Feature demo · state markers

Circles, with a mark

A universal, color-blind-safe treatment for `[x]` `[-]` `[!]` `[?]` `[ ]` `[/]` — one answer each, one distinct shape each.

Six answers, six marks.

- Check — yes, done, met
- Dash — partly, qualified
- Cross — no, failed, not met
- Question — unknown, cannot say yet
- Open ring — not started, not assessed
- ~~Slash — does not apply, waived~~

KEY INSIGHT

The shape carries the meaning, so it parses in grayscale. The two unsettled answers are the hollow rings.

Theme- and canvas-aware.

- ✓ Scoring policy live across all pilot teams
- ✓ Decision Log audit trail readable by Auditor role
- − Examiner pack auto-generation — *open, see slide 27*
- ✗ Legacy export parity — *failed the pilot*
- ? Vendor SLA renewal — *terms not disclosed*
- ○ Multi-team calibration cadence — *Phase 2*
- / ~~Org-wide adoption — *deferred to Phase 3*~~

Same grammar inside verdict badges.

Build in-house.

✗ Certified · − Residency · ✗ Export

Full control of every axis, three engineer-quarters from having any of it.

Vendor North.

✓ Certified · ✓ Residency · − Export

Certified and in-region, but data export is support-gated.

Vendor West.

✓ Certified · ✓ Residency · ✓ Export

Certified, in-region, self-serve on every axis. Recommended.

And across a coverage matrix.

Variant — `checks-outline`.

- Editorial, low-ink: ring + status-color mark
- Best where the row has no tint behind it
- The cross keeps its red, in outline
- The question mark sits in the open ring
- Per-slide or per-deck, no markup change
- ~~Marks and colors never change — only the disc~~

Variant — `checks-bold`.

- Larger disc, heavier mark — reads across a room
- Knockout mark on a flat saturated fill
- Heavier cross for a failed row
- Heavier question mark in the ring
- Good for projection or a single hero checklist
- ~~Five variants ship; the default is Ringed Solid~~
