glossary

Two-column term/definition table with auto-derived alphabetic range pill.

Glossary

C – S

TERM	DEFINITION
Component	A slide layout with a manifest, styles, and docs.
Variant	A named modifier that changes one layout decision.
Modifier	A universal class — dark, compact, accent — any layout accepts.
Stress test	The slide that shows a layout's upper limit.

Glossary, at capacity

B – W

TERM	DEFINITION
Bucket	One of thirteen functional families a component lives in; the bucket gallery surveys its members.
Capacity	How many elements a layout seats before it overflows — sweet, soft, and hard marks.
Caption channel	The footer sentence that carries the lesson.
Density budget	The soft and hard word counts a sample element may spend, enforced by the contract test.
Ledger	The named debt list that tracks migration honestly.
Manifest	The JSON file that owns a component's samples, variants, budgets, and docs.
Specimen voice	Gallery copy that teaches the layout by describing it.
Walk order	The fixed slide sequence every gallery follows.

When NOT to reach for glossary.

Multi-sentence definitions

Each entry is one short line. If a definition needs context or examples, the term deserves its own slide — use a divider (light variant) with the term as the heading.

Mixed term lengths

If some terms are single words and others are full phrases, the left column gets ragged. Trim long terms to their canonical short form.

Hand-written range pill

The runtime derives the range pill (e.g. "A – G") from the entries. Authoring it into the heading double-stamps it.
