Charts · tower

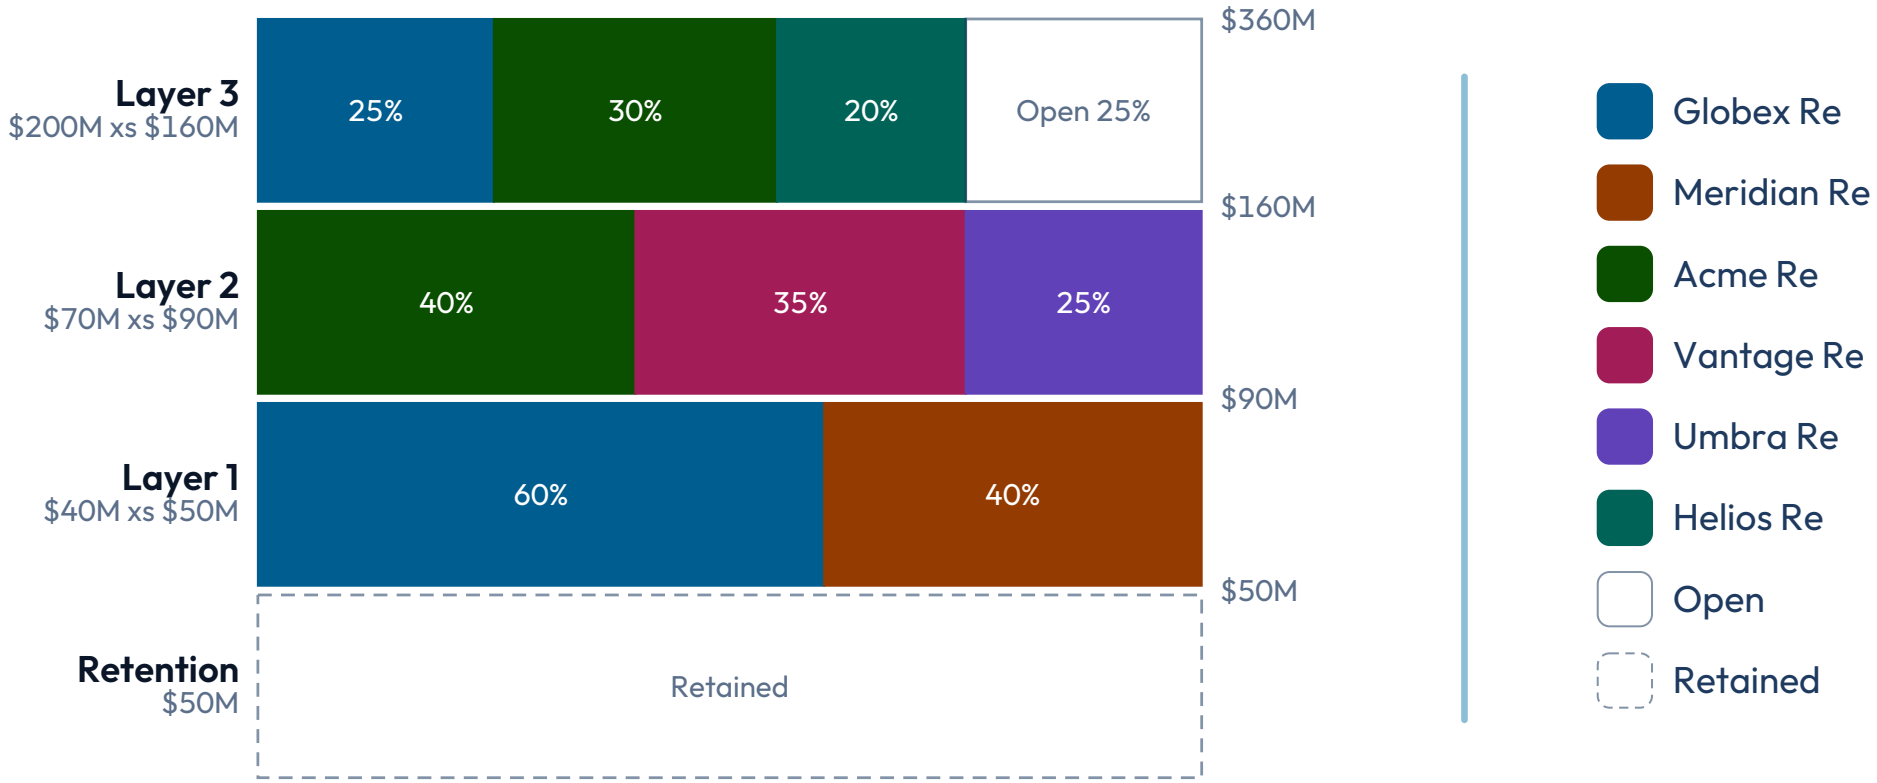

A reinsurance program, layer by layer

Write each layer as its limit in excess of its attachment, then list the reinsurers and their shares under it. The chart sorts the layers, keeps one color per reinsurer and shows what is still open.

Property catastrophe program · 2027

TOWER

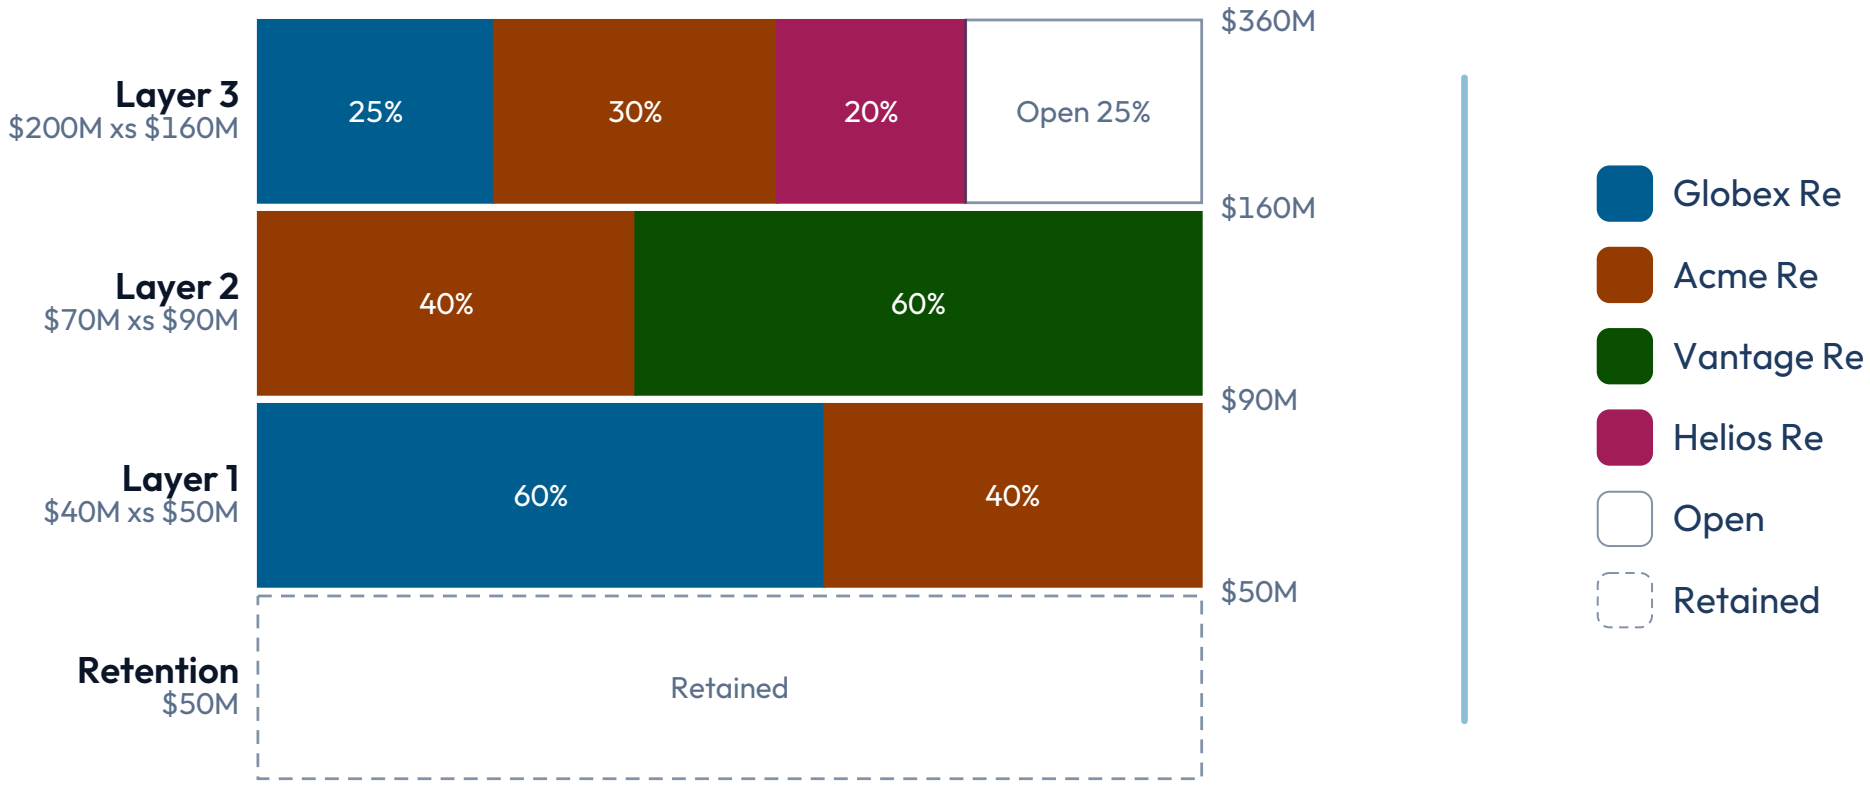

Six reinsurers carry $310M above a $50M retention.

Renewal status · November 12

TOWER

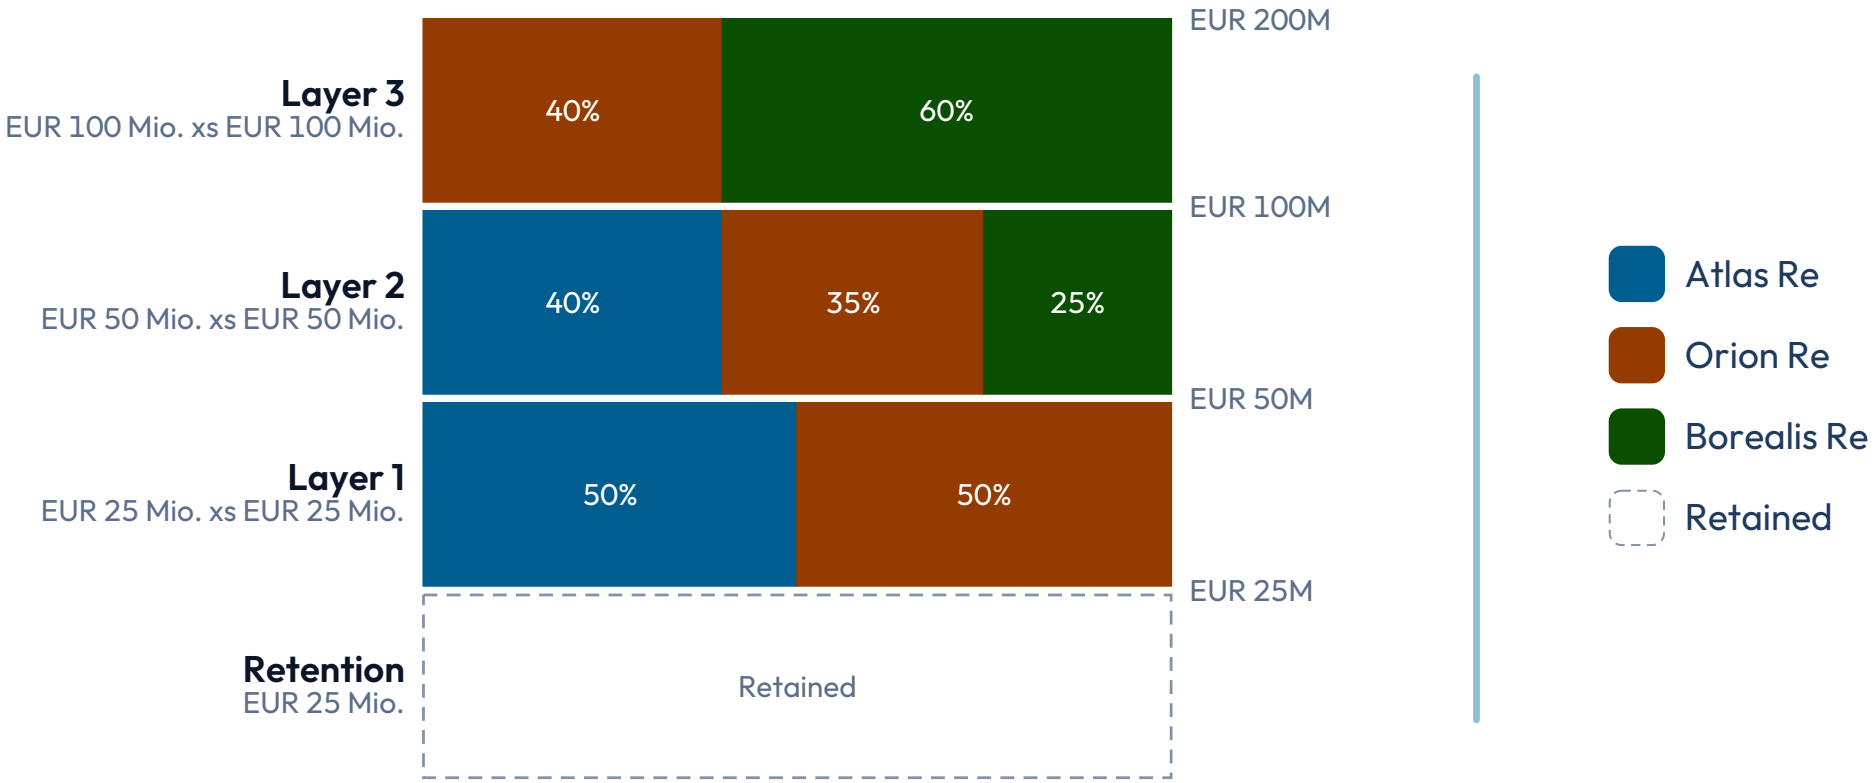

The top layer is 75% placed, with six weeks to go.

Casualty excess · EUR

TOWER

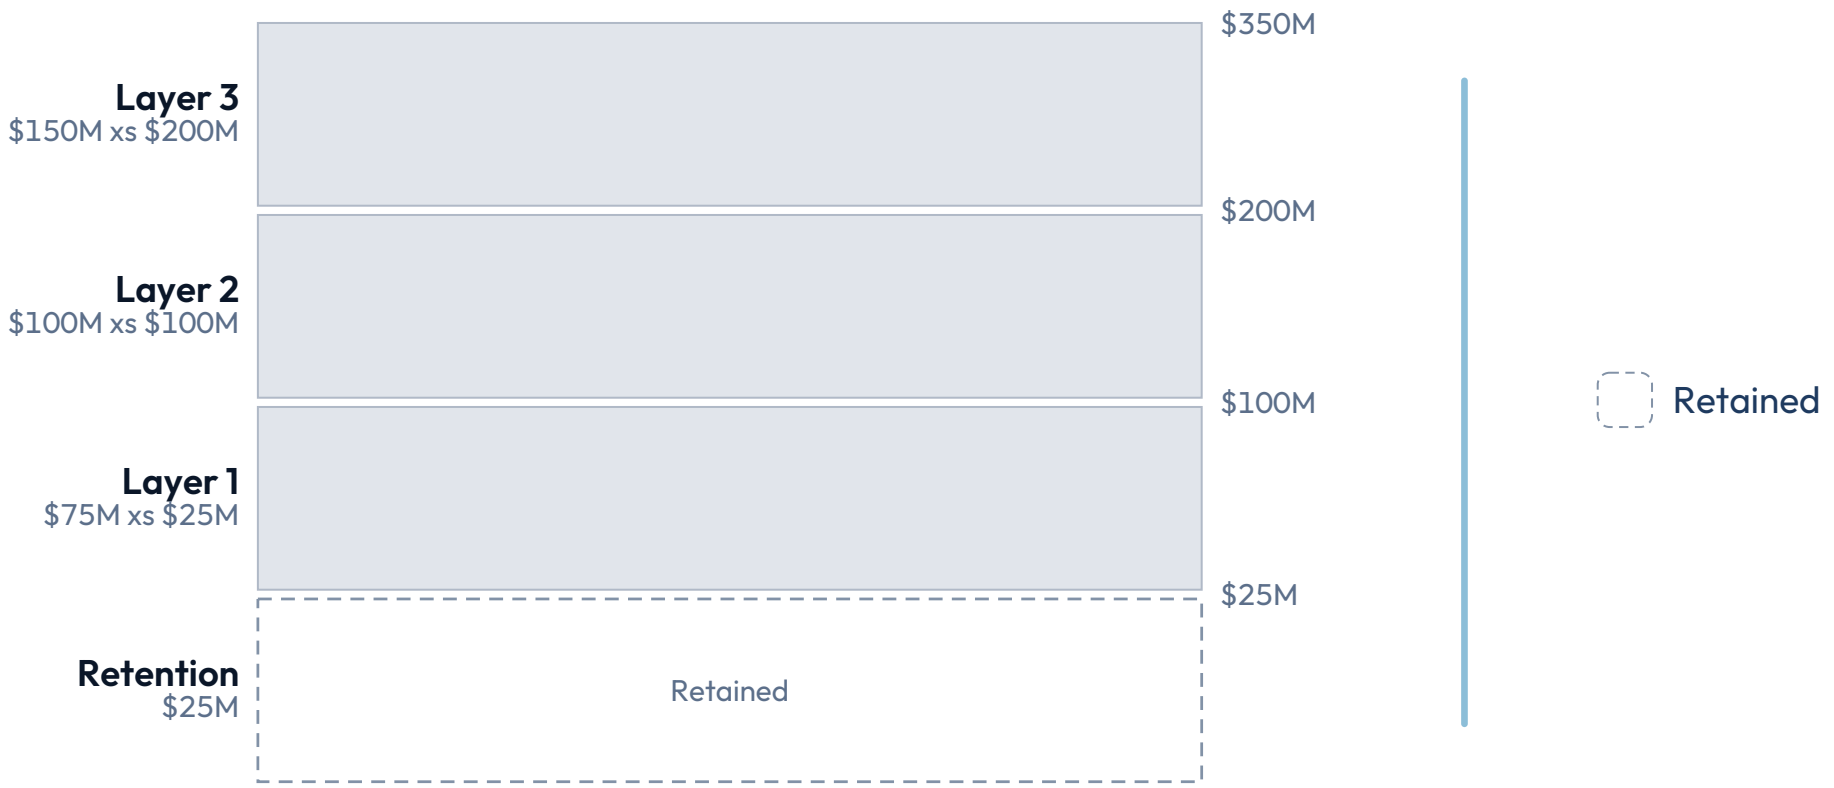

A European client's tower, written in its own currency.

Structure only

TOWER

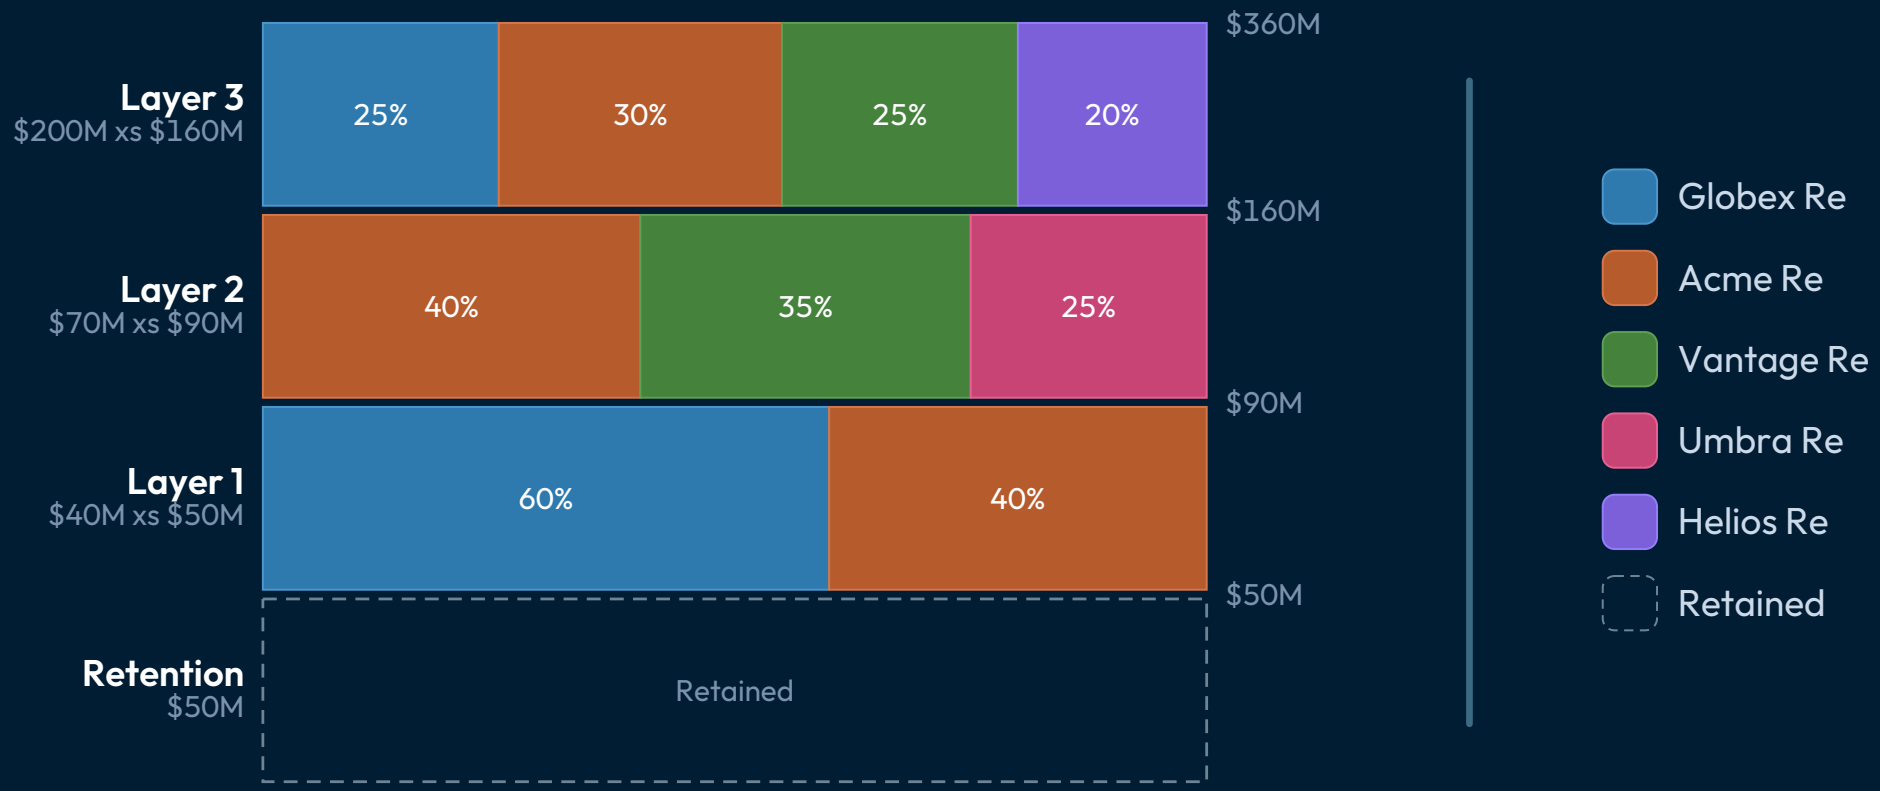

Before placement, a tower can show the layers alone.

Property catastrophe program · 2027

TOWER

Acme Re's line runs through every layer.

How to write a tower.

TOWER

- One bullet per layer: its name, then its size as `$40M xs $50M` (limit, then attachment). `x/s` and `excess of` work too.
- A size with no `xs` is the retention, the part the client keeps.
- Under each layer, one bullet per reinsurer with its share, such as `Acme Re 30%`. What is left over shows as Open.
- Layers are drawn at the same height so small bottom layers stay readable. Their sizes are printed beside them.
