DECLARED CONTRACTS · WHAT THEY PAINT

The muted tier, split

Four color tokens whose declared contract did not match what they painted.

One token was doing two jobs with two different floors.

MUTED TEXT

- Captions, table headers, slide chrome. Was sub-AA on 44 of 72 pairs, worst 2.11:1. Now clears 4.5:1 on both surfaces, everywhere.

MUTED DECORATION

- Rules, hairlines, skipped marks, low-alpha washes. Moved to a mark token at the 3:1 graphical floor; 32 of 36 values unchanged.

Muted text still reads as muted — and now it reads.

PALETTE	MUTED TEXT WAS	NOW	SEPARATION FROM BODY
magnolia / light	2.11:1	4.67:1	0.240
cuoio / light	2.43:1	4.65:1	0.038
concrete / dark	2.95:1	4.67:1	0.065
indaco / dark	3.68:1	4.66:1	0.230

The decoration tier keeps its quiet.

- Empty and skipped state marks
- Card rules and table hairlines
- Low-alpha cell washes
- Radar bands and grid lines

Syntax colors are grouped by what survives the condition.

```
// Six groups, not twelve: a twelve-way color distinction does not
// survive a dichromacy, and none of it survives achromatopsia.
function separationUnder(condition, roles) {
  const seen = simulate(roles, condition);   // the reader's actual colors
  const worst = minPairwiseDistance(seen);   // not the authored ones
  return worst >= (condition === 'achromatopsia' ? 0.048 : 0.11);
}
```

The rim is ink again, not the brand hue.

A token declared nowhere means the fallback wins on every theme, forever — and this rim was landing in the same hue family as the wash it exists to seat against.

Same phantom, same repair.

Both rims now read a contract token directly, so they need no fallback at all — which also removes the chain the contract ledger was tracking.

Three gates, each one bitten before its green was trusted.

PHANTOM READS

A token nothing declares and nothing writes. Runtime-set is proven by a write.

MUTED TIER FLOORS

4.5 for the text half, 3.0 for the mark half. Fails closed on an unreadable value.

SYNTAX SEPARATION

The a11y families under simulation — contrast alone passed the whole time.
