*Lattice · Feature deck*

# The agenda writes itself.

Leave the list out, and the deck's dividers fill it in.

# Four parts, one decision.

01 The quarter in four numbers p.3

02 Where growth came from p.5

03 The SMB segment: keep, fix, or exit p.7

04 What we ask the board to approve p.9

*Section 01*

# The quarter in four numbers.

# The agenda you just saw has no list in its source.

- The slide says `agenda` and a heading, and nothing else
- The engine lists each `divider` heading in deck order, with the page it starts on
- Front matter `agenda: circles no-pages` sets the style and drops the numbers
- Write any list of your own and it wins, untouched

*Section 02*

# Where growth came from.

# Here is where we are.

1 The quarter in four numbers p.3

2 **Where growth came from** p.5

3 The SMB segment: keep, fix, or exit p.7

4 What we ask the board to approve p.9

*Section 03*

# The SMB segment: keep, fix, or exit.

# Two parts done, one to decide.

- [x] The quarter in four numbers p.3
- [x] Where growth came from p.5
- [→] **The SMB segment: keep, fix, or exit** p.7
- [ ] What we ask the board to approve p.9

*Section 04*

# What we ask the board to approve.

# Three styles, one source.

*The ledger reads as a contents page, `circles` as a track of stops, and `checks` as done, here and ahead.*
