Feature · The image plugin

Pictures you can set like the deck

One record describes the picture; the slide decides where it goes

Seat · the image slide

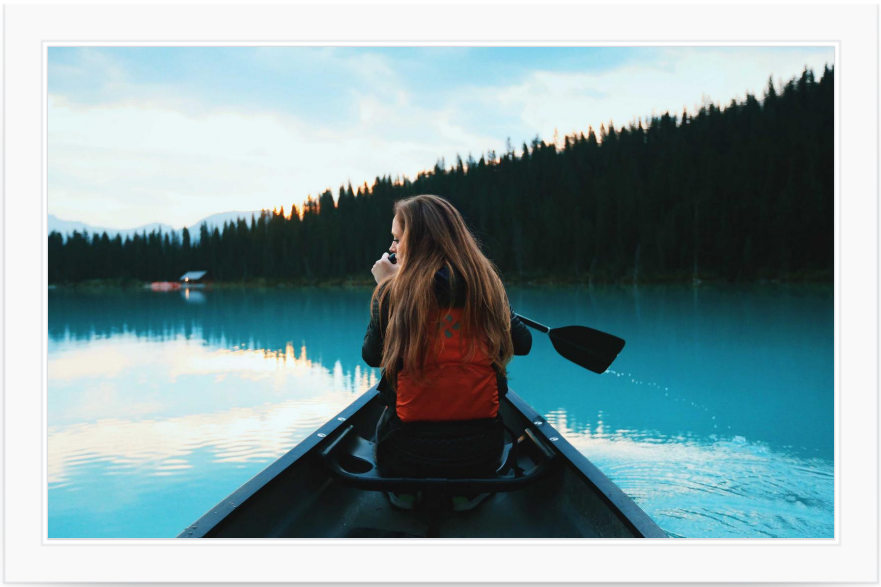

The record becomes the layout's photo.

An `image` slide makes the picture its panel and reads the photo's shape. The finish here is `nimbus`, the deck's own blooms.

Frame · mat

A gallery mat, with the title shown.

The lake at dawn

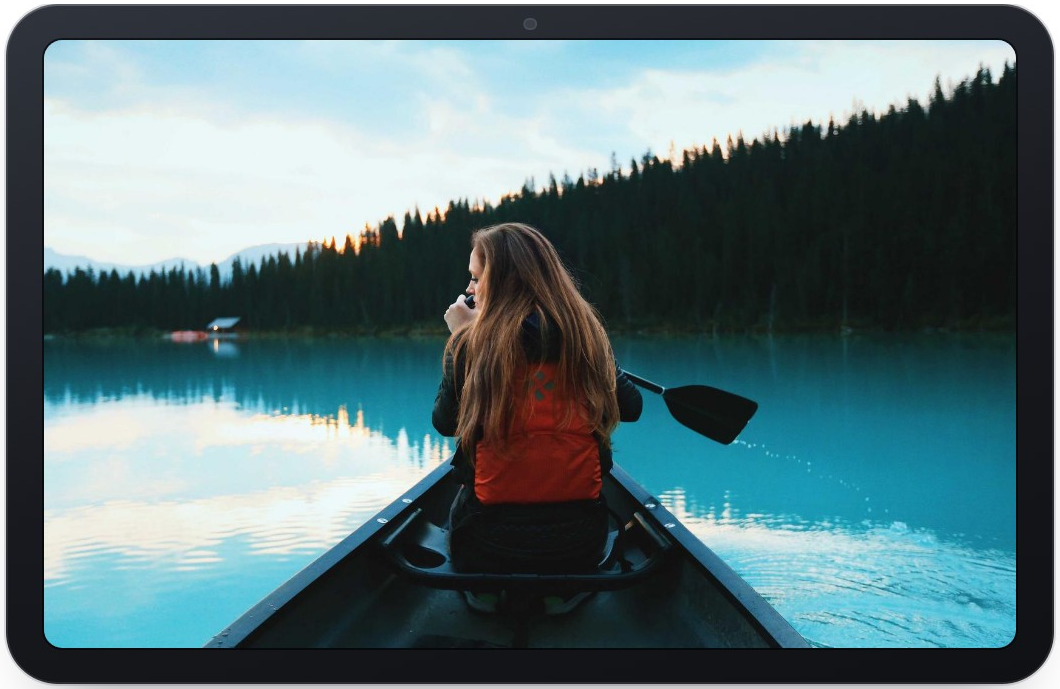

Frame · keyline · duotone

One accent hairline, and the picture in the accent.

Frame · device

A screen bezel for product shots.

Frame · corners · grayscale

Registration brackets, and the picture in grays.

Frame · float · halo · dark

Lifted on a shadow that stays dark on a dark theme.

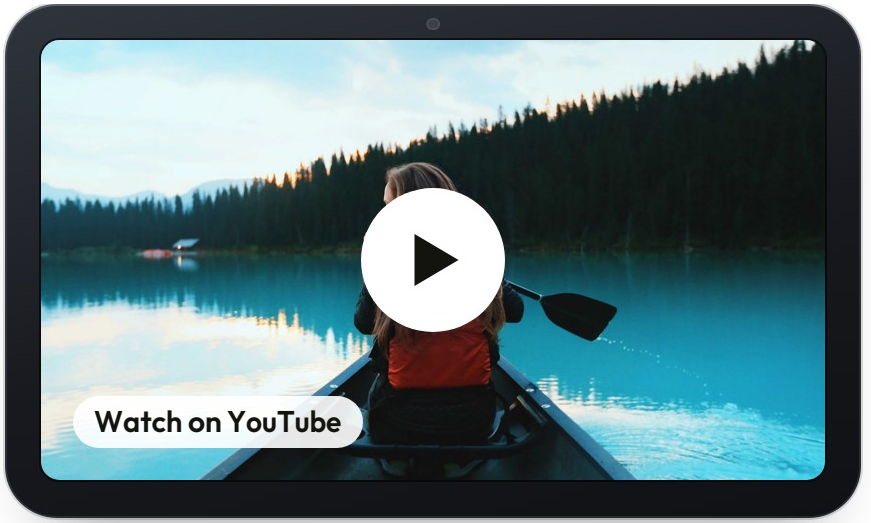

Seat · bleed · meridian

Or the slide's own background.

Shared · a clip

A clip takes the same frames and finishes.
