

TYPOGRAPHY • FOUNDATION • ALL ORIENTATIONS

Curated portrait type.

Three curated font scales — landscape, square, portrait — selected per slide. Not one landscape scale stretched by a multiplier. A board member reads this with their spectacles on, not squinting.

The body copy should breathe.

Every role keeps its hierarchy in the tall frame, because the portrait scale is *designed*, not magnified.

- The lead point reads at presentation distance, full width of the column.
- A supporting point sits a step quieter but never collapses to fine print.
- A third closes the thought without crowding the frame.

Quarter in four numbers.
