Lattice · inline sparks

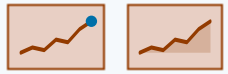

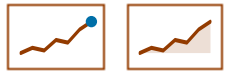

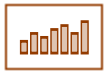

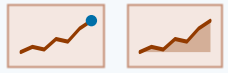

A spark is a chart the size of a word.

Written like a pill, drawn like a chart, and it goes wherever text goes.

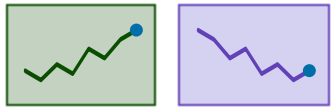

Seven types, three sizes, one grammar.

TYPE	WRITTEN AS	SM	MD	LG
line	`~{…}`			
area	`area`			
bar	`bar`			
step	`step`			
win–loss	`winloss`			
ring · bullet	`~{72%}` · `~{72/80, bullet}`			

One color, three looks: pigment fills, etch draws, tone steps.

LOOK	LINE AND AREA	BARS	RING	BULLET
`pigment`, the default				
`etch`				
`tone`				
`tone`, no color (`c1`)				

Every spark is framed, and the frame is yours to set.

MODIFIER	EFFECT	SPARK
`end` `minmax`	dot the latest value; the low and the high	
`c3` `c5`	a categorical color slot	
default	a squared 3:2 frame, a step taller than a pill	
`rounded`	the theme's small radius	
`bare`	no frame, just ink	
negatives	zero line appears when data crosses it	

On a prose slide, `spark-bare` keeps the lines even.

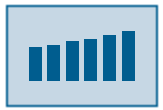

Weekly signups climbed from 1,200 to 2,050  over eight weeks, while churn held flat  .

- Sprint outcomes this quarter  — six hits, two misses.
- Onboarding completion  against a goal of 80.
- Headcount by month  — three hiring waves.

In a table, every row's trend reads at a glance.

REGION	Q3 REVENUE	LAST 8 QUARTERS	PLAN
North America	$4.2M		
Europe	$2.8M		
Asia Pacific	$1.9M		
Latin America	$0.6M		

A line shows shape; `zero` shows size.

SERIES	DEFAULT: LOW TO HIGH	WITH `ZERO`
Churn, 4–5% for eight weeks		
Uptime, 99.2–99.9%		
Revenue, $1.6B–$2.4B		
Bars always start at zero		—

Revenue ahead of plan; margin and cash both expanded.

In a sketch deck, sparks are drawn by hand too.

LOOK	LINE	BARS	RING	BULLET
pigment				
etch				
tone				

A broken spark stays code, and lint:deck says why.

WRITTEN	WHAT `LINT:DECK` REPORTS
`~{1,200 1,450}`	`1,200` is not a number: no units, commas or currency signs
`~{72%, bar}`	a bar needs a series of two or more numbers, not one value
`~{3 5 4, bar, end}`	`end` only goes on line, area and step, not bar
`~{3 5 4, c13}`	`c13` is past the limit — this takes `c1`–`c12`
