

EVIDENCE · SCATTER · SERIES

quadrant

Native 2×2 scatter chart — items plotted on two continuous axes.

EFFORT 0-10 → REACH 0-100

The quadrant scatters items on two axes.

Effort in analyst-weeks; reach as the percent of teams that would adopt it, optimistically.

EFFORT 0-10 → REACH 0-100

bubble sizes each point by a third value.

EFFORT 0-10 → REACH 0-100

trail shows where each point moved from.

EFFORT 0-10 → REACH 0-100

cohort colors the points by group.

Strategic Bets	2
Quick Wins	2
Defer	2
Time Sinks	2

EFFORT 0-10 → REACH 0-100 · TARGETS 5, 50

threshold draws the lines that matter.

COMPLETENESS OF VISION 0-100 → ABILITY TO EXECUTE 0-100

magic names all four quadrants.

EFFORT 0-10 → REACH 0-100

minimal strips the chart to its points.

EFFORT 0-10 → REACH 0-100

Stress test — fourteen initiatives, dense labels, one owner.

EFFORT 0-10 → REACH 0-100

The quadrant scatters items on two axes.

Effort in analyst-weeks; reach as the percent of teams that would adopt it, optimistically.

EFFORT 0-10 → REACH 0-100

The quadrant scatters items on two axes.

Effort in analyst-weeks; reach as the percent of teams that would adopt it, optimistically.

EFFORT 0-10 → REACH 0-100

The quadrant scatters items on two axes.

Effort in analyst-weeks; reach as the percent of teams that would adopt it, optimistically.

When NOT to reach for quadrant.

Static categorical 2×2

If the quadrants are fixed labels (Important × Urgent, Build × Buy × Partner × Defer) and items are placed by category not coordinate, use `matrix-2x2`. `quadrant` is data-driven; `matrix-2x2` is conceptual.

Single axis matters

If one axis is decorative and only the other carries meaning, you have a ranking, not a scatter. Use `progress` for percent-complete or `kpi` for ranked metrics with status.

Coordinates without an audience-shared scale

If `8, 80` requires a footnote to interpret, the slide doesn't pay off. Either label the axis units in the eyebrow — the `Effort 0-10` / `Reach 0-100` line above every slide here — or normalize to a familiar scale before authoring.

RELATED COMPONENTS
