When NOT to reach for regulatory-update.

Single rule's lineage

If the slide walks one rule from statute through case, use `authority-chain`. regulatory-update is a period digest.

Past six rows

More than six items compresses the row gap and the citation chips run out of room. Split by jurisdiction.

Missing summary or citation

Each row needs all three sub-items — citation, summary, effective date. Otherwise the row reads as rumor.

`timeline-list` — dated entries with a status read and a sentence each, but no citation per row

`authority-chain` — single rule walked from statute to regulation to guidance to case

`list` — `takeaway numbered`: flat enumeration of requirements without dates or citations

`list-steps` — lighter dots-on-a-spine sequence — the `timeline` variant

`list-tabular` — structured metadata per row but no regulatory framing
