Plugin · Embedded · Structure

One pill, built once

A pill is `` `{LABEL}` `` in inline code, drawn by one plugin that is part of every slide. Components place and tint it; none of them paints its own.

A label first, then the words that shape it.

- Settlement engine shipped and load-tested STABLE
- Ledger migration paused for review PARTIAL
- Audit export is next on the list NEXT
- Open questions still on the table 3
- Needs a decision this week ?
- A label with a comma takes quotes Dana Whitfield, VP Sales

A card title can carry a pill.

Signal Intake

v2.4

Handles 94% of structured signals without manual intervention.

Scoring Model

configurable

Three dimensions: confidence, recency, relevance.

Decision Log

required

Every prioritization change above P2 must carry a rationale.

Calibration Loop

monthly

Compares predicted outcomes to actuals.

The tile asks for capitals and a status color.

4

tiles per row

THE CEILING ✓ ON PLAN

8

words per tile

SOFT BUDGET ✓ BOARD

5s

scan time

THE TARGET ✓ ON PLAN

kpi · uppercase, wide tracking and the status color are the tile's, passed in

Each owner gets a color from the row.

Owns the scoring model — Head of Product

The one person who can change a weight.

Runs the weekly signal review — Chief of Staff

Convenes it, chairs it, publishes the notes.

Maintains the decision log — Program Manager

Every entry has an owner and a date.

The last bullet of a row can be a pill.

FEDERAL · STATE · INTERNATIONAL

01 **EU AI Act** Title III — Effective Feb 2026
Conformity-assessment pre-market obligation took effect.

02 **Colorado AI Act** SB 24-205 — Effective Feb 2026
Developer and deployer duties for consequential-decision systems.

03 **FTC v. Avast** §5 unfairness — Final Mar 2026
$16.5M consent order; clarifies the deception standard.

A phase header can carry its date.

Scoring	✓ Weights v1	− Calibration	○ Per-team models

✓ Shipped − In flight ○ Planned

Three terms the deck leans on.

C – P

TERM	DEFINITION
Consent	A freely given, specific, informed agreement to processing.
Controller	The party that decides why and how personal data is processed.
Processor	A party that processes data on the controller's instructions.

--lat-pill-edge · -bg · -ink · -case · -tracking · -size · -cap · -scale

The plugin draws, the component places

A pill reads those properties and nothing else. A bare trailing `` `code` `` is plain inline code; `lint:deck` says where a pill used to be.
