# gantt

Gantt chart — task bars across a date axis.

2026 Q1 .. 2026 Q4   today Q3

# The gantt lays the work against the calendar.

Three workstreams across four quarters; the one at-risk bar quietly gates the rollout, GA is a milestone, and the today line marks where the plan stands.

2026 Q1 .. 2026 Q4

# Stress test — four workstreams, twelve tasks, one recalibration bar nobody wants to own.

2026 Q1 .. 2026 Q4   today Q3

# The gantt lays the work against the calendar.

Three workstreams across four quarters; the one at-risk bar quietly gates the rollout, GA is a milestone, and the today line marks where the plan stands.

# When NOT to reach for gantt.

## Single workstream

One lane of bars is a timeline, not a gantt. Use `timeline` or `list-steps` when there is no parallel work to coordinate.

## More than five lanes

Past five workstreams the bars compress and the labels crowd. Group lanes (collapse 'SDK' subdomains into 'SDK') or split into two slides.

## No spans at all

A gantt mixes bars with the odd milestone — but if every task is a point-in-time event with no durations, use `timeline` or `roadmap` `milestones`. gantt earns its chrome only when bars carry meaningful length.

RELATED COMPONENTS

# See also.

`roadmap` — phased grid of deliverables across workstreams  
without continuous spans

`kanban` — current state by stage rather than schedule by  
lane

`list-steps` — sequential process with descriptive steps, no  
parallel lanes
