

LATTICE • INLINE SPARKS

**A spark is a chart
the size of a word.**

Written like a pill, drawn like a chart, and it goes wherever text goes.

Seven types, three sizes, one grammar.

TYPE	WRITTEN AS	SM	MD	LG
line	<code>~{...}</code>			
area	<code>area</code>			
bar	<code>bar</code>			
step	<code>step</code>			
win-loss	<code>winloss</code>			
ring · bullet	<code>~{72%}</code> · <code>~{72/80, bullet}</code>			

One color, three looks: pigment fills, etching draws, tone steps.

LOOK	LINE AND AREA	BARS	RING	BULLET
<code>pigment</code> , the default				
<code>etching</code>				
<code>tone</code>				
<code>tone</code> , no color (<code>c1</code>)				

Every spark is framed, and the frame is yours to set.

MODIFIER	EFFECT	SPARK
end minmax	dot the latest value; the low and the high	
c3 c5	a categorical color slot	
default	a squared 3:2 frame, a step taller than a pill	
rounded	the theme's small radius	
bare	no frame, just ink	
negatives	zero line appears when data crosses it	

On a prose slide, **spark-bare** keeps the lines even.

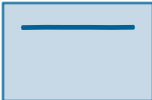

Weekly signups climbed from 1,200 to 2,050  over eight weeks, while churn held flat .

- Sprint outcomes this quarter  — six hits, two misses.
- Onboarding completion  against a goal of 80.
- Headcount by month  — three hiring waves.

In a table, every row's trend reads at a glance.

REGION	Q3 REVENUE	LAST 8 QUARTERS	PLAN
North America	\$4.2M		
Europe	\$2.8M		
Asia Pacific	\$1.9M		
Latin America	\$0.6M		

A line shows shape; zero shows size.

SERIES	DEFAULT: LOW TO HIGH	WITH ZERO
Churn, 4–5% for eight weeks		
Uptime, 99.2–99.9%		
Revenue, \$1.6B–\$2.4B		
Bars always start at zero		

Revenue ahead of plan; margin and cash both expanded.

\$2.4B

Total revenue

TARGET \$2.2B • +9% **ON PLAN**

42%

Gross margin

+2PP QOQ **ON PLAN**

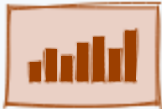

\$1.1B

+\$180M QOQ **ON PLAN**

In a sketch deck, sparks are drawn by hand too.

LOOK	LINE	BAR	RING	BULLET
pigment				
etching				
tone				

A broken spark stays code, and lint:deck says why.

WRITTEN	WHAT LINT:DECK REPORTS
<code>~{1,200 1,450}</code>	<code>1,200</code> is not a number: no units, commas or currency signs
<code>~{72%, bar}</code>	a bar needs a series of two or more numbers, not one value
<code>~{3 5 4, bar, end}</code>	<code>end</code> only goes on line, area and step, not bar
<code>~{3 5 4, c13}</code>	<code>c13</code> is past the limit — this takes <code>c1</code> – <code>c12</code>
