

PROGRESSION · TIMELINE · STRUCTURE

# list-steps

Horizontal row of ordered step cards, each with a full description body (the `vertical` variant stacks them instead).

# Steps promise an order and keep it.

## STEP 01

### **Name the step**

A verb-first title and one clause of body.

## STEP 02

### **Keep steps parallel**

Same shape every step, or sequence breaks.

## STEP 03

### **Number honestly**

Order is the promise this layout makes.

## STEP 04

### **Stop at five**

Six fits; seven is two slides.

## vertical stacks the steps down the page.

### STEP 01

#### **First**

Three steps demo a look best.

### STEP 02

#### **Second**

The look changes; the grammar holds.

### STEP 03

#### **Third**

Body budgets do not move.

# Make the case, one stage at a time.

|          |                                                   |
|----------|---------------------------------------------------|
| PROBLEM  | Define the problem that is causing the pain.      |
| VISION   | Show what the world looks like once it is solved. |
| APPROACH | Detail the moves that get from here to there.     |
| PLAN     | Commit to concrete steps, owners, and a date.     |

# Many concerns narrow onto one plan.

# The argument, stated plainly.

## PROBLEM

Define the problem that is causing the pain.

## VISION

Show what the world looks like once it is solved.

## APPROACH

Detail the moves that get from here to there.

## PLAN

Commit to concrete steps, owners, and a date.

## timeline strings the steps along a line.

---

## phase blocks each step as an era.

PHASE 01

### First

Three steps demo a look best.

PHASE 02

### Second

The look changes; the grammar holds.

PHASE 03

### Third

Body budgets do not move.

# milestone marks the steps as checkpoints.

## MILESTONE A

### First

Three steps demo a look best.

## MILESTONE B

### Second

The look changes; the grammar holds.

## MILESTONE C

### Third

Body budgets do not move.

# lettered counts the steps with letters.

## STEP A

### First

Three steps demo a look best.

## STEP B

### Second

The look changes; the grammar holds.

## STEP C

### Third

Body budgets do not move.

## stage prefixes each step with its stage tag.

STAGE 01

### First

Three steps demo a look best.

STAGE 02

### Second

The look changes; the grammar holds.

STAGE 03

### Third

Body budgets do not move.

# rank reads the numbers as standings.

RANK 01

## First

Three steps demo a look best.

RANK 02

## Second

The look changes; the grammar holds.

RANK 03

## Third

Body budgets do not move.

## tier renders the steps as service tiers.

TIER I

### First

Three steps demo a look best.

TIER II

### Second

The look changes; the grammar holds.

TIER III

### Third

Body budgets do not move.

# roman counts the phases in numerals.

## PHASE I

### First

Three steps demo a look best.

## PHASE II

### Second

The look changes; the grammar holds.

## PHASE III

### Third

Body budgets do not move.

# Turn the framework into a habit.

---

STEP 01

**Name it**

Say the verb and the reach  
you operate at today.

STEP 02

**Pick the next move**

One deeper verb, or the  
same verb carried wider.

STEP 03

**Keep the evidence**

A doc, a metric, a  
postmortem — proof the  
shift happened.

# Three samples across the ladder, not three steps in a row.

STEP 01

## Place yourself

Name the verb you own  
and how far it reaches  
today.

STEP 02

## Pick your next move

A deeper verb, or the same  
verb carried wider.

STEP 03

## Collect the evidence

Artifacts that prove the  
shift happened.

# Six steps is the last honest sequence.

## STEP 01

### Open at full strength

A step at the hard budget carries a verb, its object, and the one condition that matters.

## STEP 02

### Hold the parallel line

Six steps survive only when every title starts with a verb and every body stays one clause.

## STEP 03

### Front-load the risk

The contested step belongs in the top half.

## STEP 04

### Shorten as you descend

The reader is walking, not studying.

## STEP 05

### Mark the soft ceiling

Five was it; this row is borrowed room.

## STEP 06

### Stop

A seventh step is a second slide.

# Steps promise an order and keep it.

STEP 01

## **Name the step**

A verb-first title and one clause of body.

STEP 02

## **Keep steps parallel**

Same shape every step, or sequence breaks.

STEP 03

## **Number honestly**

Order is the promise this layout makes.

STEP 04

## **Stop at five**

Six fits; seven is two slides.

# Steps promise an order and keep it.

## STEP 01

### **Name the step**

A verb-first title and one clause of body.

## STEP 02

### **Keep steps parallel**

Same shape every step, or sequence breaks.

## STEP 03

### **Number honestly**

Order is the promise this layout makes.

## STEP 04

### **Stop at five**

Six fits; seven is two slides.

# Steps promise an order and keep it.

## STEP 01

### **Name the step**

A verb-first title and one clause of body.

## STEP 02

### **Keep steps parallel**

Same shape every step, or sequence breaks.

## STEP 03

### **Number honestly**

Order is the promise this layout makes.

## STEP 04

### **Stop at five**

Six fits; seven is two slides.

# When NOT to reach for list-steps.

## Light labels, no body

If each step is a single label with no description, use the `timeline` variant (dots on a spine). The default step cards earn their chrome only when the body adds substance.

## Parallel options

If the rows are alternatives the audience compares, use `cards-grid` or `verdict-grid`. The numbered prefix here reads as sequence — using it for parallel items mis-cues the audience.

## Author-typed step numbers

Don't write `**STEP 01**` into the markdown. The badge is CSS-generated from the `o1` counter; manual numbering double-stamps and breaks on reordering.

RELATED COMPONENTS

# See also.

`list-criteria` — gating requirements rather than a sequence of actions

`split-panel` — phase label + heading on the left, steps on the right

`roadmap` — phased grid across multiple workstreams

`list` — tenets or values (the `principles` variant) rather than a sequence

`funnel` — a value-driven funnel with conversion percentages, rather than the qualitative `converge` variant
