cards: center · stretch · top · spread

Every card component now puts its spare height where the author says

Rows, grids, stacked columns and centered blocks all follow the one register, and each component declares its own default in its manifest.

The stack ranks three cards top to bottom.

Order is the argument.

The stack reads as priority; the top card wins.

Three is the sweet spot.

Bodies run a short paragraph at most.

Sixteen words per card.

The budget that keeps rows breathing.

DECIDE

The banner carries the stance; the body carries the reason.

RECORD

Use when the slide is the decision log's public face.

Three tiers, one recommended column.

Starter

$0

- The checklist rows compare
- A dash marks a capped limit
- ~~Slashed rows mean not included~~

One line positions the tier.

MOST POPULAR

Growth

$49 / mo

- The starred tier gets the accent
- Checks accumulate up the ladder
- ~~One gap keeps it honest~~

The column buyers should read first.

Enterprise

Custom

- The top tier checks every row
- Custom replaces a number
- Nothing slashed up here

The ceiling of the ladder.
