Diagram · vendored Mermaid 11.17 to 12.3

Mermaid 12 draws the diagrams you already have

The vendored Mermaid moved up a major, which brings its label sanitizer to DOMPurify 3.4.17. Mermaid 12 changed its own defaults; the deck keeps the drawing you designed against.

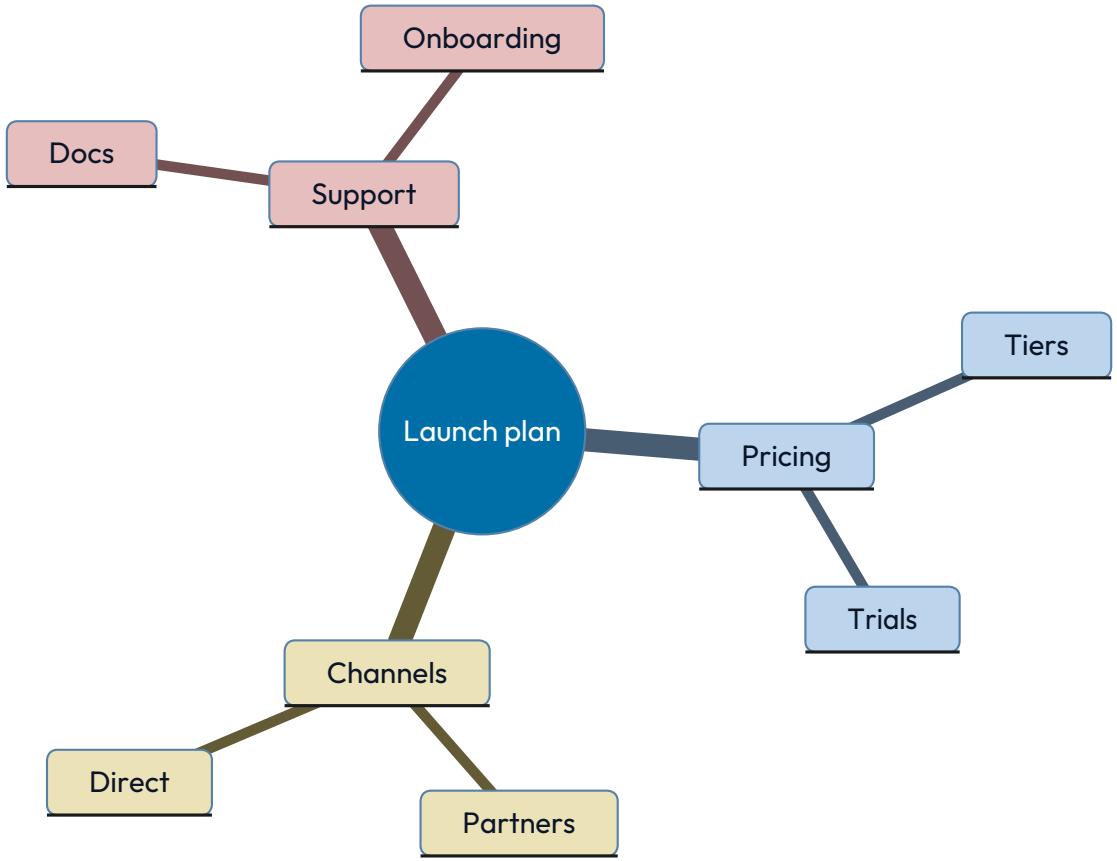

A flowchart keeps its square edges and plain nodes.

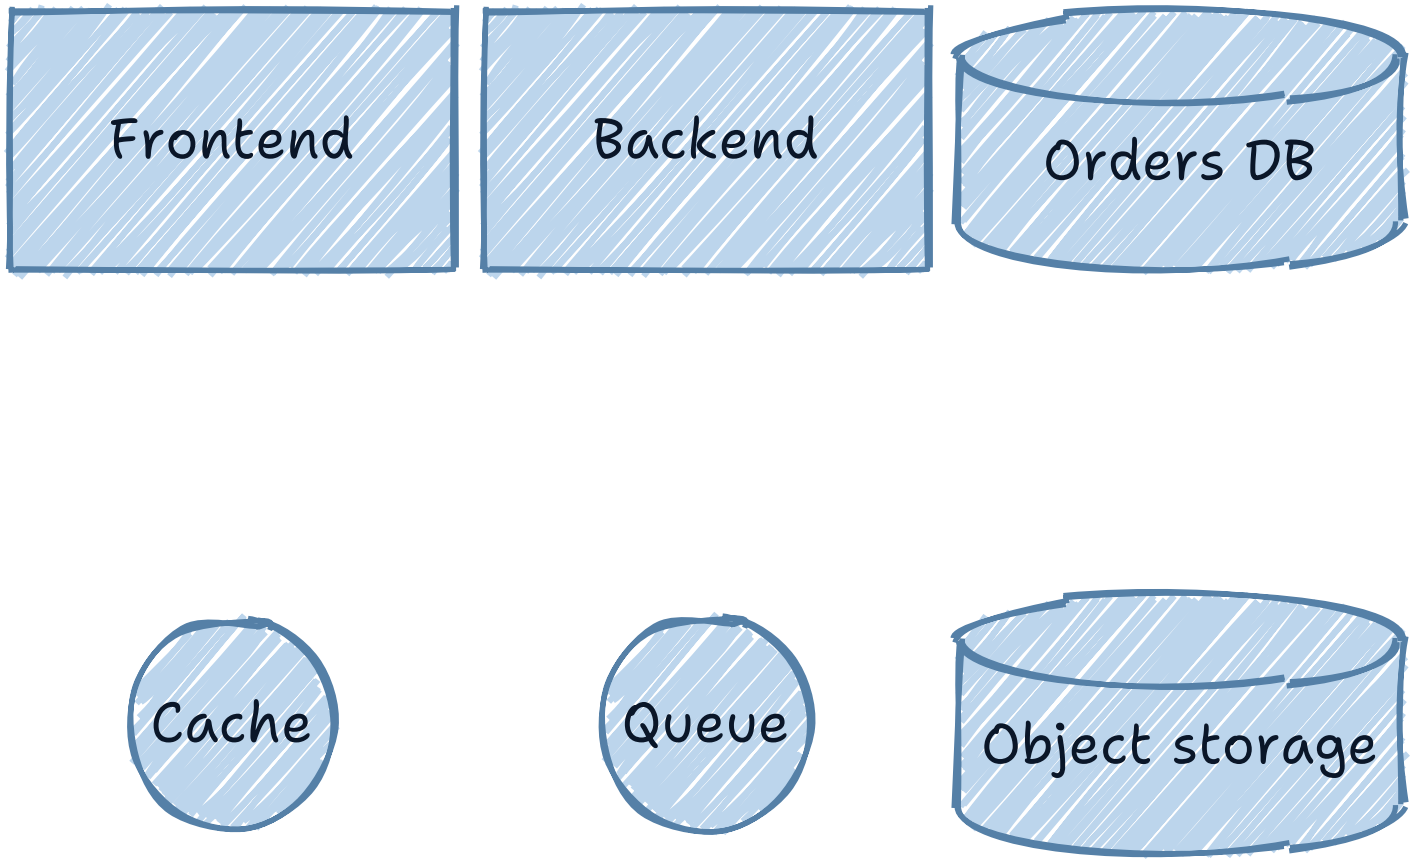

Short labels keep their snug boxes.

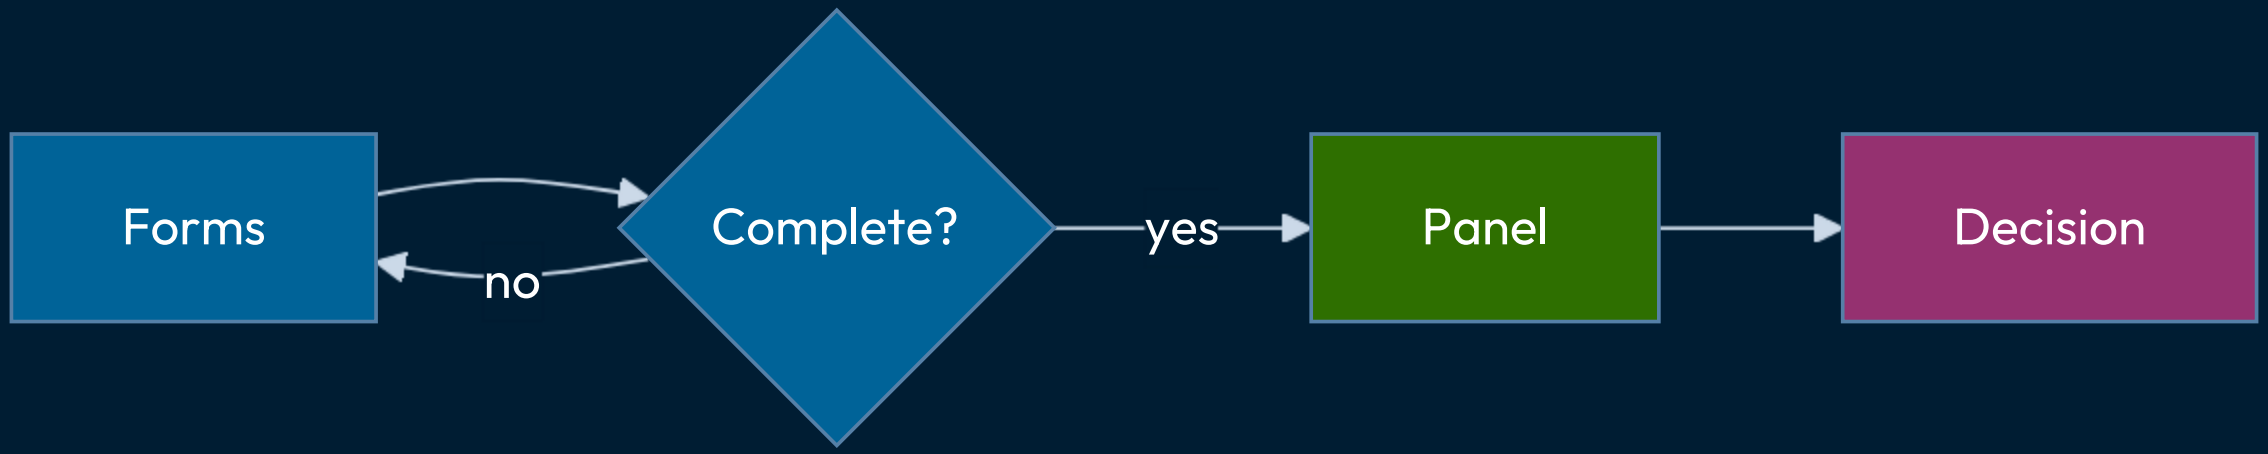

A mind map still fans out from its center.

A sketch slide now draws block diagrams by hand.

A dark slide keeps the palette.

Same diagrams, newer sanitizer

Mermaid 12.3 · Lattice theme
