More than five per deck. Each divider is a hard context switch. Too many dilutes the signal and slows the audience. Group related content under fewer sections instead.

Section title that doesn't earn a section. If the next 3-4 slides aren't a coherent unit, the **light** variant (bright canvas, centered) is the right tool. Reserve the dark divider for genuine section starts.

Header or footer overrides. Don't reinstate **_header:** or **_footer:** on a divider. The dark canvas is meant to be uninterrupted; chrome belongs on body slides.
