Studio and Playground · typing, drawing, sandbox

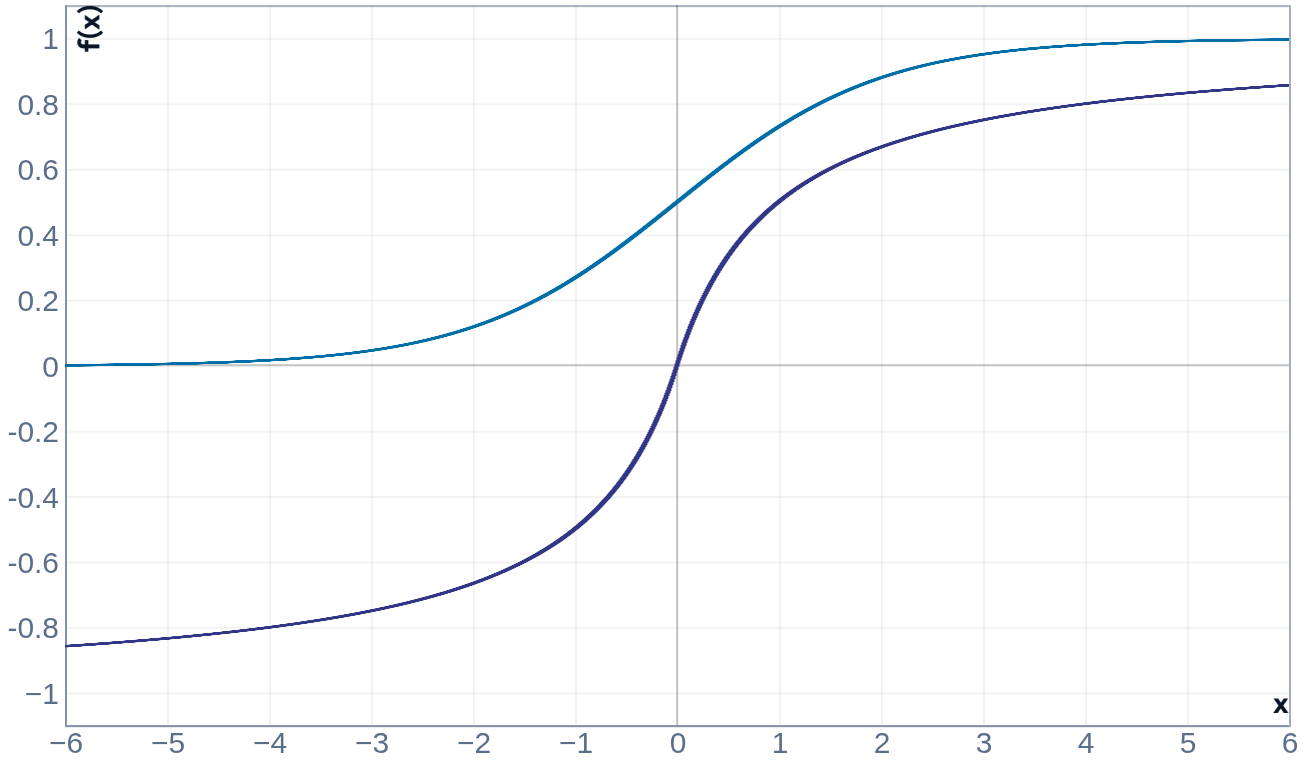

Every plugin, one deck.

Type in any slide and watch it redraw. Math, plots and diagrams draw in a sandboxed frame; the rest draw in the page.

math + function-plot · drawn in the sandboxed frame

A formula and its curve, side by side.

$$\sigma(x) = \frac{1}{1 + e^{-x}}$$

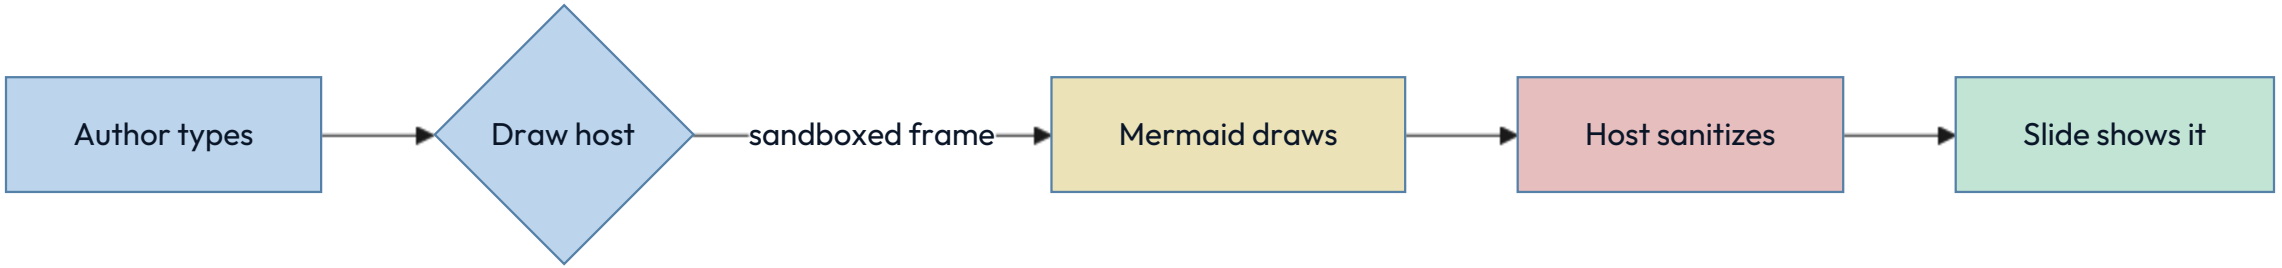

The logistic link: S-shaped, $\sigma(0) = 0.5$.

Edit the formula or the fn and the curve redraws.

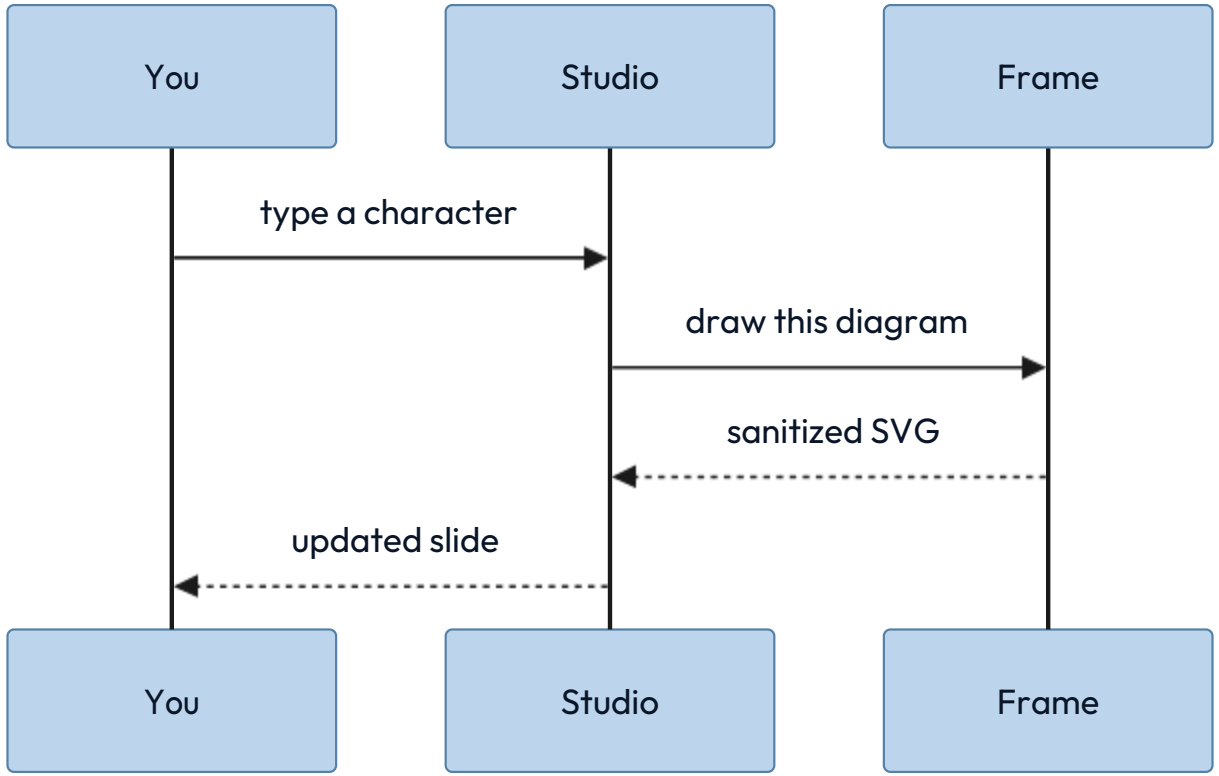

mermaid · flowchart · drawn in the sandboxed frame

Change a label and the boxes resize.

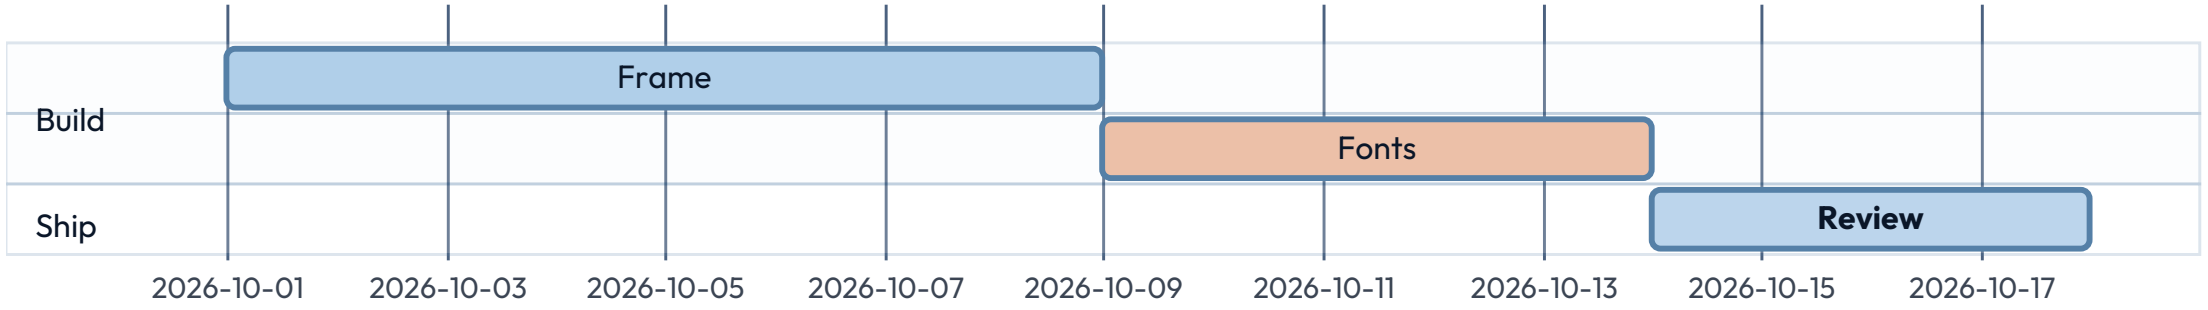

mermaid · sequence

A second diagram type, same frame.

mermaid · gantt with a link

A chart with a clickable task.

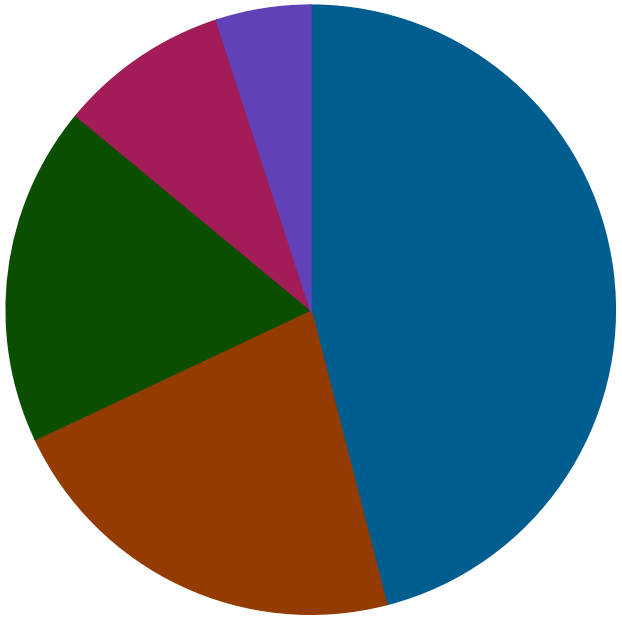

Inline plugins live in the page.

- Storage:  S3 raw uploads,  Snowflake after load
- Owners:  Ada and  Marcus review every change
- Revenue  $1.9M, ahead of plan 
- Status: stable STABLE, in review PARTIAL, new BETA

H1 2026 · 1,840 person-hours

Where the planning quarter actually went.

Nearly half went to producing decks; the deciding itself was the smallest slice.

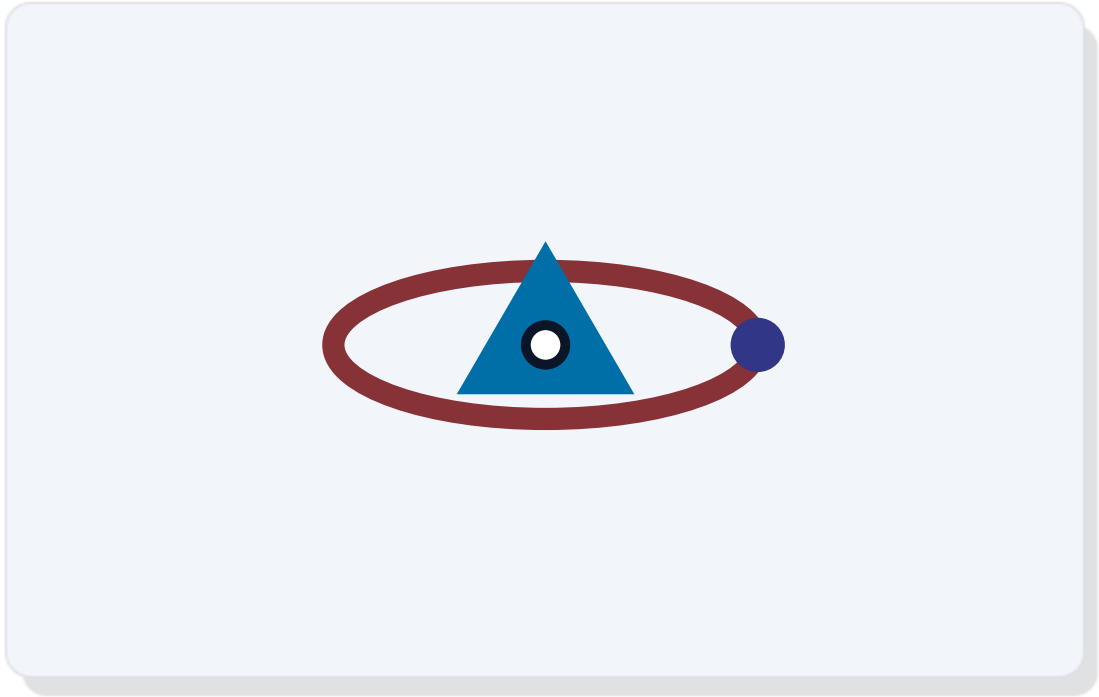

Deck production	46%
Meetings about meetings	22%
Realigning on priorities	18%
Stakeholder management	9%
Actually deciding	5%

Code gets the same panel as everything else.

```
export async function load(id: string): Promise<User> {
  const hit = cache.get(id);
  if (hit) return hit;
  return api.get(`/users/${id}`);
}
```

The rotor turns inside its fixed housing.

A relationship a single still can only imply: on screen the rotor spins and a bead orbits the ring; on paper this hero frame holds.

mermaid · on purpose

A broken diagram says why, on the slide.

Fix the typo in the first line and it draws; break it again to see the error and the Architect's check.

```
flowcharrt LR
  A --> B
```
