Fix · list-steps converge

A funnel you can read on every band.

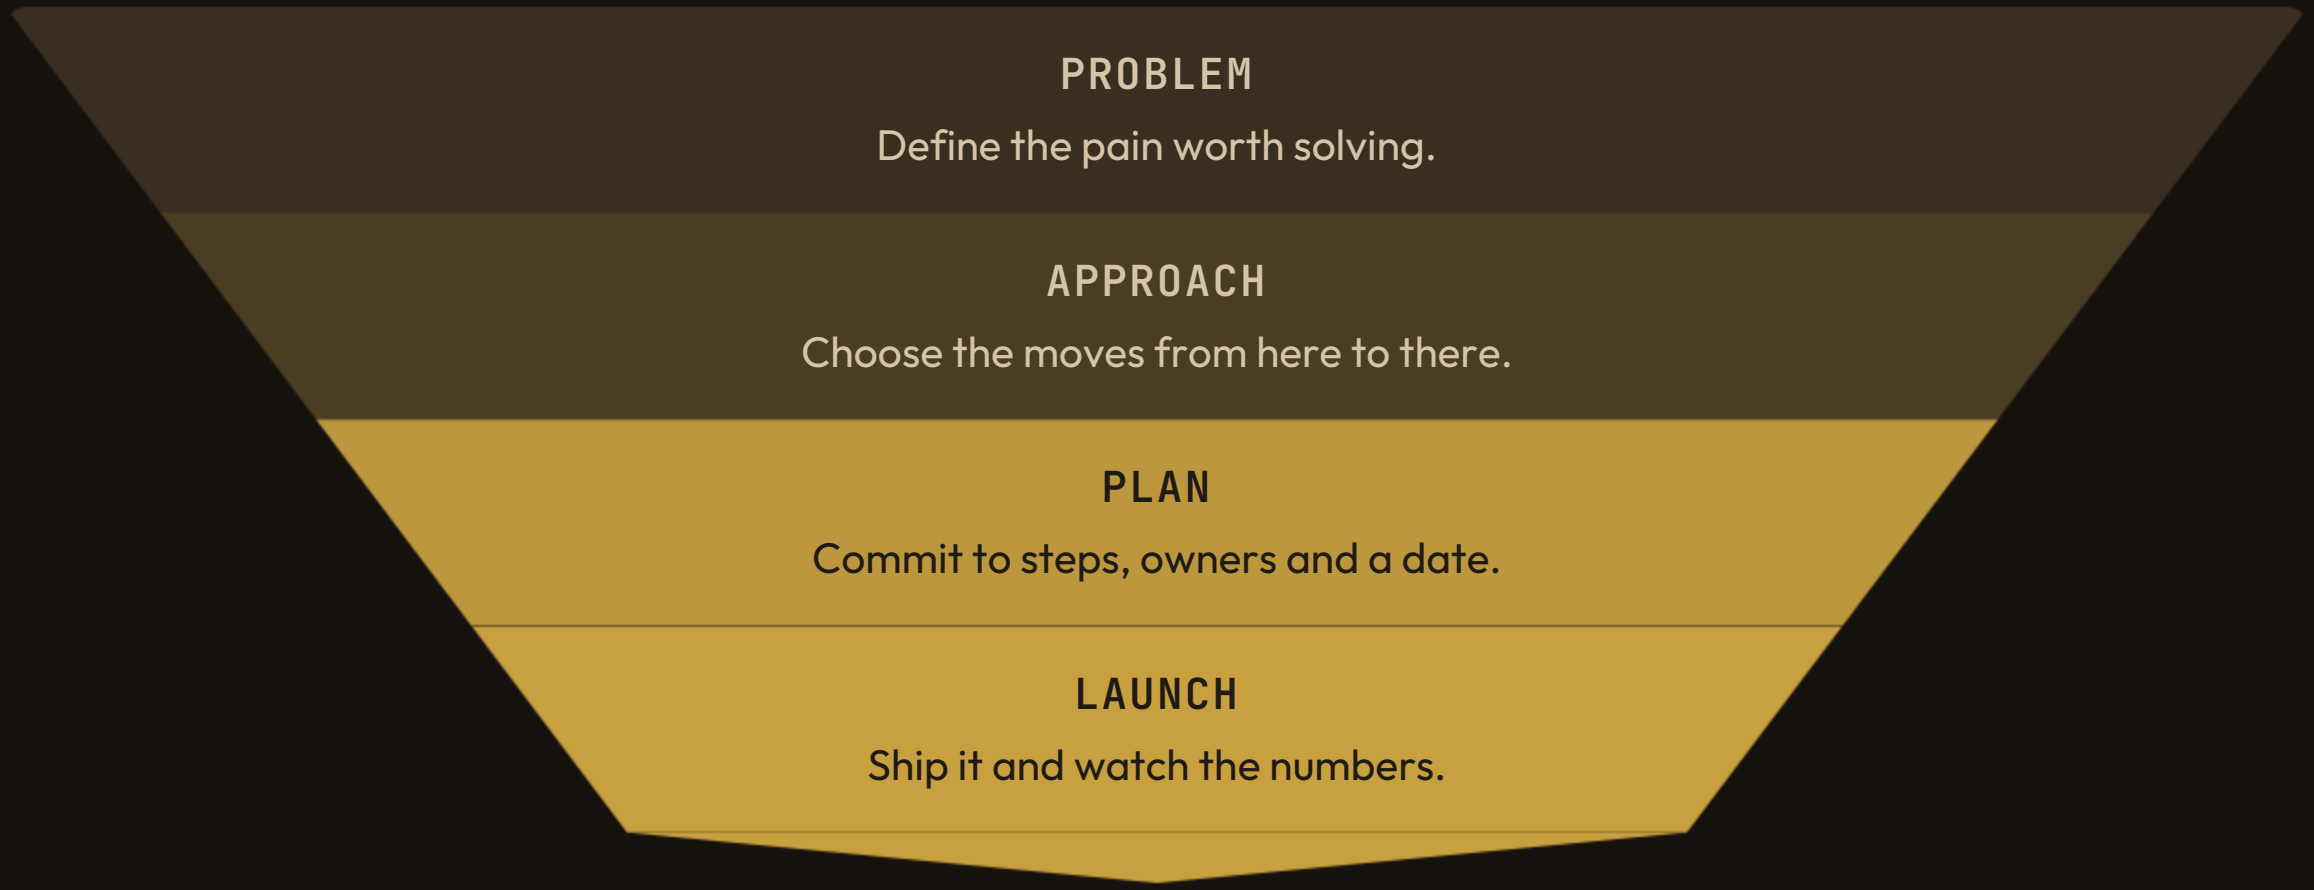

The two middle bands of `list-steps converge` now keep their text at 4.5:1 or better in every theme, light and dark.

Four concerns narrow onto one launch.

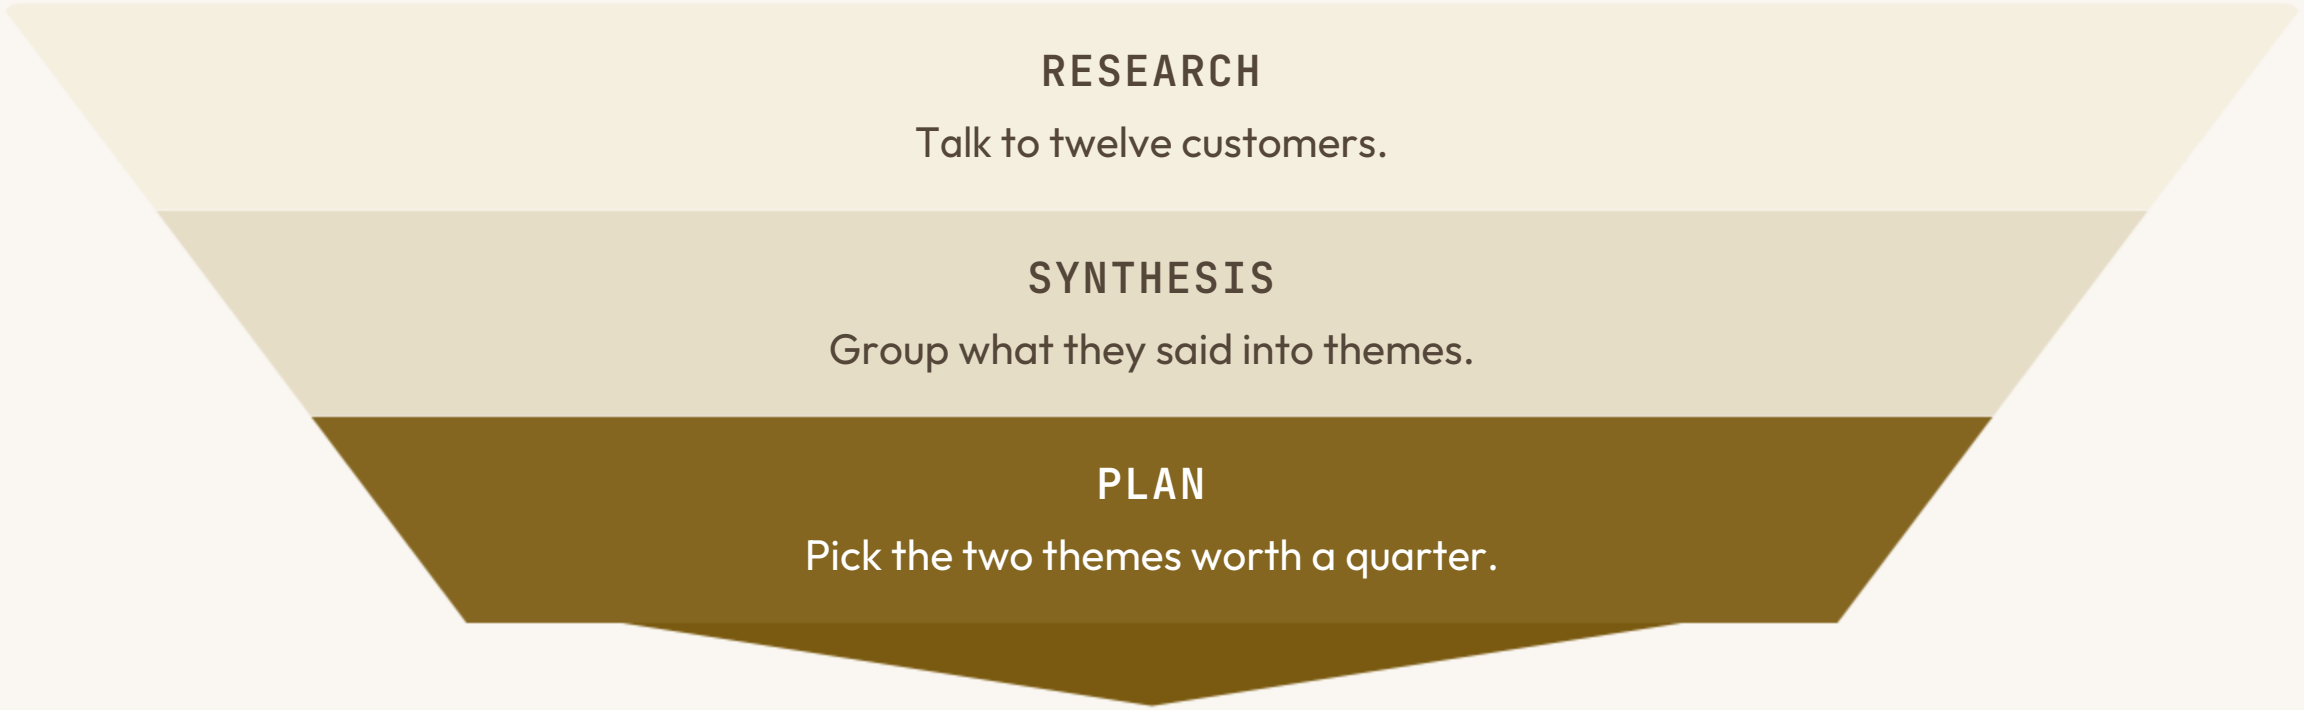

Four bands, light. The second band was 3.51:1 in cuoio before this fix.

The same launch funnel, in dark.

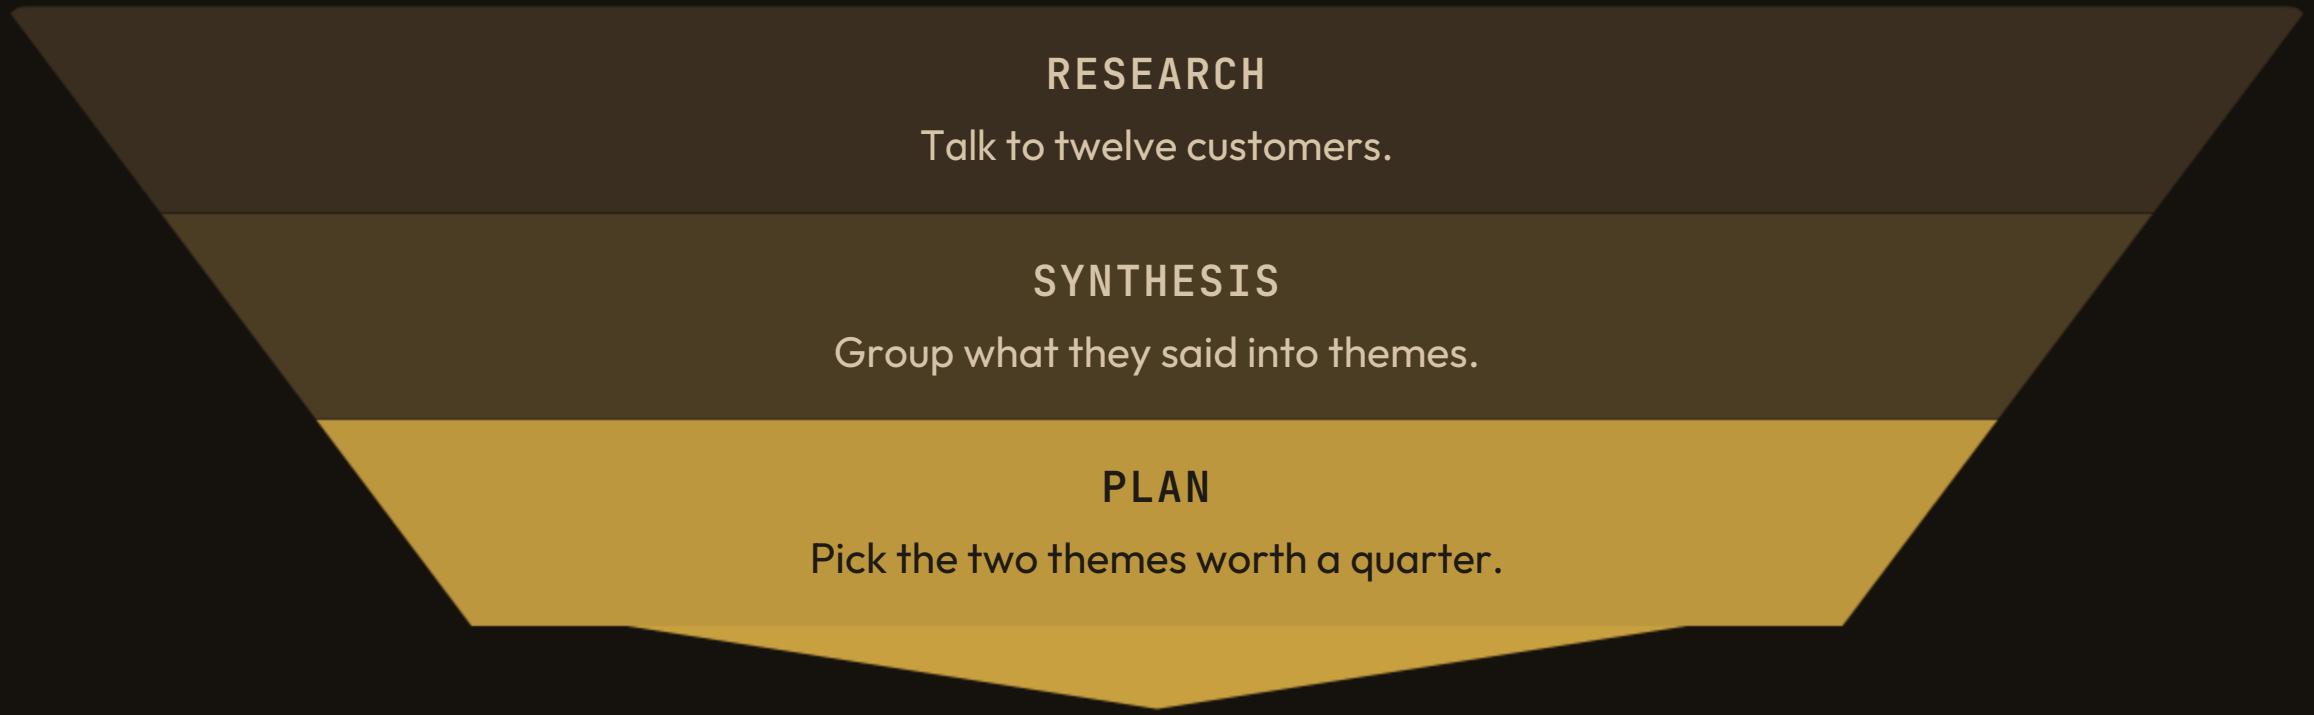

Four bands, dark. The third band was below 4.5:1 in most themes before this fix.

Three inputs become one plan.

Three bands, light. The last band is the old 66% mix's slot, now 92% accent.

The same plan funnel, in dark.

Three bands, dark.

Each band stays near one end of the accent ramp.

A mix halfway between the soft fill and the accent leaves neither ink enough contrast, so the middle steps moved toward the ends.

What changed

STEP 01

Band two

12% accent over the soft fill, down from 32%.

STEP 02

Band three

92% accent, up from 66%.

STEP 03

Measured

Every theme and scheme clears 4.5:1.
