diff-bands shades what changed versus stayed.

ADDED

New duties for consequential-decision systems. **Colorado AI Act** SB 24-205

AMENDED

Opt-out signal handling clarified. **CCPA regulations** §7027

REPEALED

The blanket exemption was narrowed. **Small-business carve-out** §541.107

ENFORCED

$16.5M consent order finalized. **FTC v. Avast** §5 unfairness

Six changes is the ledger's ceiling.

01	**First instrument**	`Title cite`	One clause states the duty.
02	**Second instrument**	`Bill number`	Entries stay three lines here.
03	**Third instrument**	`Regulation cite`	The middle carries the exposure.
04	**Fourth instrument**	`Directive cite`	Shorter as the ledger descends.
05	**Fifth instrument**	`Rule cite`	The soft ceiling passed above.
06	**Sixth instrument**	`Order cite`	The stop.

When NOT to reach for regulatory-update.

Single rule's lineage

If the slide walks one rule from statute through case, use `authority-chain`. regulatory-update is a period digest.

Past six rows

More than six items compresses the row gap and the citation chips run out of room. Split by jurisdiction.

Missing summary or citation

Each row needs all three sub-items — citation, summary, effective date. Otherwise the row reads as rumor.

Related components

See also.

`timeline-list` — dated entries with a status read and a sentence each, but no citation per row

`authority-chain` — single rule walked from statute to regulation to guidance to case

`list` — `takeaway numbered`: flat enumeration of requirements without dates or citations

`list-steps` — lighter dots-on-a-spine sequence — the `timeline` variant

`list-tabular` — structured metadata per row but no regulatory framing
