A pasted European number plots at its own value

`1.234,5` is one thousand two hundred thirty-four and a half, on every chart

Revenue · FY26 · € thousand

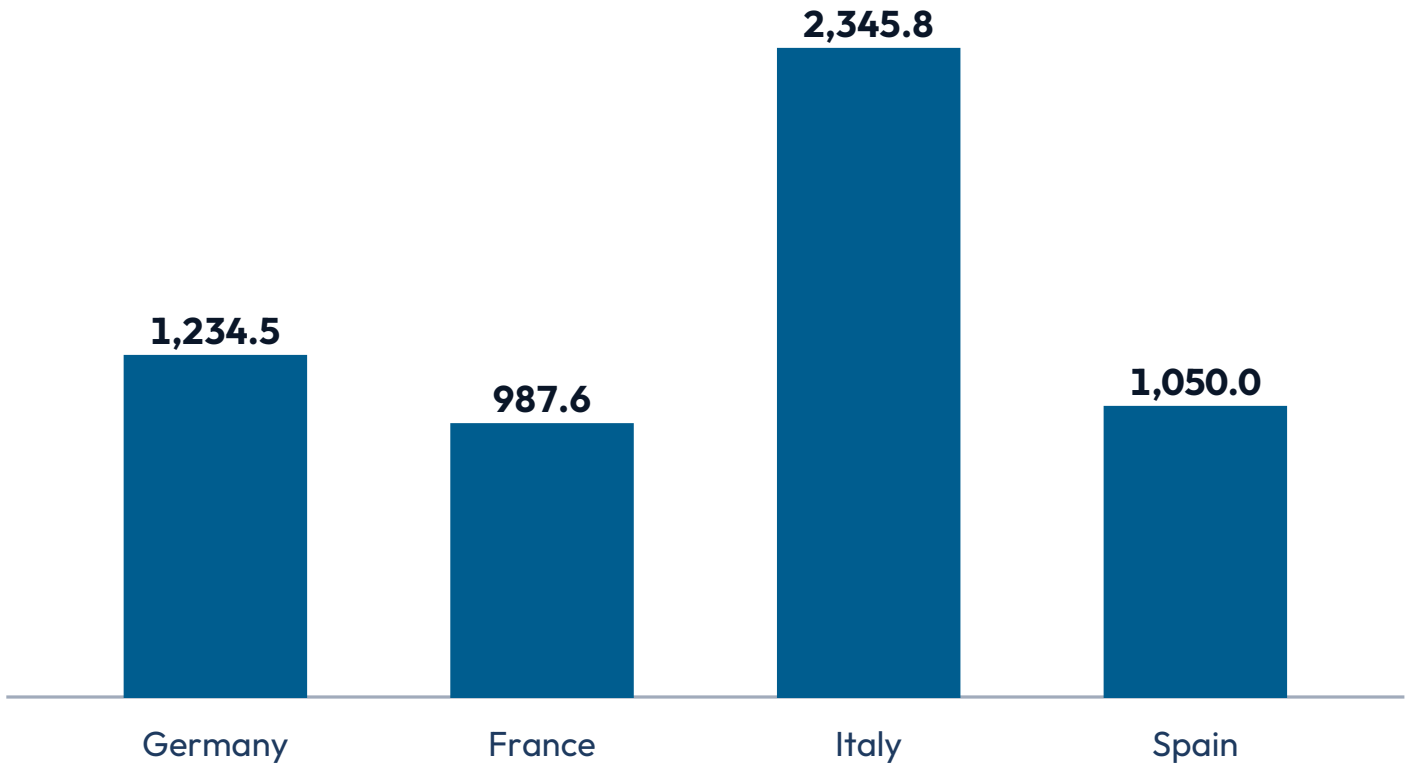

The European spelling draws the same bars as the US one.

A European number plots at its own value

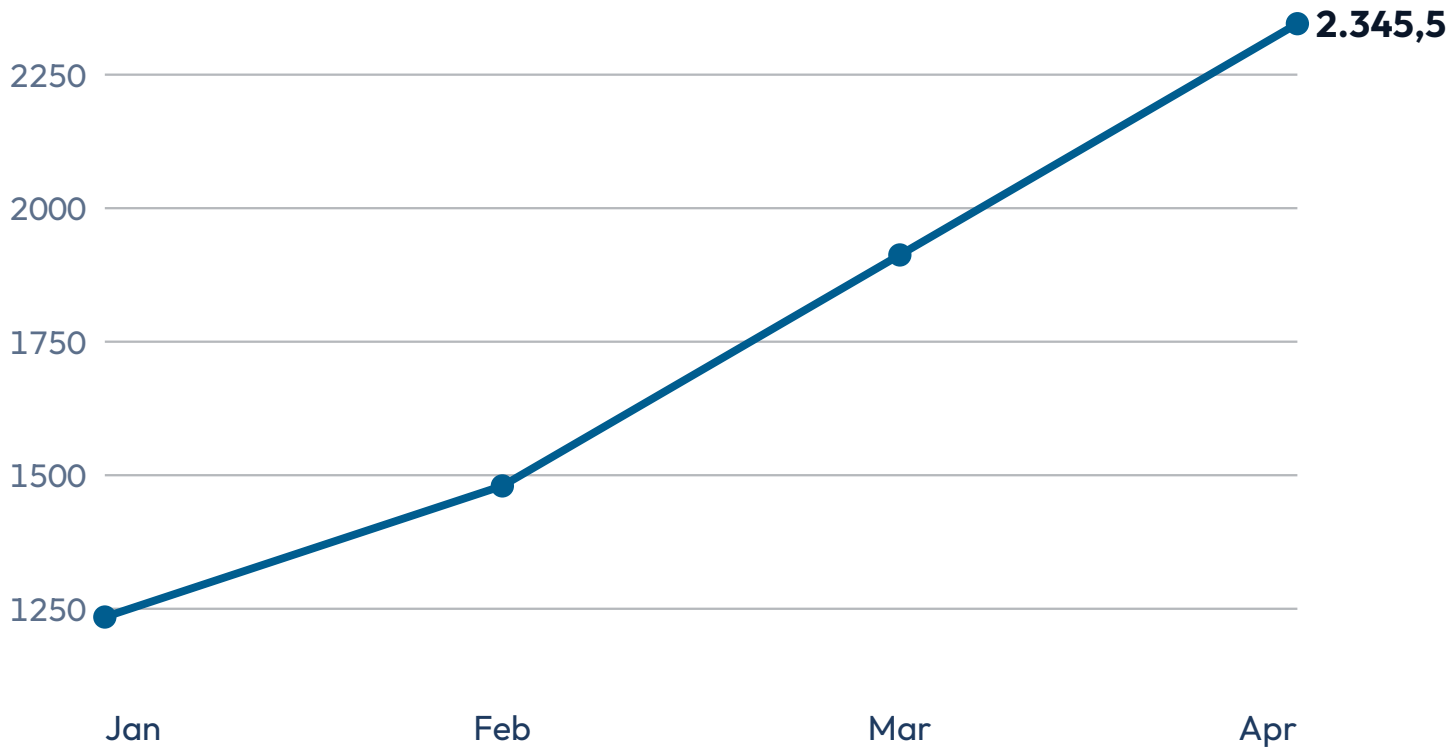

Revenue · FY26 · € thousand

The US spelling of the same numbers, for comparison.

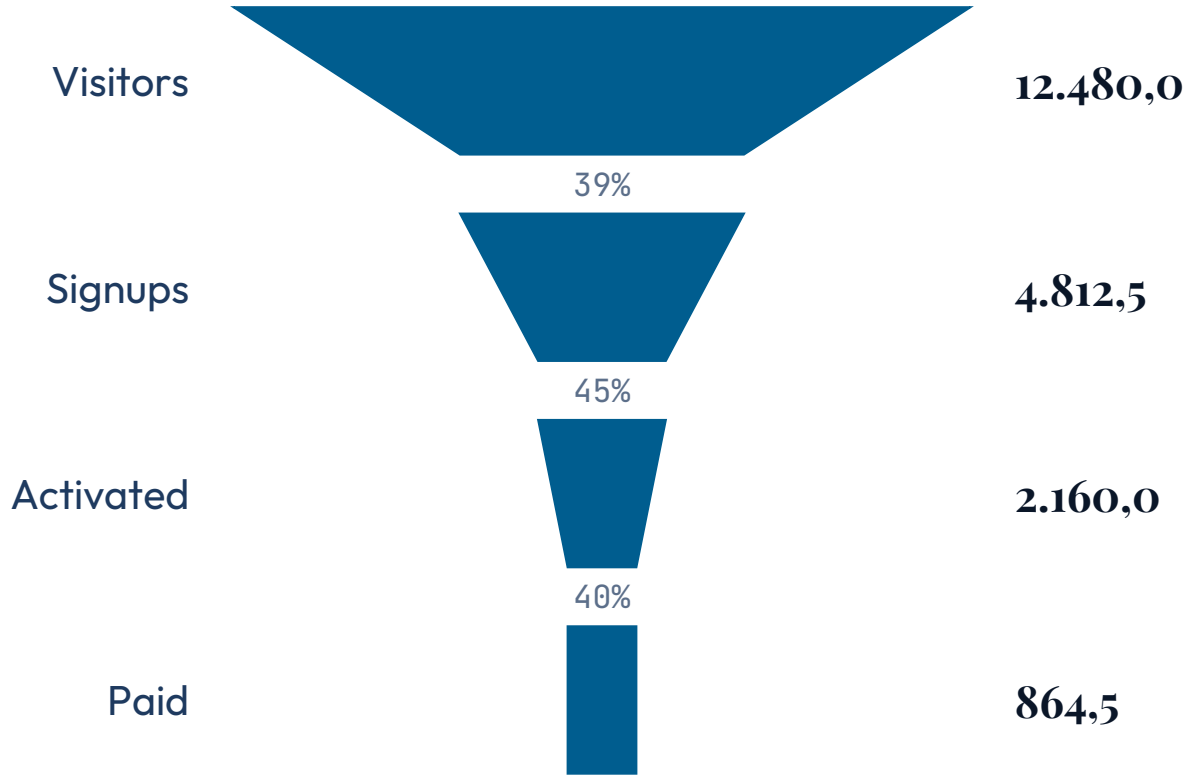

Monthly active teams

A line reads, and narrates, the rise it draws.

A European number plots at its own value

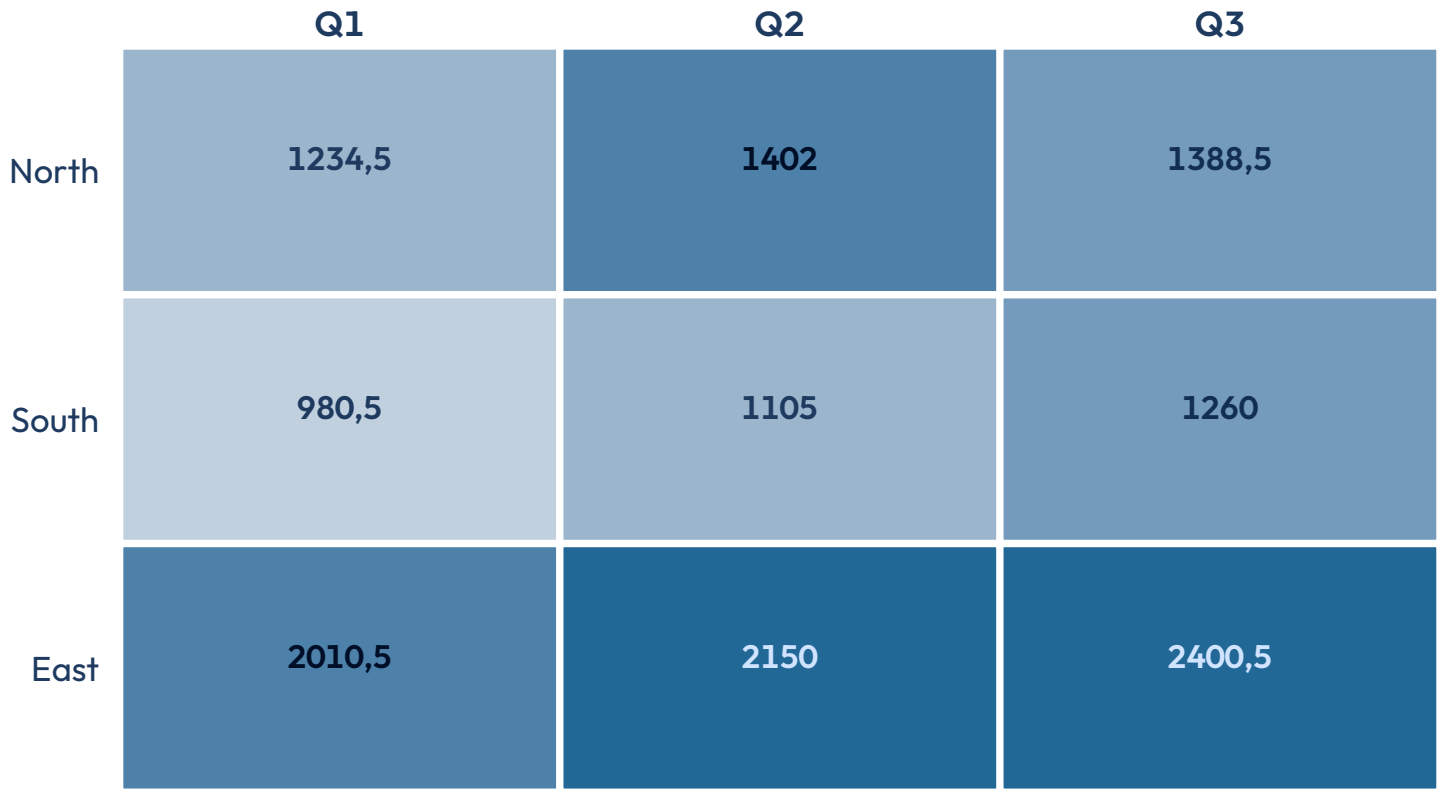

Each stage is its own value, grouped with dots.

A European number plots at its own value

Orders per region · thousand

Table cells read the same rule as list rows.

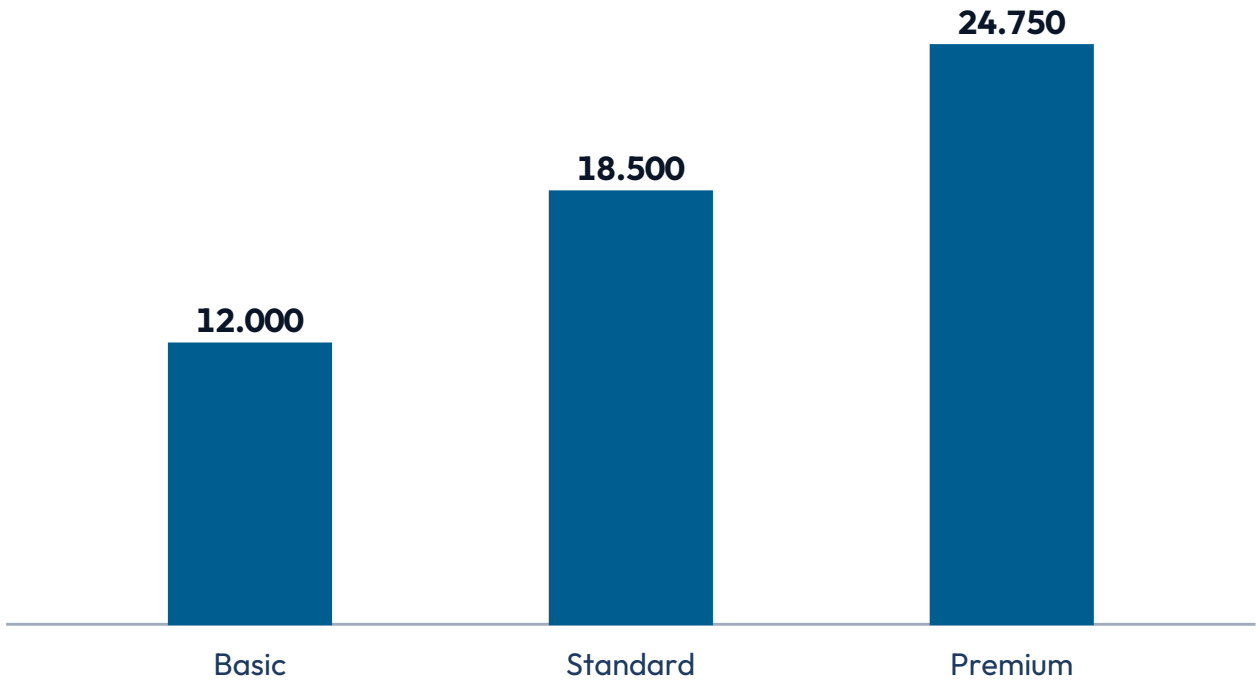

A European number plots at its own value

Unit price · €

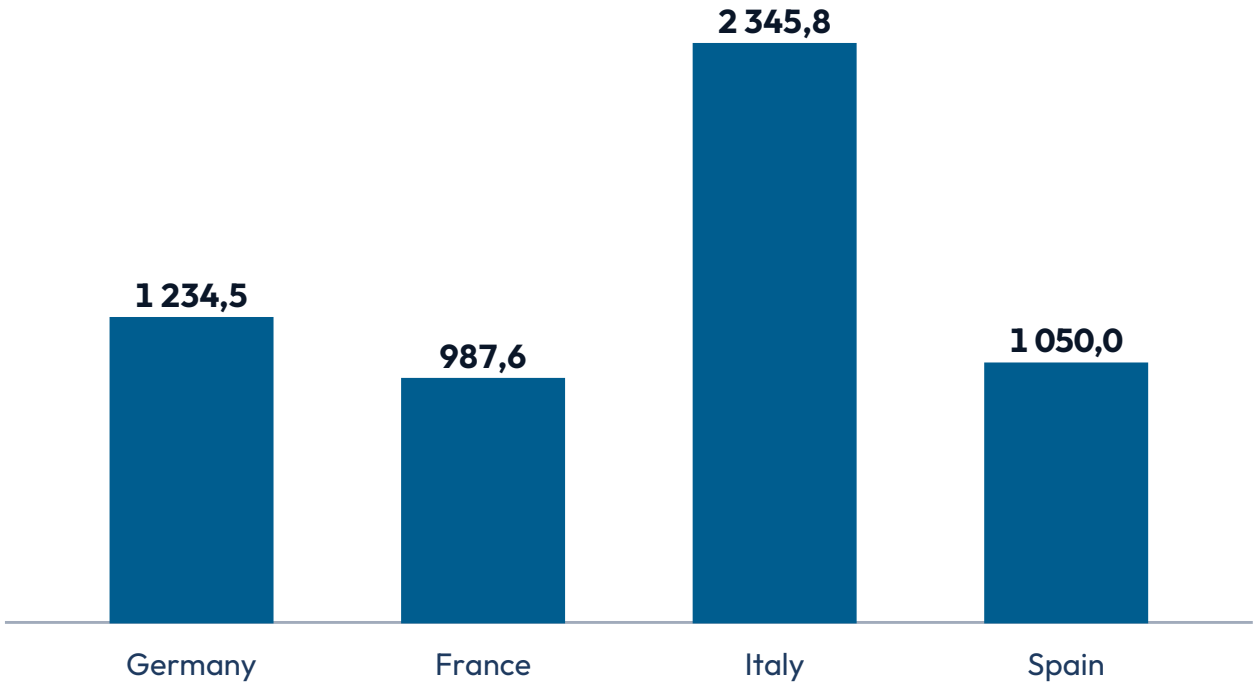

A lone dot group is still read the US way, as a decimal.

`12.000` *plots as 12. For twelve thousand, write* `12 000` *with a space, or a magnitude:* `12k`.

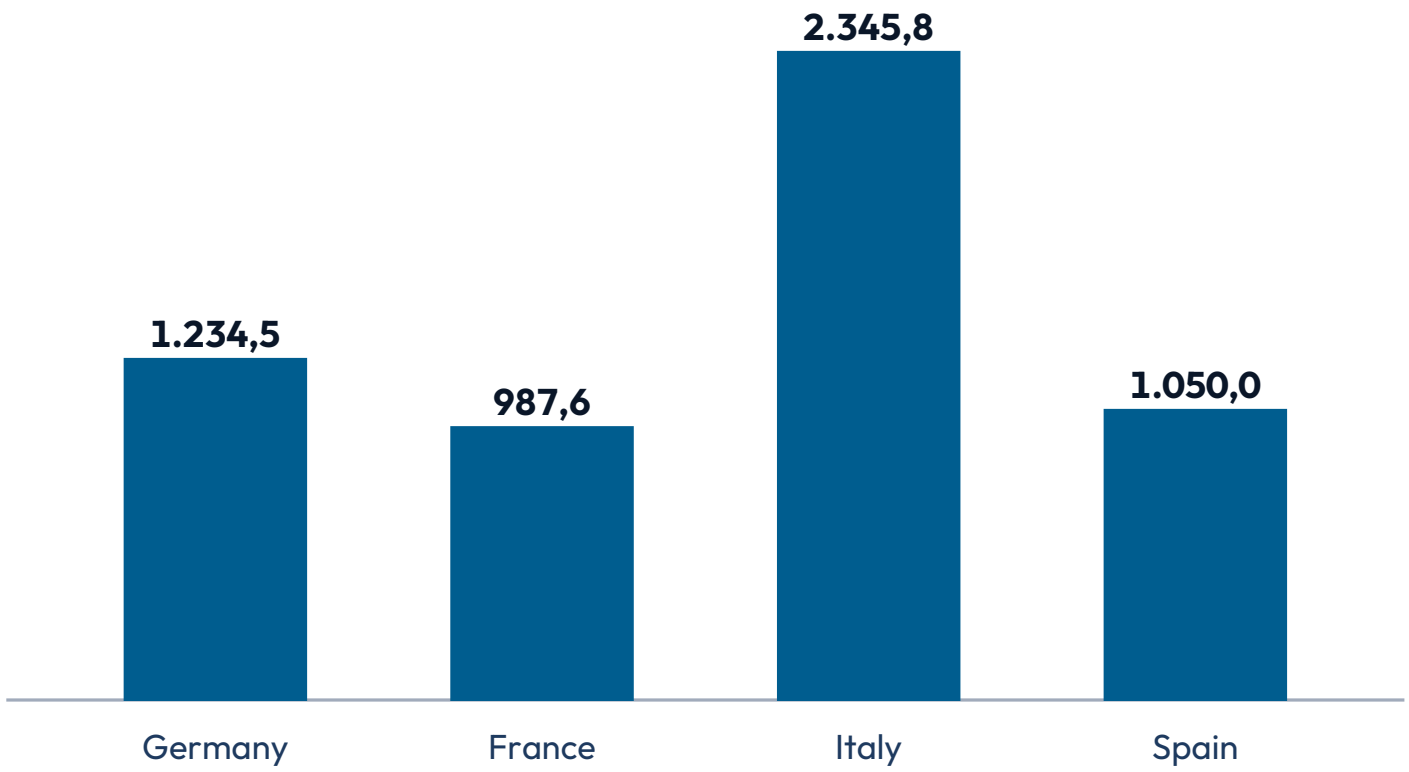

Revenue · FY26 · € thousand

A space between thousands groups is the ISO spelling, and it reads too.

Revenue · FY26 · € thousand

A quote under a row is that bar's description.
