FEATURE · _FOCUSSTYLE: HIGHLIGHT

Highlight works on every axis.

Cards, rows, columns, cells and code lines take a tint and an edge, a chart mark takes an edge, and a chart series gets a heavier line. Nothing else on the slide changes.

`_focus: row 4` — tint the deciding criterion.

`_focus: line 8` — tint the line that matters.

```
import { DecisionFramework } from "@company/signal-sdk";

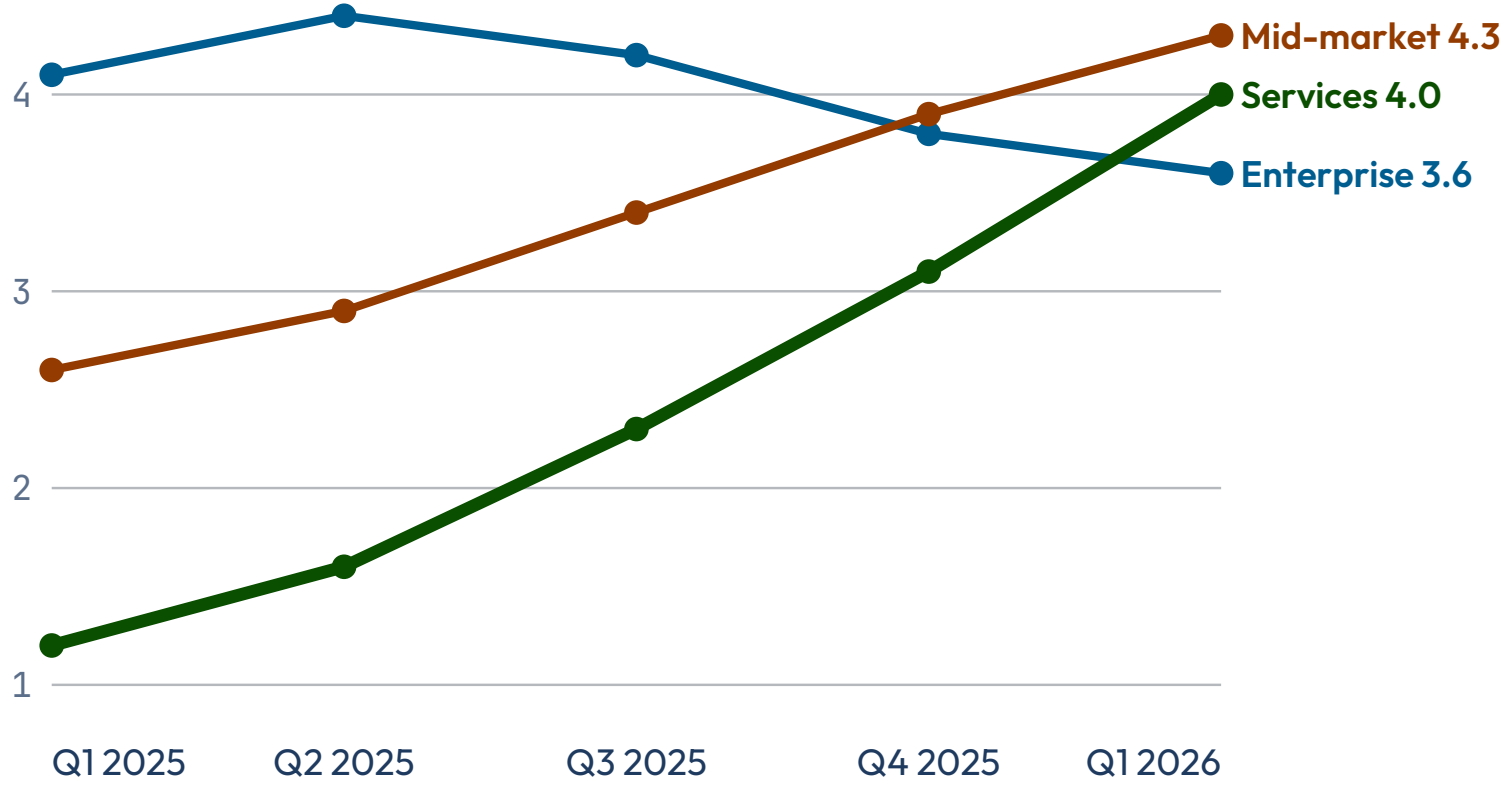

const framework = new DecisionFramework({
  configFile: "./framework.config.json",
});

// Calibration depends on logging every decision
const entry = await framework.decisions.log(decision, { signals });
```

EMEA is where the quarter was won.

Services grew into the gap enterprise left.

`_focus: item 1, item 4` — two targets at once.

Signal Intake

Weekly structured collection across customer conversations, market data, and competitive moves.

Scoring Model

Each signal scored on confidence, recency, and strategic relevance, reviewed quarterly.

Decision Log

Every decision recorded with the signals that informed it and the criteria applied.

Calibration Loop

Monthly retrospective comparing predicted outcomes to actual outcomes.

Name it once, see it everywhere.

`_focus: <axis> <ordinal>` · `_focusStyle:` *picks how it shows.* `highlight` *tints and edges the target, and nothing dims.*
