~collects~~ **collects, sells, or shares** consumers' personal information shall provide ~~two or more~~ **at least one** designated method for submitting requests to opt-out, **including, at minimum, a clear and conspicuous link on the homepage titled "Your Privacy Choices,"** for use by consumers to ~~opt out of the sale of~~ **direct the business not to sell or share** their personal information.

`Why this matters.` SB-362 collapses sale and sharing into one duty and pins a uniform link title — homepage chrome and DSAR workflows both need a uniform UX.

annotated adds the why beside each edit.

Cal. Civ. Code §1798.135 · amendment SB-362 (2024)

A business that ~~collects~~ **collects, sells, or shares** [1] consumers' personal information shall provide ~~two or more~~ **at least one** [2] designated method for submitting requests to opt-out, **including, at minimum, a clear and conspicuous link on the homepage titled "Your Privacy Choices,"** [3] for use by consumers.

1. `Scope expansion.` Collapses sale and sharing into one duty.
2. `Method floor.` One method is now sufficient; previously two were required.
3. `Link mandate.` Pins a uniform link title across all businesses.

three-col sets old, new, and why side by side.

OLD

A business that collects consumers' personal information shall provide two or more designated methods for submitting requests to opt out of the sale of their personal information.

NEW

A business that collects, sells, or shares consumers' personal information shall provide at least one designated method for submitting requests to opt-out, including a clear and conspicuous homepage link titled "Your Privacy Choices."

WHY

`Scope.` Sale and sharing fold into one duty.

`Method floor.` One method now suffices.

`Link title.` Homepage label is mandatory and standardized.

Cal. Civ. Code §1798.135 · amendment SB-362 (2024)

split shows before and after in parallel.

OLD

A business that collects consumers' personal information shall provide two or more designated methods for submitting requests to opt out of the sale of their personal information.

NEW

A business that collects, sells, or shares consumers' personal information shall provide at least one designated method for submitting requests to opt-out, including a clear and conspicuous homepage link titled "Your Privacy Choices."

> Why this matters. The left column is the prior text; the right is the amendment. Reading across makes the scope expansion obvious.

Cal. Civ. Code §1798.135 · amendment SB-362 (2024)

stacked strikes the prior text above the current.

Cal. Civ. Code §1798.135 · amendment SB-362 (2024)

OLD — prior text

~~A business that collects consumers' personal information shall provide two or more designated methods for submitting requests to opt out of the sale of their personal information.~~

NEW · current

A business that collects, sells, or shares consumers' personal information shall provide at least one designated method for submitting requests to opt-out, including a clear and conspicuous homepage link titled "Your Privacy Choices."

Why this matters. Stacking keeps the reading order vertical when each passage is a full sentence or more.

Edit density has a ceiling too.

Specimen clause · the most marking one blockquote should carry

> A clause that ~~keeps~~ **tracks** every change becomes ~~hard~~ **impossible** to read aloud when ~~more than half~~ **a third** of its words carry markup; past that, ~~annotate inline~~ **split the amendment across slides** so each edit **still** reads ~~quickly~~ **as language, not markup**.

When NOT to reach for redline.

Code diffs

For two code snippets side-by-side, use `compare-code`. redline is for natural language — legal, regulatory, contractual — not source code.

Paraphrased clauses

If the quoted text isn't verbatim, the diff is meaningless. Either render the actual clause with its diff, or move to `compare-prose` for narrative comparison.

Long passage with one tiny diff

If one word changed in a paragraph, quote only the affected sentence or two. A wall of unchanged text with one inline mark buries the change.

RELATED COMPONENTS

See also.

`compare-code` — the diff is source code, not natural language

`compare-prose` — two narrative alternatives, not verbatim amendments

`state-chart` — the change is structural state, not text

`obligation-matrix` — comparing many regimes against shared obligations
