Anima · line · plain charts

A plain line chart builds, too.

Set `motion: on` once and every line chart in the deck draws itself in: first the lines, then their points, then the words. It used to skip any line chart that had no detail bullets. The exported PDF is unchanged.

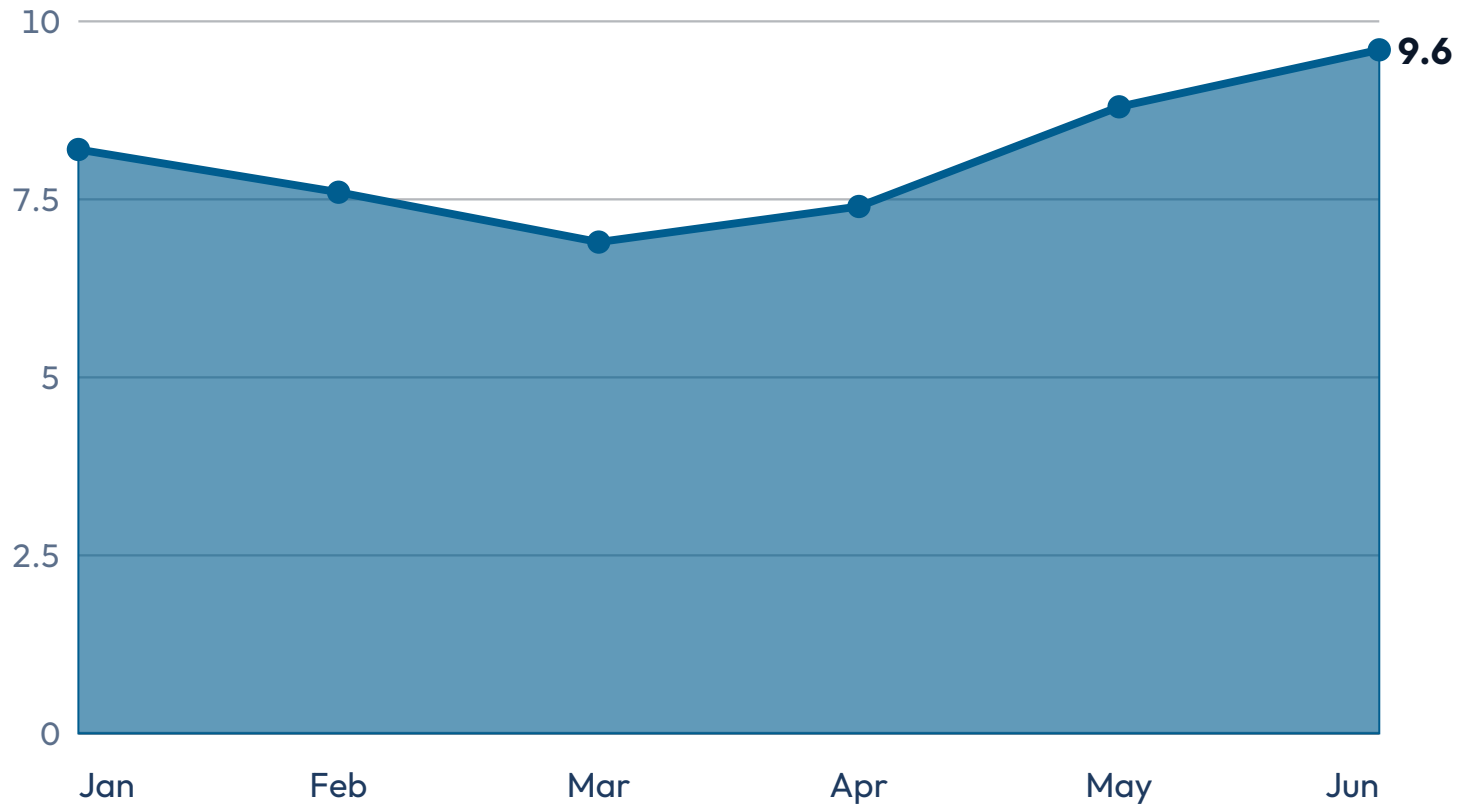

Revenue by segment · $M

Services grew into the gap enterprise left.

Cash on hand · months of runway

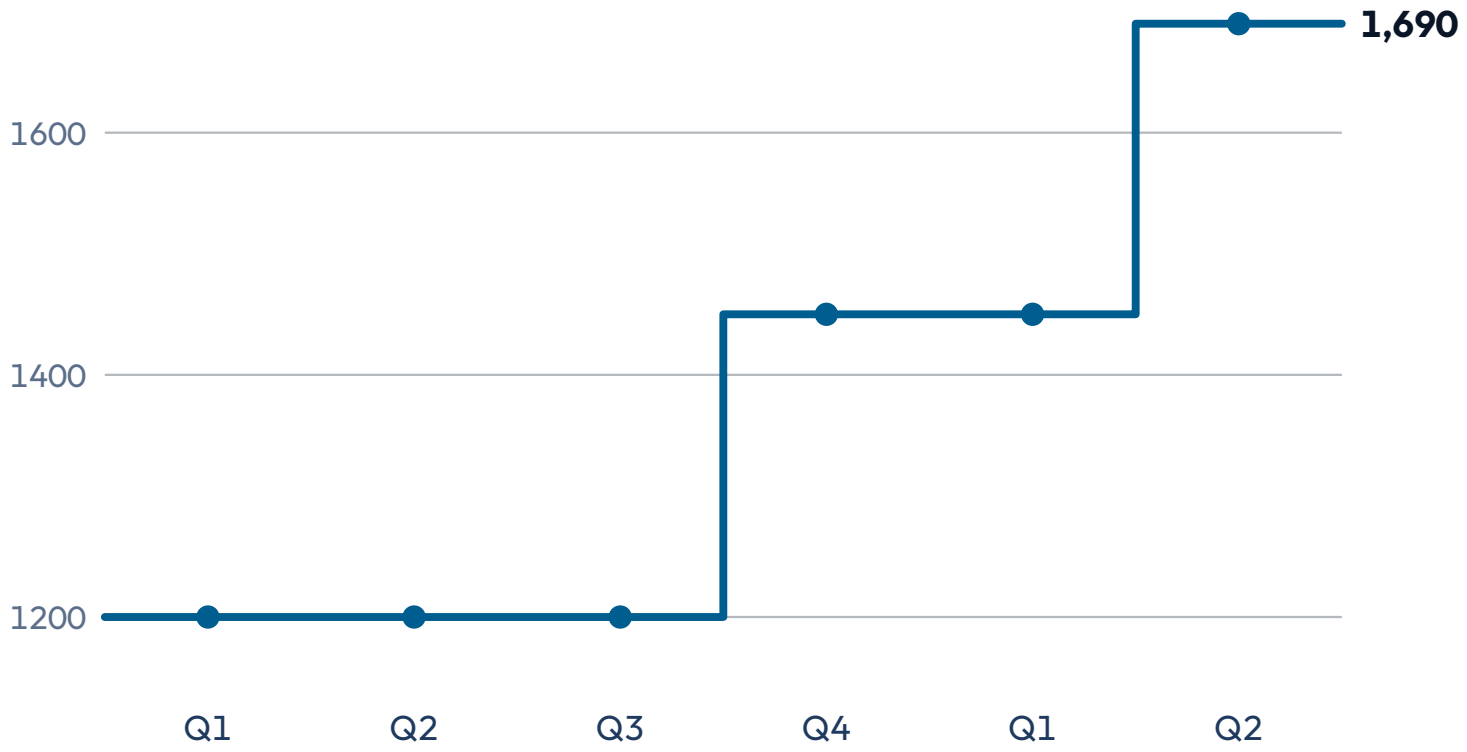

Cash never dipped below one quarter of runway.

area · one series, and the fill builds with it

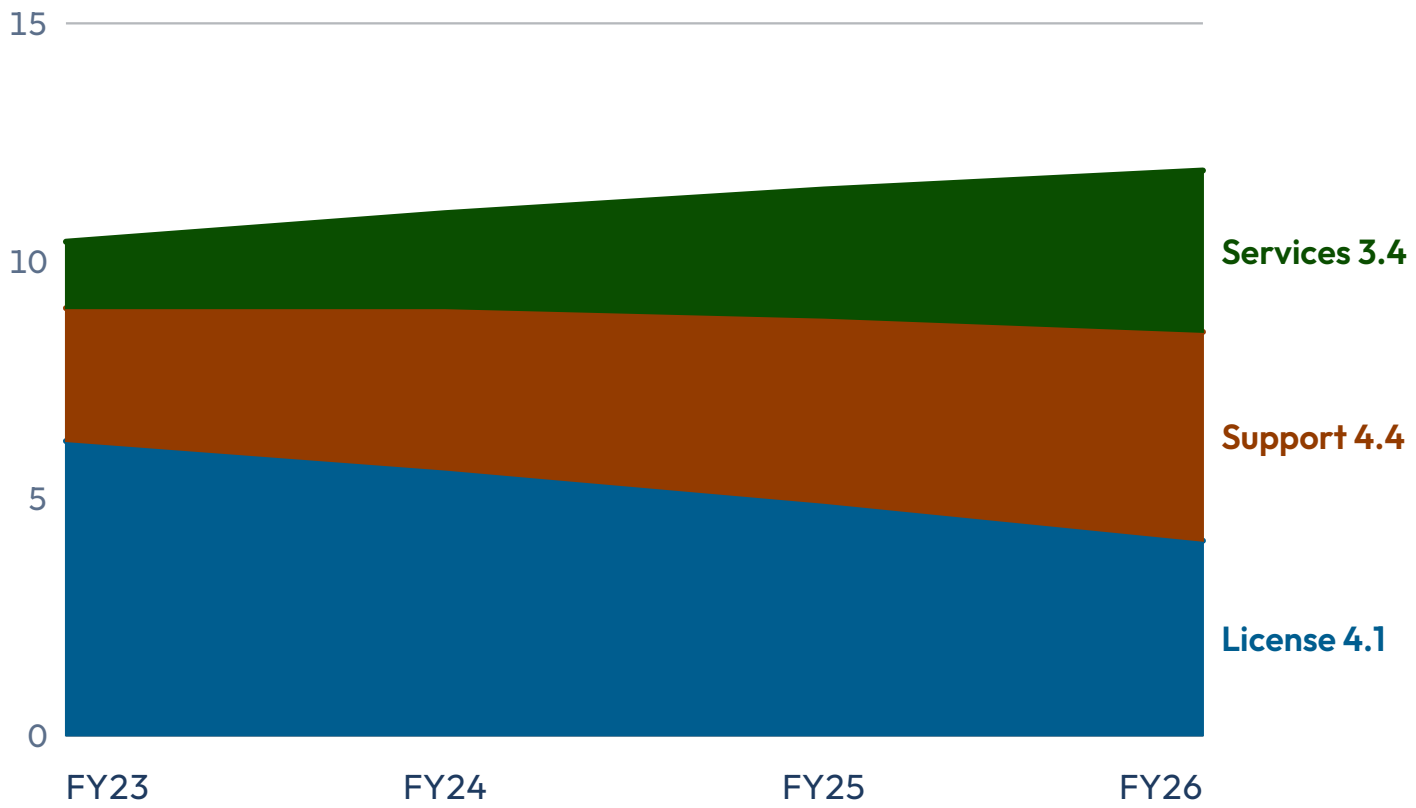

List price · per seat

The list price held for three quarters, then moved twice.

Revenue mix · $M

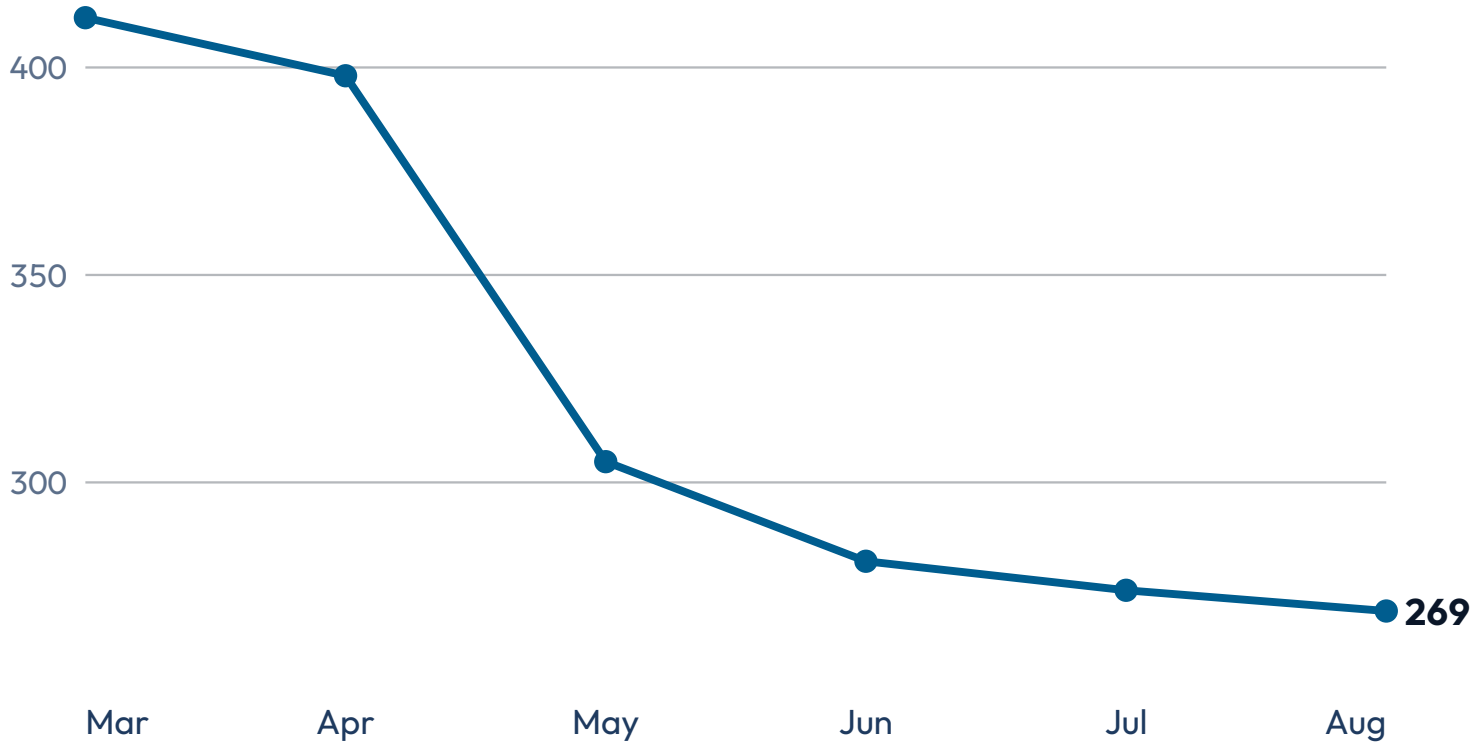

The mix shifted; the total barely moved.

stacked-area · motion-rise · each band slides up into place

Median latency · ms

Latency fell by a third after the cache landed.

no-motion · the control, so the difference is visible

One source, four surfaces.

- Studio, Playground, Present
  - The lines draw in, then their points, then the words.
- The exported PDF
  - The finished chart, still, identical to a deck that never asked.
- Reduced motion
  - The end state, mounted immediately.
- The `--player` export
  - The build travels with the deck.
