Diagram · caption line

A caption right under a diagram

A line written straight under the closing fence renders as text with its formatting, in the CLI's PDF as in the Studio.

A caption under a plain fence

Each step has **one owner**.

A caption inside a quote

KEY INSIGHT

The team signs off in *three* steps.

A caption under a list item's diagram

- The release path:

  Tags are **signed**.

- The next item stays in the list.

With a blank line, as before

A blank line under the fence always worked; it still does.

What changed

- A caption line no longer joins the figure's HTML block
- Its bold and italics render instead of showing `**`
- Quotes and list items keep their caption inside them
