# q-and-a

Anticipated questions paired with prepared answers — the end-of-pitch 'what we expect to be asked' slide.

# The Q&A pairs questions with short answers.

01 **How long may a question run?**

One line.

02 **And the answer?**

Four words or so.

03 **How many pairs fit?**

Four; five with compact.

04 **What if answers run long?**

Use solo, one per slide.

# spine threads the pairs down an accent spine.

**How long may a question run?**

One line.

**And the answer?**

Four words or so.

**How many pairs fit?**

Four; five with compact.

# rail hangs the questions on a left rail.

| 02 | **And the answer?** | Four words or so. |
| 03 | **How many pairs fit?** | Four; five with compact. |

# tab folds each answer under a question tab.

### How long may a question run?

One line.

### And the answer?

Four words or so.

### How many pairs fit?

Four; five with compact.

# grid deals the pairs into two columns.

01

### How long may a question run?

One line.

02

### And the answer?

Four words or so.

03

### How many pairs fit?

Four; five with compact.

04

### Why four pairs here?

Grids want even counts.

# solo gives one question the whole slide.

## 01 What does solo change?

One pair, full canvas.

# Five pairs is the most one slide answers.

01 **Why five pairs and not six?**
The sixth runs off the slide.

02 **Do answers shrink at the ceiling?**
No; the gaps close.

03 **Where does the eye tire?**
Pair four; park risk there.

04 **Can compact buy a sixth?**
No — it tightens spacing only.

05 **And past five?**
Split the slide.

# The Q&A pairs questions with short answers.

01 **How long may a question run?**

One line.

02 **And the answer?**

Four words or so.

03 **How many pairs fit?**

Four; five with compact.

04 **What if answers run long?**

Use solo, one per slide.

# When NOT to reach for q-and-a.

### A flat FAQ of one-liners

Six or more terse question/answer pairs you flip back to as a reference belong in `list-tabular` or `glossary`, which are built to stack many short look-ups. q-and-a is for a few defended answers, not a help page.

### Rhetorical questions with no answer

Every question needs a nested answer that genuinely closes it. A bare question used as a section header or a hook is a `divider` or a `statement`, not a Q&A pair.

### Evaluation criteria in disguise

If the top-level item is a requirement you are scoring against (with a rationale below), that is `list takeaway numbered`, not a question you expect to be asked. q-and-a defends; list takeaway numbered evaluates.

*Related components*

# See also.

`list-tabular` — many terse question/answer look-ups to flip back to, not a few weighty defenses

`glossary` — term/definition reference pairs rather than question/answer pairs

`list` — `takeaway numbered`: numbered criteria with rationale — evaluation, not anticipated objections

`cards-stack` — parallel co-equal cards with no question/answer role split

`decision` — a single verdict to state rather than a set of questions to defend
