Feature demo

claim

Give the content the stage.

Four presets, one purpose.

`claim` is how much of the frame the content claims vs the chrome. Set it deck-wide (`claim: hero`) or per slide (`claim-hero`).

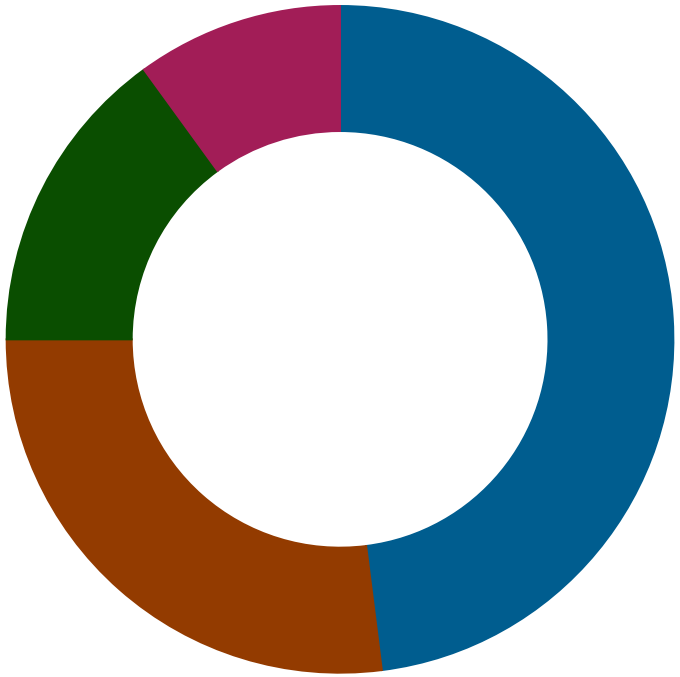

- **framed** — the default: full masthead, footer, section rail.
- **quiet** — recede the section rail + meta bay; keep the title and page number.
- **hero** — drop the bands; the content fills the stage (the page number reads through).
- **bleed** — edge-to-edge, no safe margin. Media and canvas.

Section 01

The dial, on one chart.

Revenue · FY26

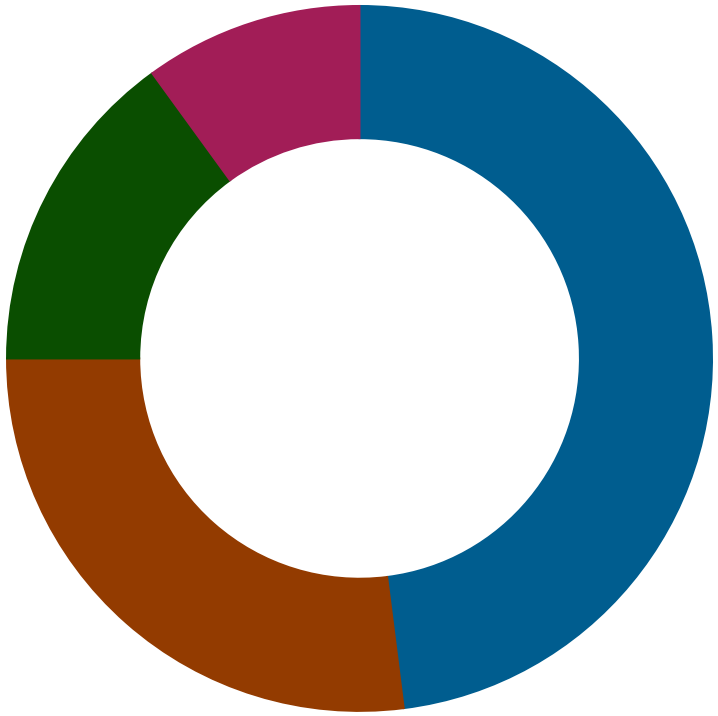

framed — full chrome.

Subscriptions	48%
Services	27%
Licensing	15%
Other	10%

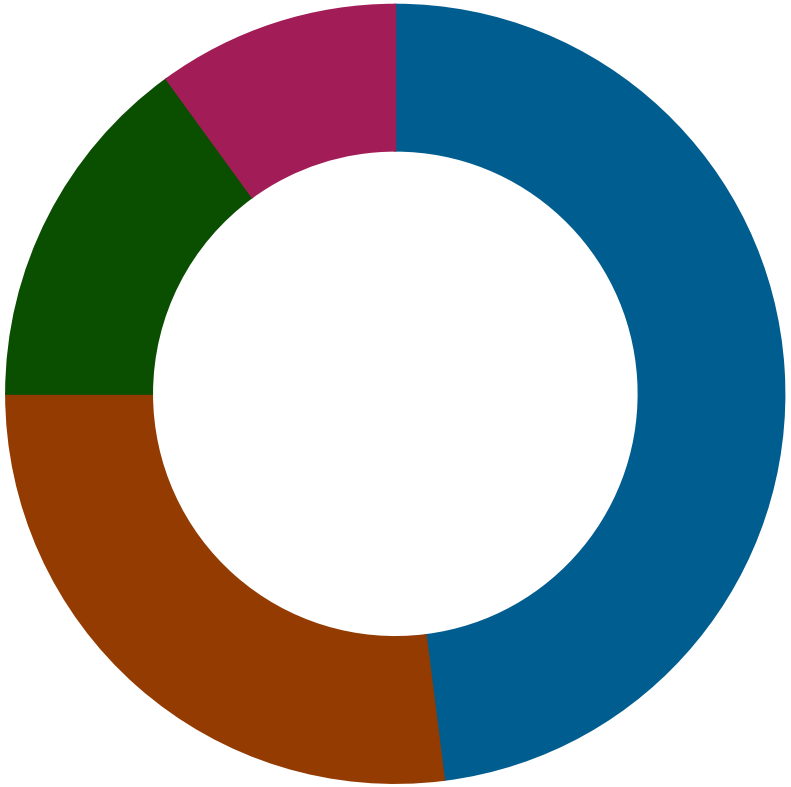

Revenue · FY26

quiet — the rail and meta recede.

Subscriptions	48%
Services	27%
Licensing	15%
Other	10%

hero — the chart takes the stage.

Subscriptions	48%
Services	27%
Licensing	15%
Other	10%

Nearly half came from subscriptions this year.

Recall

92%

of an audience remembers a single number from a deck.

API

The new endpoint.

```
app.post('/api/v2/auth', async (req, res) => {
  const session = await issueSession(req.body);
  res.json({ session });
});
```

bleed

100%

of the frame — no safe margin, so a dense table opts out.

claim

Content takes the stage; you price the cost.

Quiet trades the section rail. Hero trades the bands. Bleed trades the safe margin.
