

State chart vs. content we've never seen.

Browser-measured layout: nodes are sized by the real text engine, edges are drawn from measured rects. These slides try to break it.

Single-letter states.

Long state names.

狀態遷移

CJK state labels.

 On track

Ten-step pipeline.

Router with many exits.

Wizard with escape hatches.

 Done

Degenerate: one state.

Status palette across widths.

On track · Done At risk Blocked Decision Deferred

Left-to-right pipeline.

On track Live

Connection (left-to-right).

☐ Live

Incident response.

Build & release graph.

Document approval (curved).

Job runner (curved, lr).
