

LATTICE • INLINE SPARKS

**A spark is a chart
the size of a word.**

Written like a pill, drawn like a chart, and it goes wherever text goes.

Five series types, three sizes, one grammar.

TYPE	WRITTEN AS	SM	MD	LG
line	<code>~{...}</code>			
area	<code>:area</code>			
bar	<code>:bar</code>			
step	<code>:step</code>			
win-loss	<code>:winloss</code>			

Two types measure one value against a whole.

TYPE	WRITTEN AS	SM	MD	LG
ring	~{72%}			
ring, of a total	~{18/24}			
bullet	~{72/80}:bullet			
bullet, past target	~{91/80}:bullet			

Markers point at a value; color and frames match pills.

MODIFIER	EFFECT	SPARK
<code>:end</code> <code>:minmax</code>	dot the latest value; the low and the high	
<code>:c3</code> <code>:c5</code>	a categorical color slot	
<code>:framed</code>	a pill's capsule behind it, same height	
<code>:framed:c3</code>	the slot's fill and edge, like 	
negatives	zero line appears when data crosses it	

A spark sits in a sentence at the size of the words.

Weekly signups climbed from 1,200 to 2,050  over eight weeks, while churn held flat .

- Sprint outcomes this quarter  — six hits, two misses.
- Onboarding completion  against a goal of 80.
- Headcount by month  — three hiring waves.

In a table, every row's trend reads at a glance.

REGION	Q3 REVENUE	LAST 8 QUARTERS	PLAN
North America	\$4.2M		
Europe	\$2.8M		
Asia Pacific	\$1.9M		
Latin America	\$0.6M		

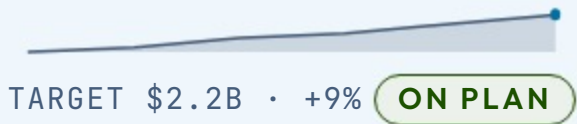

A line shows shape; `:zero` shows size.

SERIES	DEFAULT: LOW TO HIGH	WITH <code>:ZERO</code>
Churn, 4–5% for eight weeks		
Uptime, 99.2–99.9%		
Revenue, \$1.6B–\$2.4B		
Bars always start at zero		

Revenue ahead of plan; margin and cash both expanded.

\$2.4B

A broken spark stays code, and lint:deck says why.

WRITTEN	WHAT LINT:DECK REPORTS
~{1,200 1,450}	1,200 is not a number: no units, commas or currency signs
~{72%}:bar	a bar needs a series of two or more numbers, not one value
~{3 5 4}:bar:end	:end only goes on line, area and step, not bar
~{3 5 4}:c13	:c13 is not a spark modifier
