Statement · Panel · Structure

wifi

A network join card: readable Wi-Fi credentials beside a QR a phone scans to connect in one tap.

ONE SCAN CONNECTS THE ROOM

CONNECT · WIFI

The credentials you can read, the QR joins for you.

When NOT to reach for wifi.

Not for secrets that outlive the room

A rendered deck is persistent and shareable. Use it for guest/offsite networks, not for credentials that must not leak.

Don't bold the field values

The value leads and the key trails as a small tag — ssid last, never first. Writing the key first, bolded, breaks the transform's postfix read.
