Progression · Timeline · Structure

list-steps

Horizontal row of ordered step cards, each with a full description body (the `vertical` variant stacks them instead).

Steps promise an order and keep it.

STEP 01

Name the step

A verb-first title and one clause of body.

STEP 02

Keep steps parallel

Same shape every step, or sequence breaks.

STEP 03

Number honestly

Order is the promise this layout makes.

STEP 04

Stop at five

Six fits; seven is two slides.

vertical stacks the steps down the page.

STEP 01

First

Three steps demo a look best.

STEP 02

Second

The look changes; the grammar holds.

STEP 03

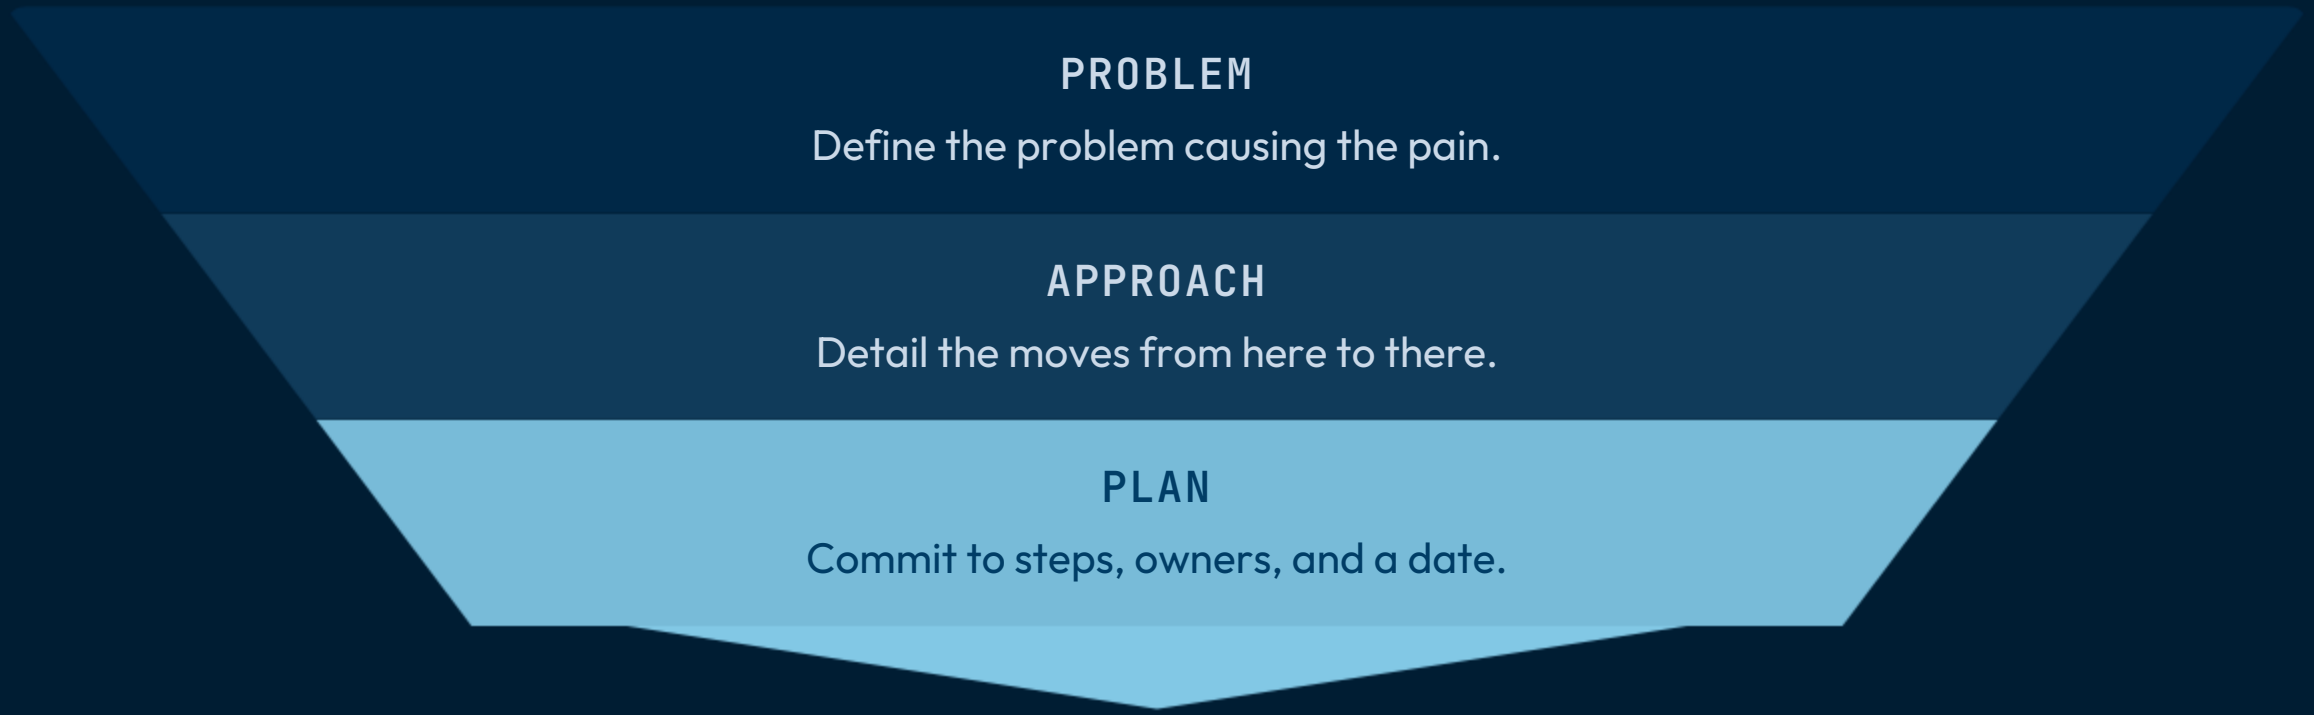

Third

Body budgets do not move.

Make the case, one stage at a time.

PROBLEM	Define the problem causing the pain.
VISION	Show the world once it is solved.
APPROACH	Detail the moves from here to there.
PLAN	Commit to steps, owners, and a date.

Many concerns narrow onto one plan.

converge · list-steps converge — Tapering bands narrow onto the final stage (a qualitative funnel).

The argument, stated plainly.

PROBLEM

Define the problem causing the pain.

APPROACH

Detail the moves from here to there.

PLAN

Commit to steps, owners, and a date.

timeline strings the steps along a line.

First

Three steps demo a look best.

Second

The look changes; the grammar holds.

Third

Body budgets do not move.

phase blocks each step as an era.

PHASE 01

First

Three steps demo a look best.

PHASE 02

Second

The look changes; the grammar holds.

PHASE 03

Third

Body budgets do not move.

milestone marks the steps as checkpoints.

MILESTONE A

First

Three steps demo a look best.

MILESTONE B

Second

The look changes; the grammar holds.

MILESTONE C

Third

Body budgets do not move.

lettered counts the steps with letters.

STEP A

First

Three steps demo a look best.

STEP B

Second

The look changes; the grammar holds.

STEP C

Third

Body budgets do not move.

stage prefixes each step with its stage tag.

STAGE 01

First

Three steps demo a look best.

STAGE 02

Second

The look changes; the grammar holds.

STAGE 03

Third

Body budgets do not move.

rank reads the numbers as standings.

RANK 01

First

Three steps demo a look best.

RANK 02

Second

The look changes; the grammar holds.

RANK 03

Third

Body budgets do not move.

tier renders the steps as service tiers.

TIER I

First

Three steps demo a look best.

TIER II

Second

The look changes; the grammar holds.

TIER III

Third

Body budgets do not move.

roman counts the phases in numerals.

PHASE I

First

Three steps demo a look best.

PHASE II

Second

The look changes; the grammar holds.

PHASE III

Third

Body budgets do not move.

Turn the framework into a habit.

STEP 01

Name it

Say the verb and the reach you operate at today.

STEP 02

Pick the next move

One deeper verb, or the same verb carried wider.

STEP 03

Keep the evidence

A doc, a metric, a postmortem — proof the shift happened.

Five steps is the last honest sequence.

STEP 01

Open at full strength

A step carries a verb, an object, and one condition.

STEP 02

Hold the parallel line

Six survive only if every body stays one clause.

STEP 03

Front-load the risk

The contested step goes up top.

STEP 04

Shorten as you descend

The reader is walking, not studying.

STEP 05

Stop

A sixth step is a second slide.

Steps promise an order and keep it.

STEP 01

Name the step

A verb-first title and one clause of body.

STEP 02

Keep steps parallel

Same shape every step, or sequence breaks.

STEP 03

Number honestly

Order is the promise this layout makes.

STEP 04

Stop at five

Six fits; seven is two slides.

Steps promise an order and keep it.

STEP 01

Name the step

A verb-first title and one clause of body.

STEP 02

Keep steps parallel

Same shape every step, or sequence breaks.

STEP 03

Number honestly

Order is the promise this layout makes.

STEP 04

Stop at five

Six fits; seven is two slides.

Steps promise an order and keep it.

STEP 01

Name the step

A verb-first title and one clause of body.

STEP 02

Keep steps parallel

Same shape every step, or sequence breaks.

STEP 03

Number honestly

Order is the promise this layout makes.

STEP 04

Stop at five

Six fits; seven is two slides.

When NOT to reach for list-steps.

Light labels, no body

If each step is a single label with no description, use the `timeline` variant (dots on a spine). The default step cards earn their chrome only when the body adds substance.

Parallel options

If the rows are alternatives the audience compares, use `cards-grid` or `verdict-grid`. The numbered prefix here reads as sequence — using it for parallel items mis-cues the audience.

Author-typed step numbers

Don't write `**STEP 01**` into the markdown. The badge is CSS-generated from the `ol` counter; manual numbering double-stamps and breaks on reordering.

Related components

See also.

`split-panel` — phase label + heading on the left, steps on the right

`roadmap` — phased grid across multiple workstreams

`list` — tenets or values (the `principles` variant) rather than a sequence; `takeaway numbered` for gating requirements rather than a sequence of actions

`funnel` — a value-driven funnel with conversion percentages, rather than the qualitative `converge` variant
