

COMPARISON • EVIDENCE • INVENTORY

Cards that fill a box now use it

Three layouts were handed the full height of the stage and pinned their content to the top of it.

A verdict card distributes the height the row gives it.

THE PICK, STATED PLAINLY.

The chosen option leads with the verdict treatment and the reason it won, in one breath.

THE ROAD NOT TAKEN.

The alternative keeps its honest case — a decision against a straw man persuades no one.

Every quadrant is half the stage whether or not it needs to be.

Time sinks
One suffices

A stat is a tile, not a panel.

The numbers the row was built to carry

A ledger aligns its figures with the first line of the label.

01	Signal modernization	Replaces 14 interlockings past their design life.
02	Track and structures	Clears 22 slow-orders and four at-risk bridges.
03	Rolling stock overhaul	Extends service life on 90 rail cars by 15 years.
04	Power and substations	Replaces three substations running beyond peak capacity.

The defect is declarative, so the fix is a declaration.

Where the void lives picks the property.

A definite height takes `justify-content`; a stretched card takes `align-content`.

No row needs to move to grid.

`align-content` works on wrapped flex, and the 2×2 never flattens.

A threshold cannot draw the line.

Past 19% slack, 2,908 measured cards are one continuum.

The computed style can.

No card told to distribute is ever flagged; all 350 flagged compute `flex-start`.

ONE CSS PROPERTY EACH – NO REGISTER, NO MANIFEST FIELD, NO RUNTIME MEASUREMENT.

Three cells fixed, one retired.
