The quiet end of a ramp is still text.

A ramp encodes rank by lightness, so its lowest stop is the palest thing on the slide — fine for a swatch, a bug for a word.

An even spread keeps every tier large.

--seq-900 / 700 / 600 / 500 — worst case 5.35:1 across 32 palettes

The ramp floor sits on the palette's own anchor.
