roadmap

Phased multi-workstream grid — phases across the top, workstreams down the side.

Four workstreams by three phases is the full grid.

WORKSTREAM	PHASE ONE	PHASE TWO	PHASE THREE
First	✔ Done cell	✖ Active cell	○ Planned cell
Second	✔ Every cell filled	✖ No blank promises	○ The honest grid
Third	✔ Short cell labels	✖ Four words at most	○ Or the grid wraps
Fourth	✔ The last row	✖ Twelve cells total	○ The ceiling

When NOT to reach for roadmap.

One workstream

A single row of phases is a `timeline` or `list-steps`, not a roadmap. Roadmap earns its grid only when at least two workstreams move in parallel.

No state markers

A grid of bare deliverables loses half its value. Add `[x]` / `[-]` / `[ ]` / `[/]` so the audience reads progress alongside scope.

Past five workstreams

More than five rows compresses cell text and the lane stripes lose their categorical read. Group adjacent workstreams or split by phase.
