Diagram · vendored Mermaid 11.14 to 11.17

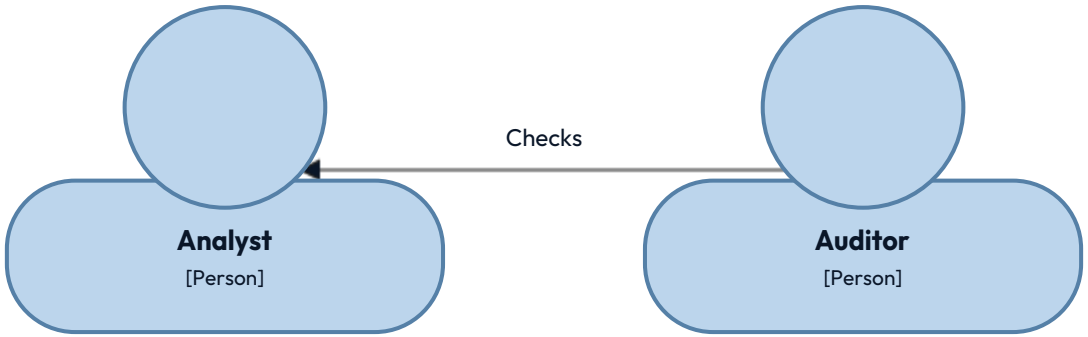

Mermaid 11.17 in the deck palette

The vendored Mermaid moved up a minor, which brings its label sanitizer from DOMPurify 3.3.1 to 3.4.12. The next pages show what changed on the slide.

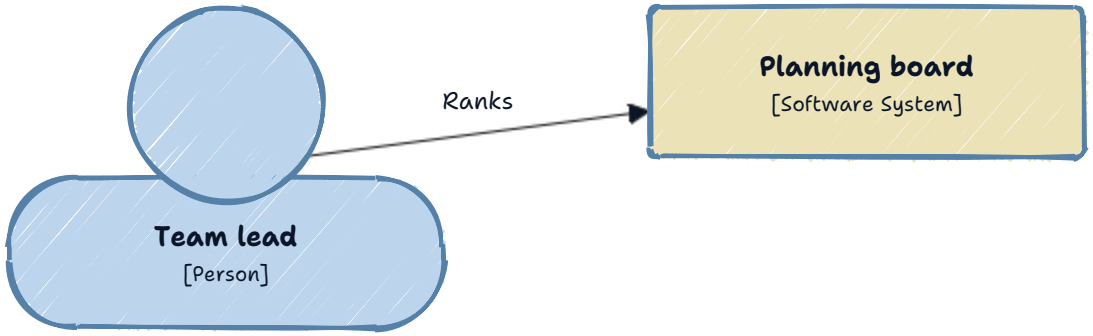

A C4 context diagram keeps the deck's colors.

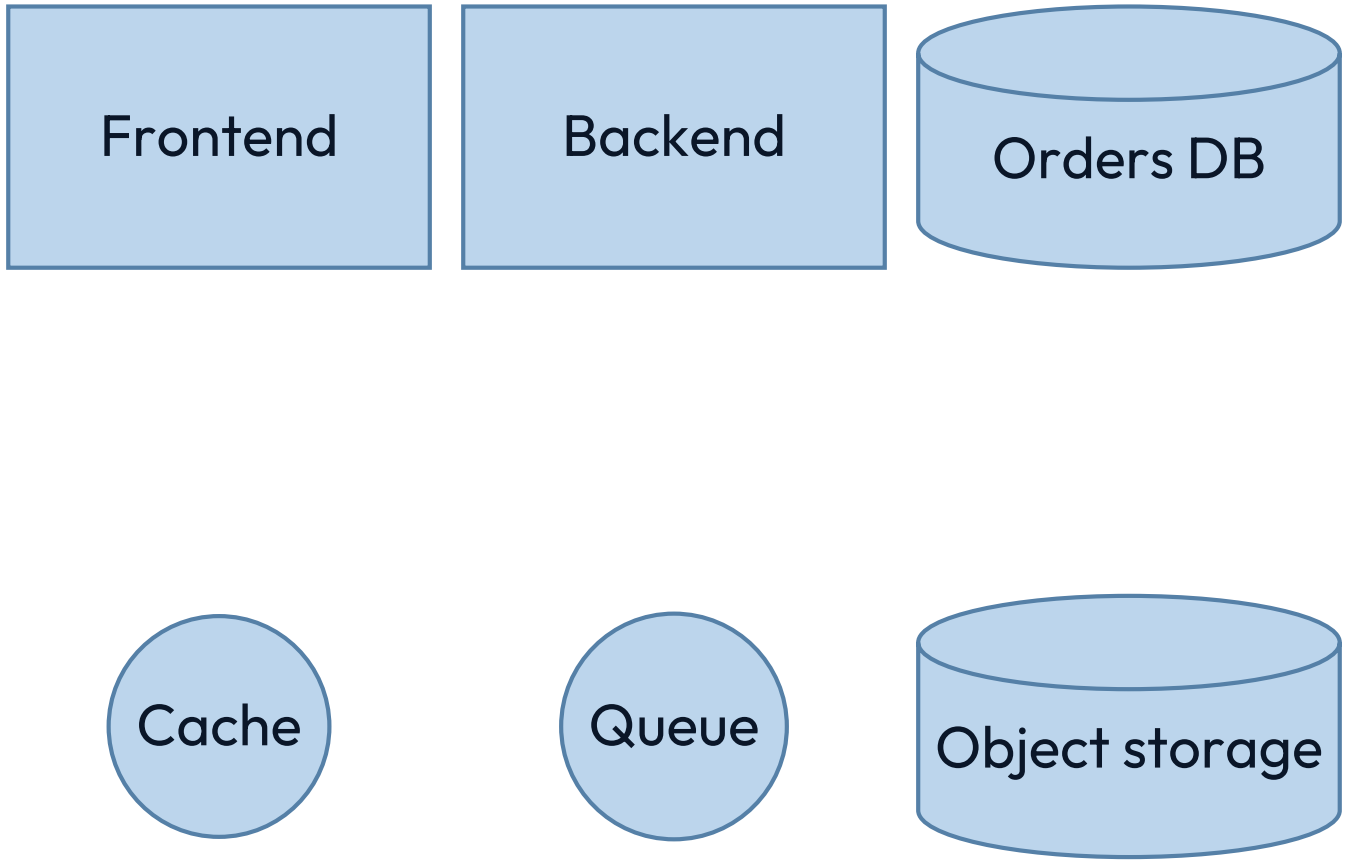

People are drawn as a head and a body.

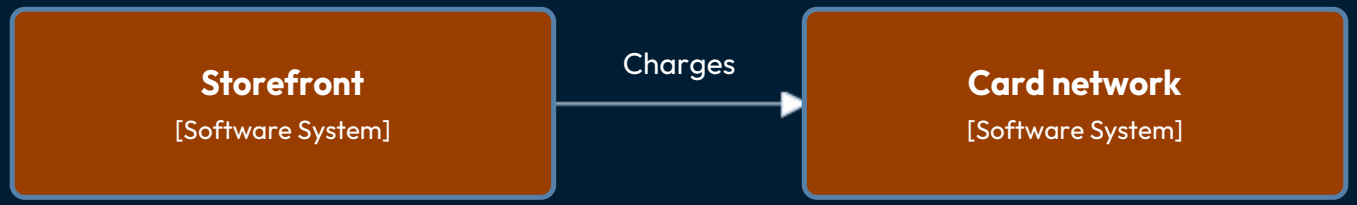

A sketch slide now draws C4 by hand too.

A block diagram's cylinders fit their labels.

C4 keeps the palette on a dark slide too.

Every diagram still takes its colors from the palette
