Charts · histogram

How a quantity is spread, band by band

Write each band as a range, `$1M..$10M`, and its share. Bars touch because the bands join end to end, and each bar's area is its share, so bands of different widths draw honestly.

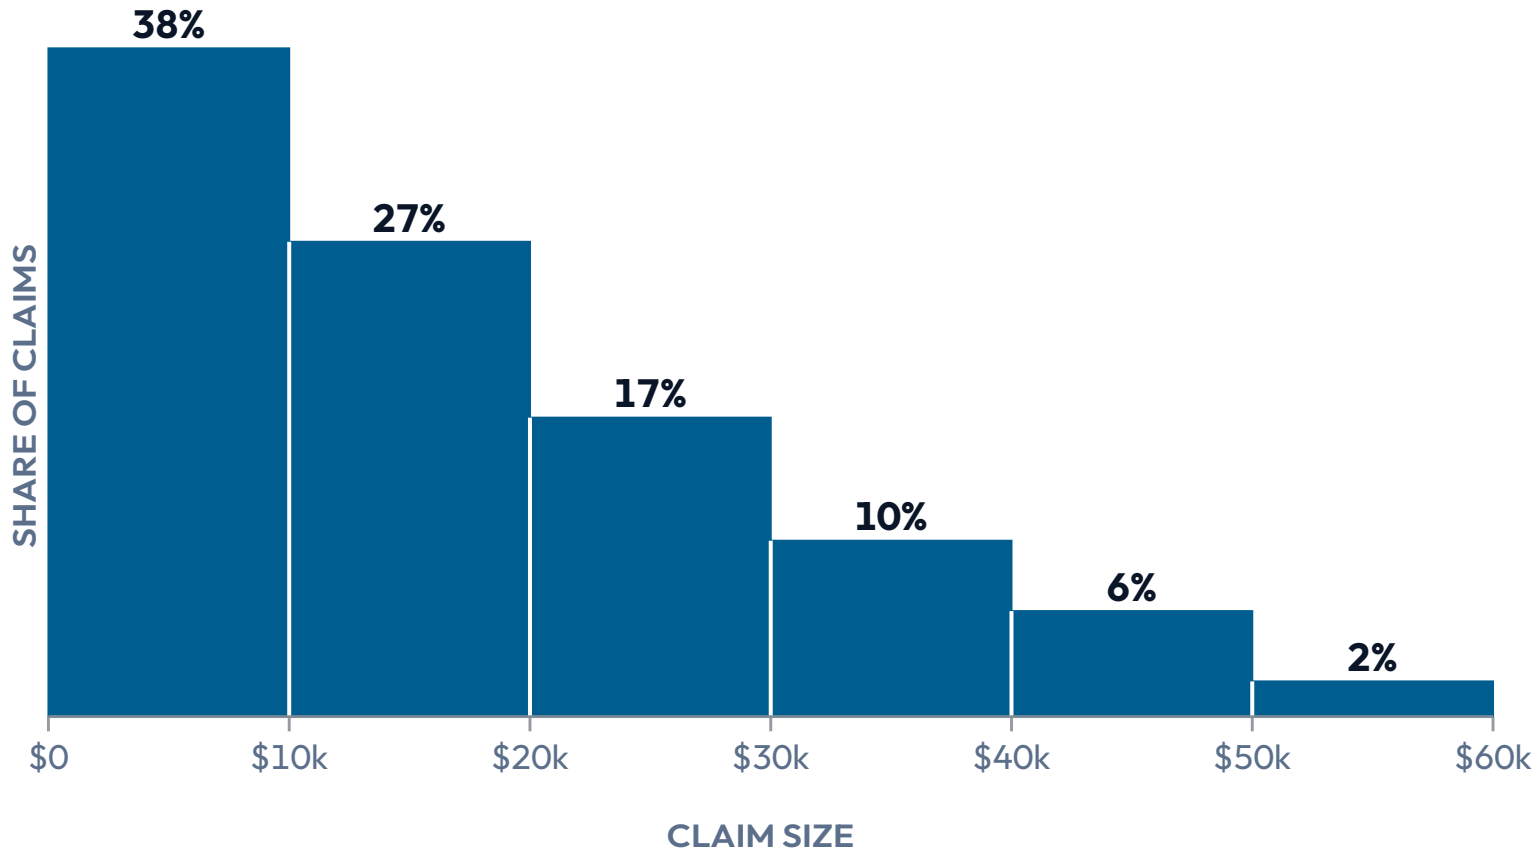

Most years stay under $10M; one in thirty tops $100M.

HISTOGRAM

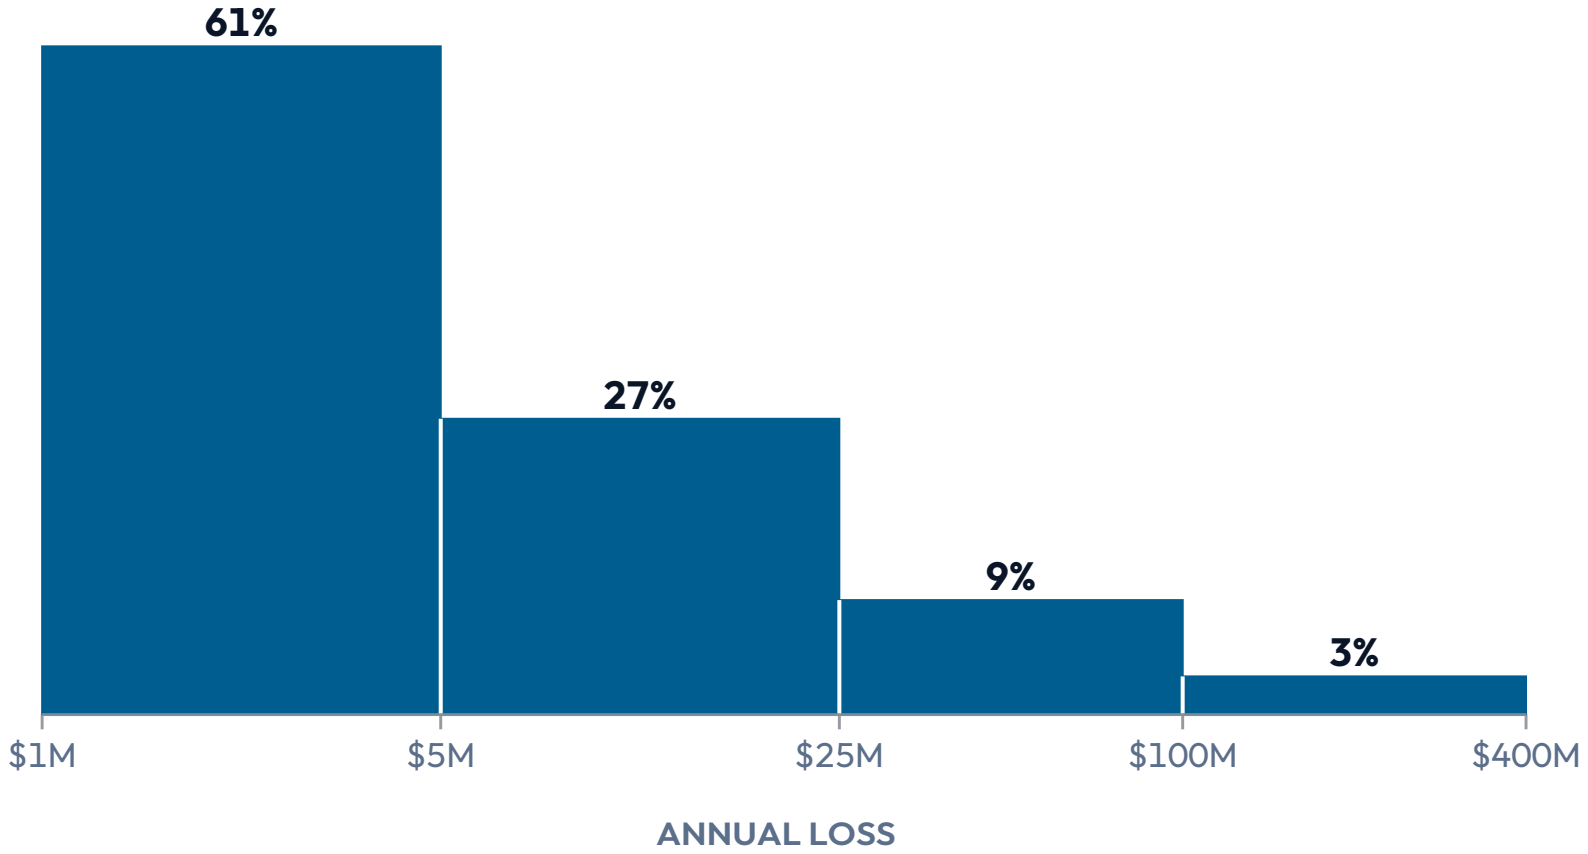

Two in three claims settle under $20k.

HISTOGRAM

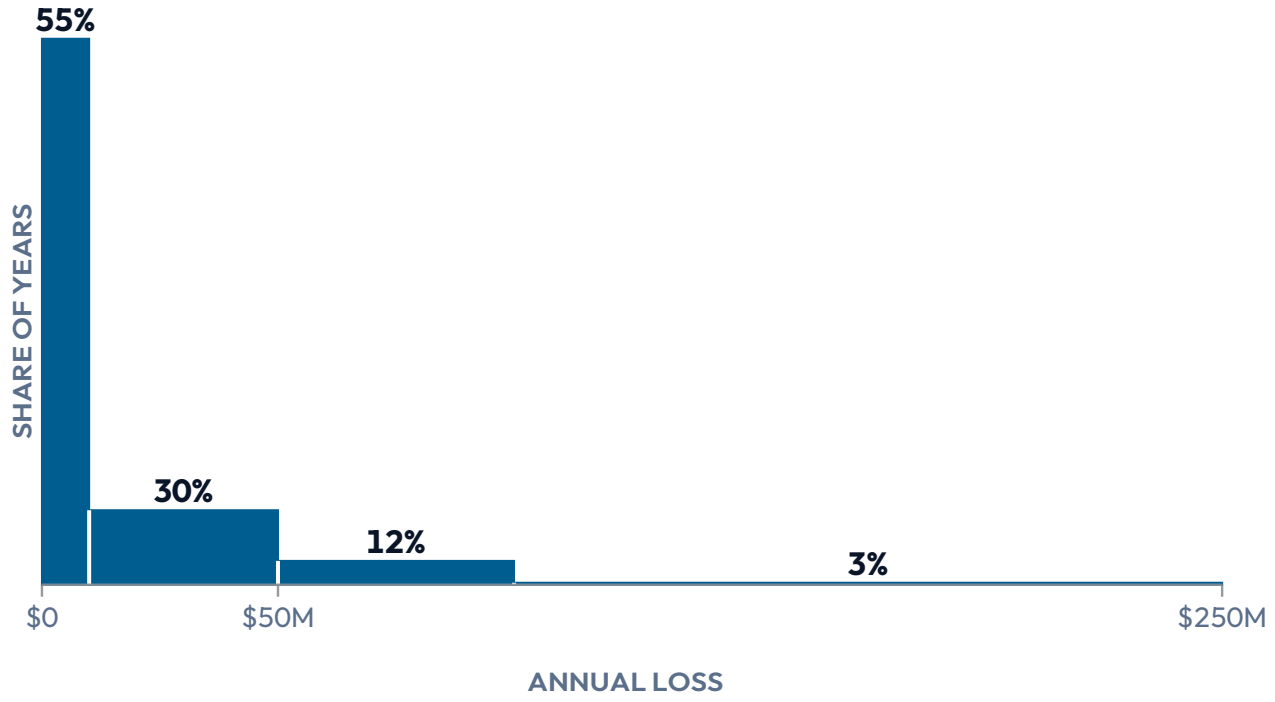

Named bands keep the market's words.

HISTOGRAM

Unequal bands on a linear axis: the wide tail flattens.

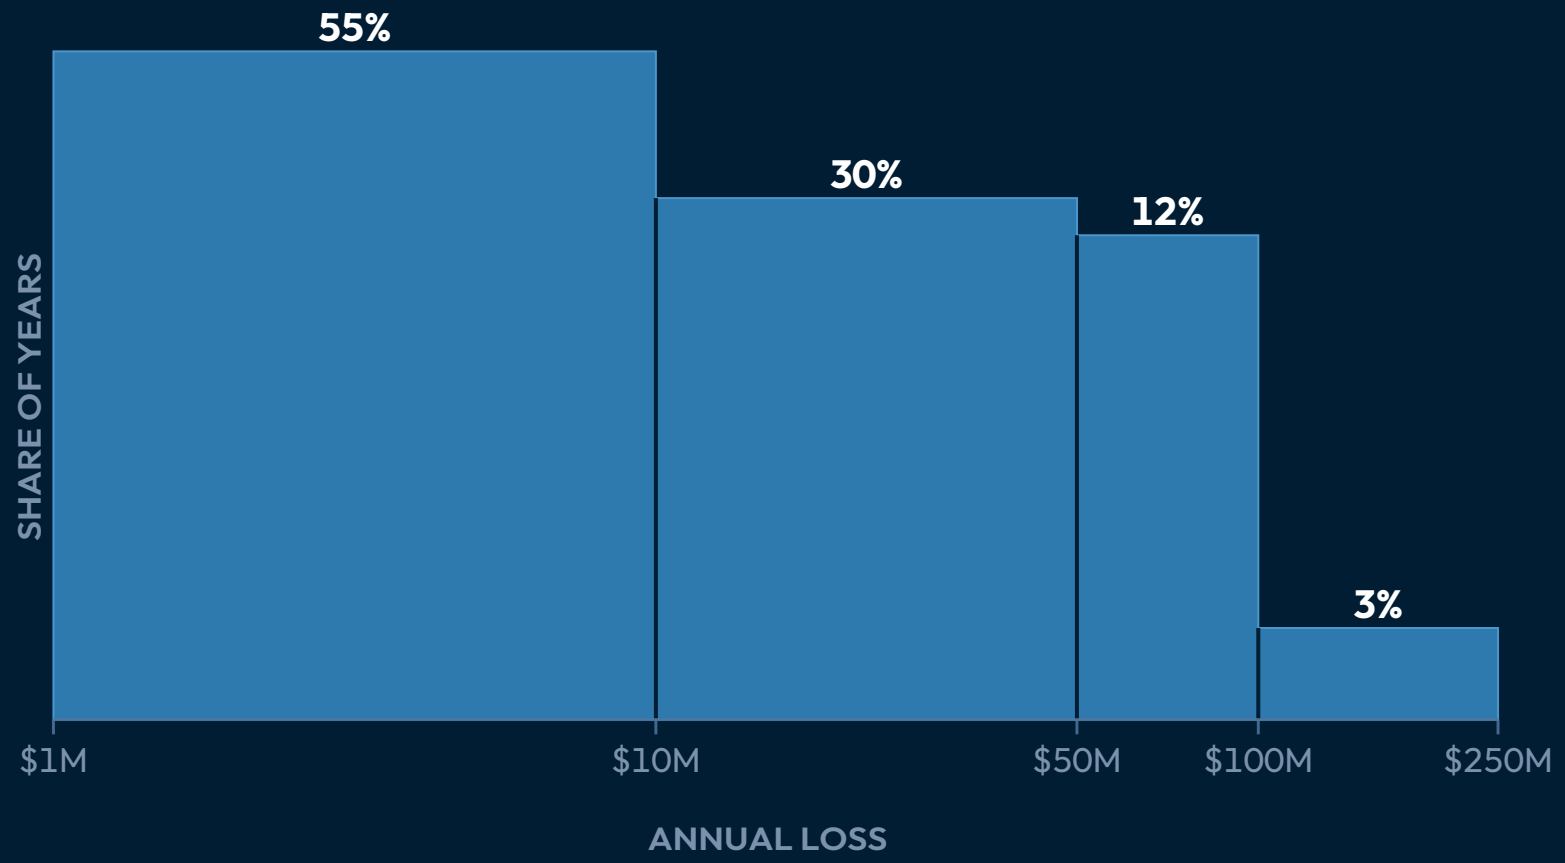

HISTOGRAM

Add `log` to the axis line when the bands widen toward the tail, as on slide 2.

The same distribution, dark.

HISTOGRAM

Twelve bands, a long thin tail.
