Statement · Panel · Structure

contact

An identity card that encodes a vCard: name, title and contact lines beside a QR that saves the presenter to a phone.

THE QR ENCODES THIS CARD AS A VCARD

When NOT to reach for contact.

Not a team roster

One card is one person. For a set of people use an inventory layout; a contact card is a single identity.

Don't bold the field values

The value leads and the key trails as a small tag — name last, never first. Writing the key first, bolded, breaks the transform's postfix read.
