Charts · waterfall

When a rise is bad news

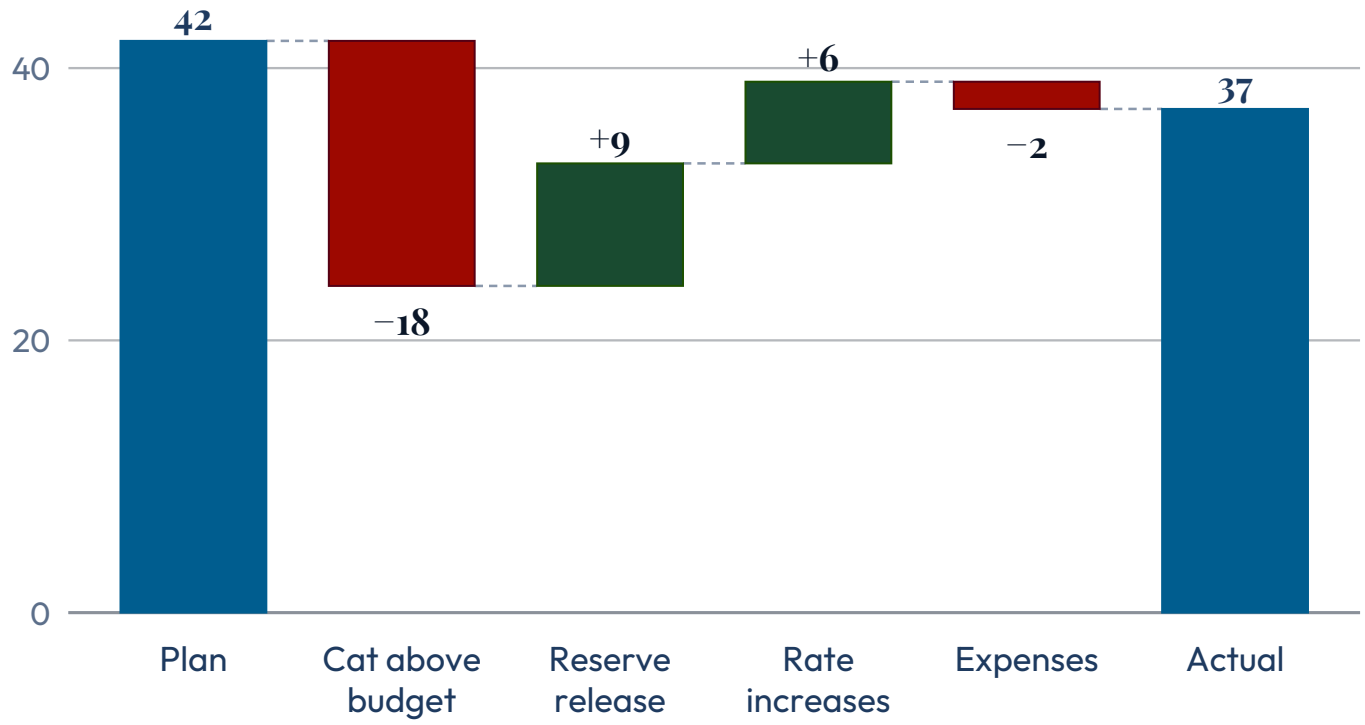

A waterfall paints a rise green and a fall red. For a loss ratio, claims or cost, that is backwards.

Add `lower-is-better` and the colors follow the meaning.

Underwriting result · default

LOWER IS BETTER

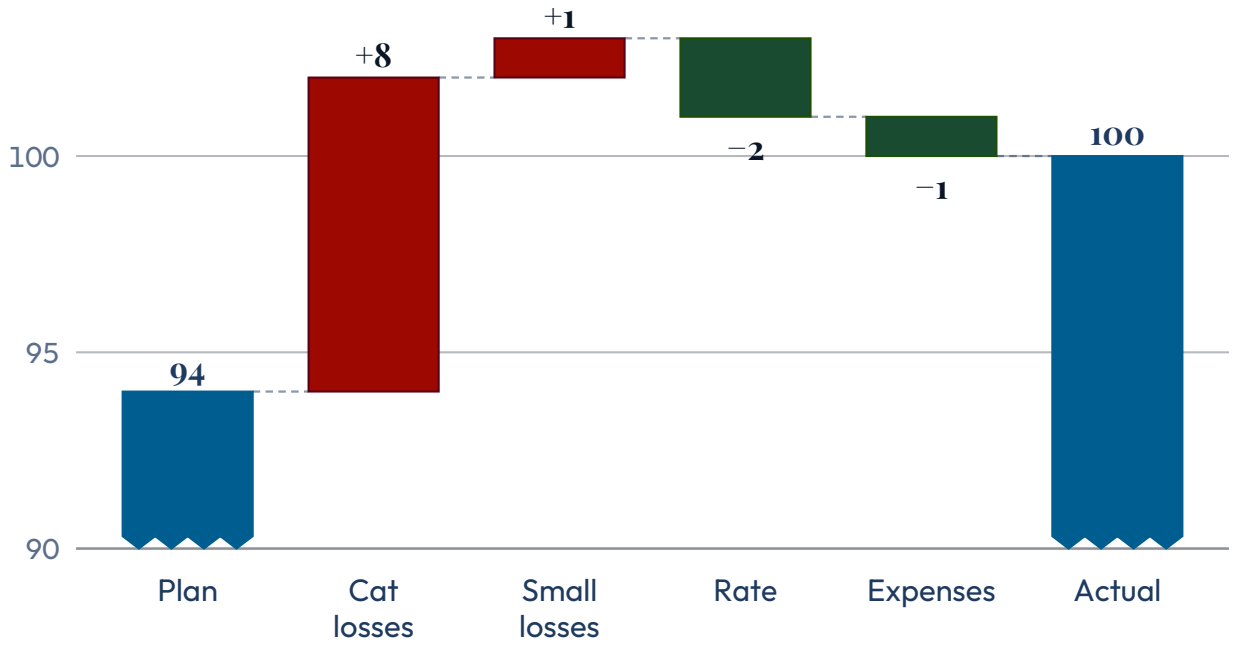

Higher is better here, so a rise is green.

Combined ratio · %

LOWER IS BETTER

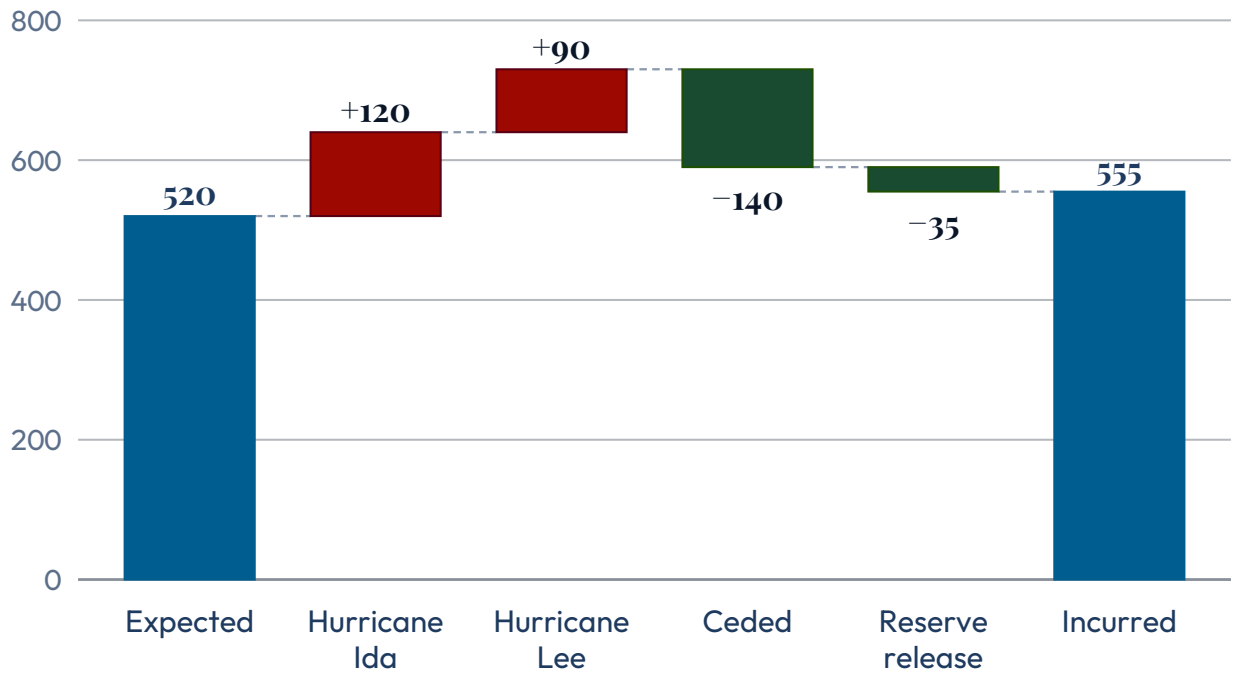

Cat losses pushed the combined ratio 6 points above plan.

Incurred claims · USD M

LOWER IS BETTER

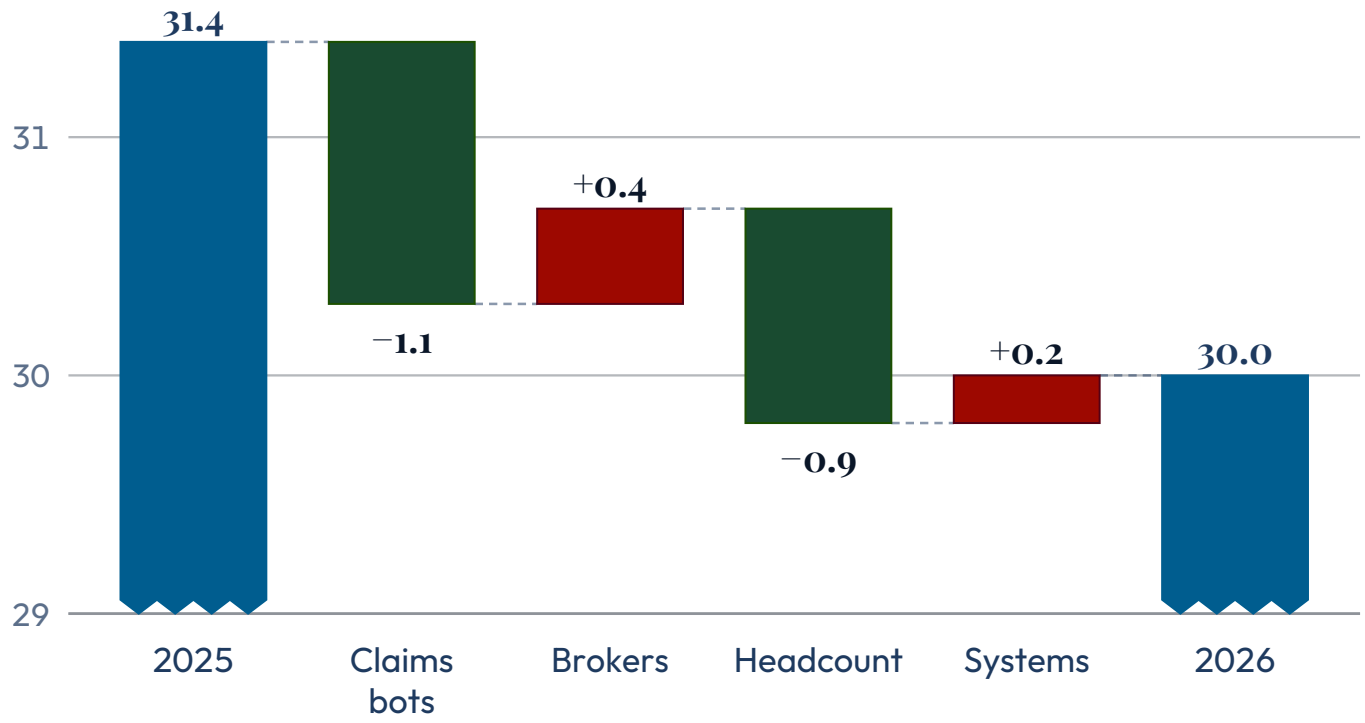

Two hurricanes added $210M of claims; reinsurance took back $140M.

Expense ratio · %

LOWER IS BETTER

Automation cut the expense ratio by 1.4 points.

Customer churn · % of policies

LOWER IS BETTER

Churn ended the year below plan, despite the price rise.

What changes and what does not.

LOWER IS BETTER

- The colors swap: a rise wears the fail hue and a fall wears pass, in every finish and theme.
- The direction stays: bars still climb and fall, labels keep their signs, and print textures still mark up and down.
- Write it as `<!-- _class: waterfall lower-is-better -->`; it combines with `zoom`.
