PIECHART · RADAR · QUADRANT · MAP ·

PORTRAIT · 2026-06-19

The key belongs below the dial.

On a tall deck the four keyed charts used to letterboxe into a short band — the diagram and its right-rail legend are one wide SVG unit. In portrait the legend now stacks *beneath* the diagram, so the whole chart fills the box.

Same chart, restructured for the box.

These four charts bake the diagram **and** its legend into one `<svg>` viewBox, so CSS can't reflow the key. The fix is render-time: the kernel emits the legend below.

Landscape is untouched →

Same chart, restructured for the box.

Landscape is untouched — byte-identical to before. The right-rail layout runs when the deck isn't portrait.

Portrait stacks →

Same chart, restructured for the box. (cont.)

Portrait stacks — dial on top, key centered below, a soft accent rule between them.

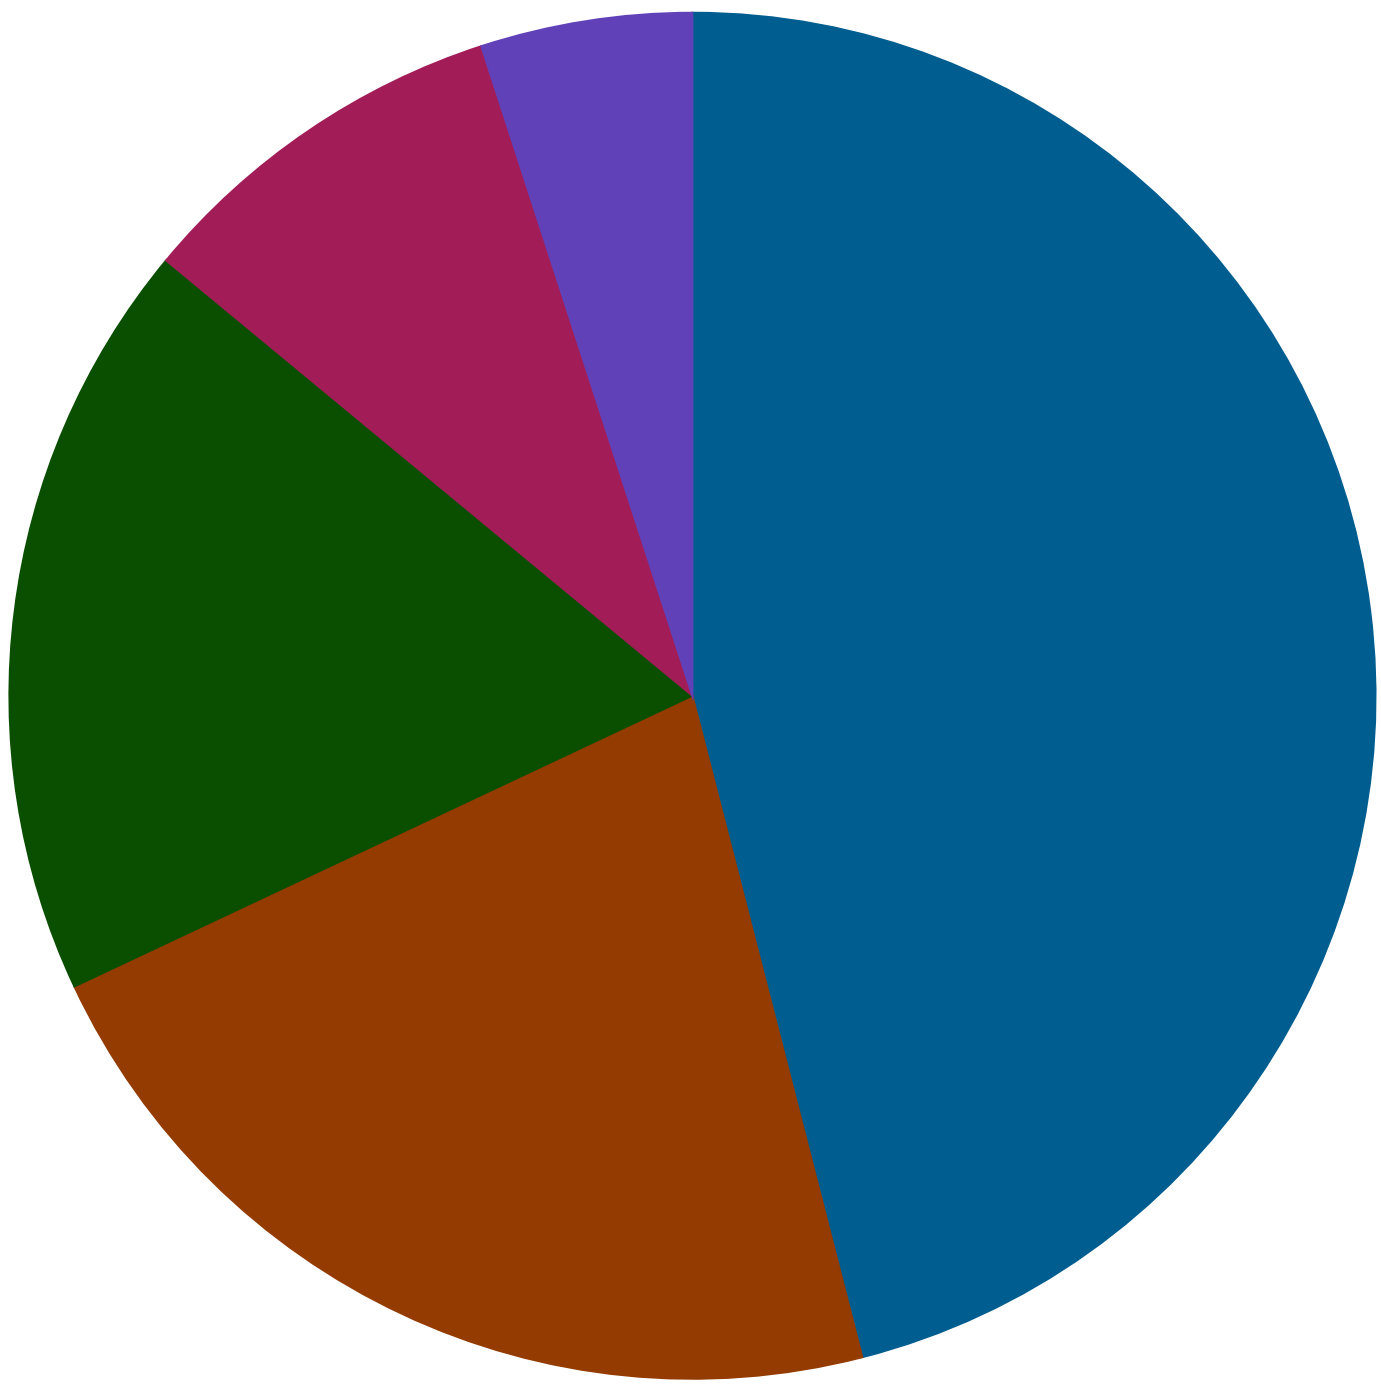

Author nothing new →

Same chart, restructured for the box. (cont.)

Author nothing new. The same Markdown adapts to the `size:` you render at.

H1 2026 · 1,840 PERSON-HOURS

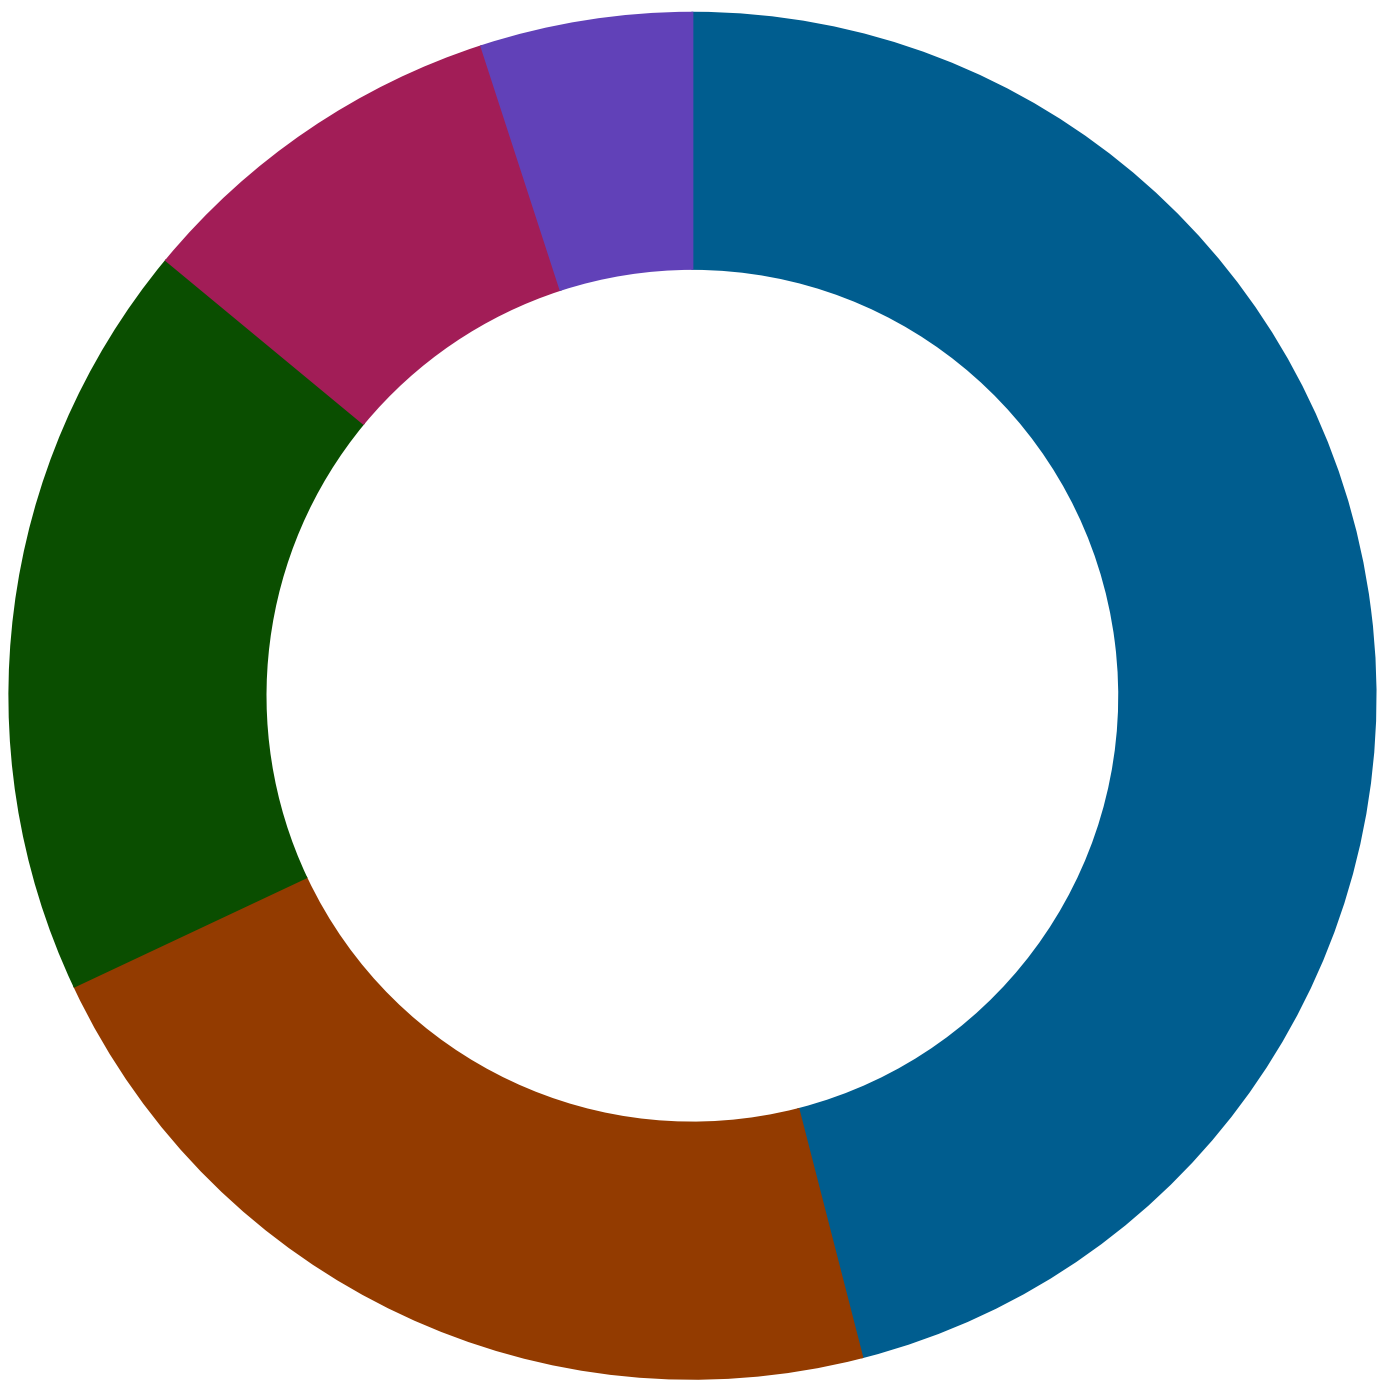

Where the planning quarter actually went.

Deck production	46%
Meetings about meetings	22%
Realigning on priorities	18%
Stakeholder management	9%
Actually deciding	5%

FY2026 · ENGINEERING TIME

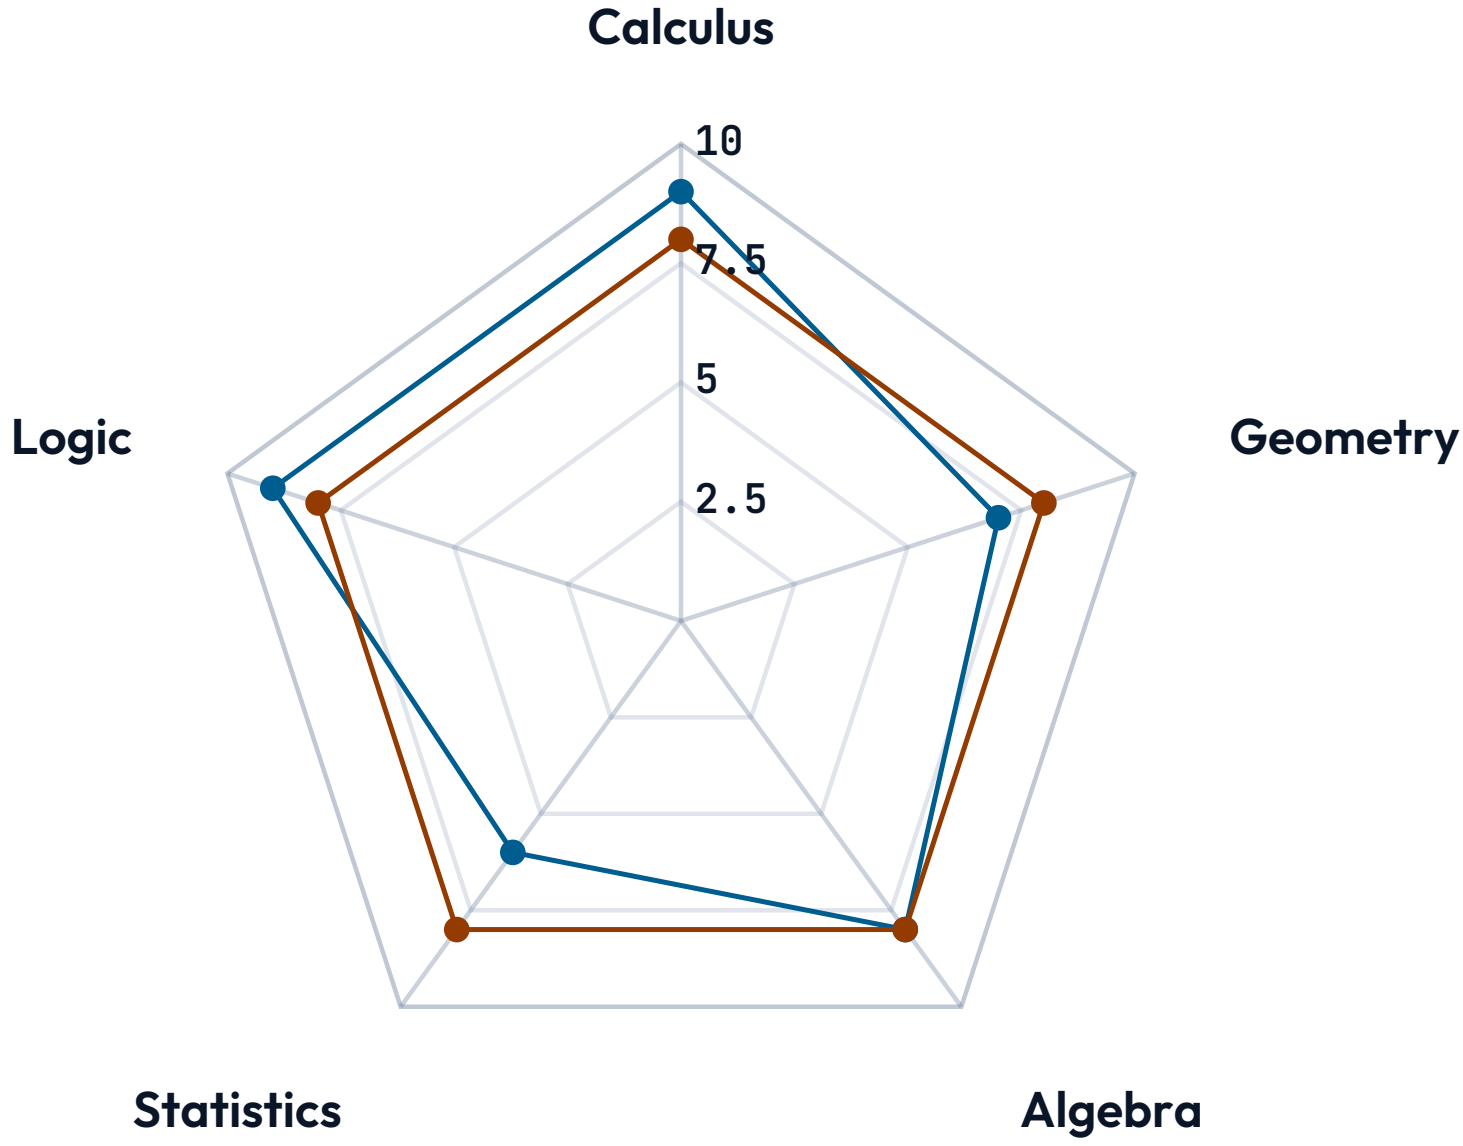

The engineering quarter, as a donut.

Signal Intake build	46%
Scoring policy work	22%
Decision Log integration	18%
Explaining the framework	9%
Toil and on-call	5%

CAPABILITY · TEAM VS TARGET

Where the team is strong.

IMPACT VS EFFORT

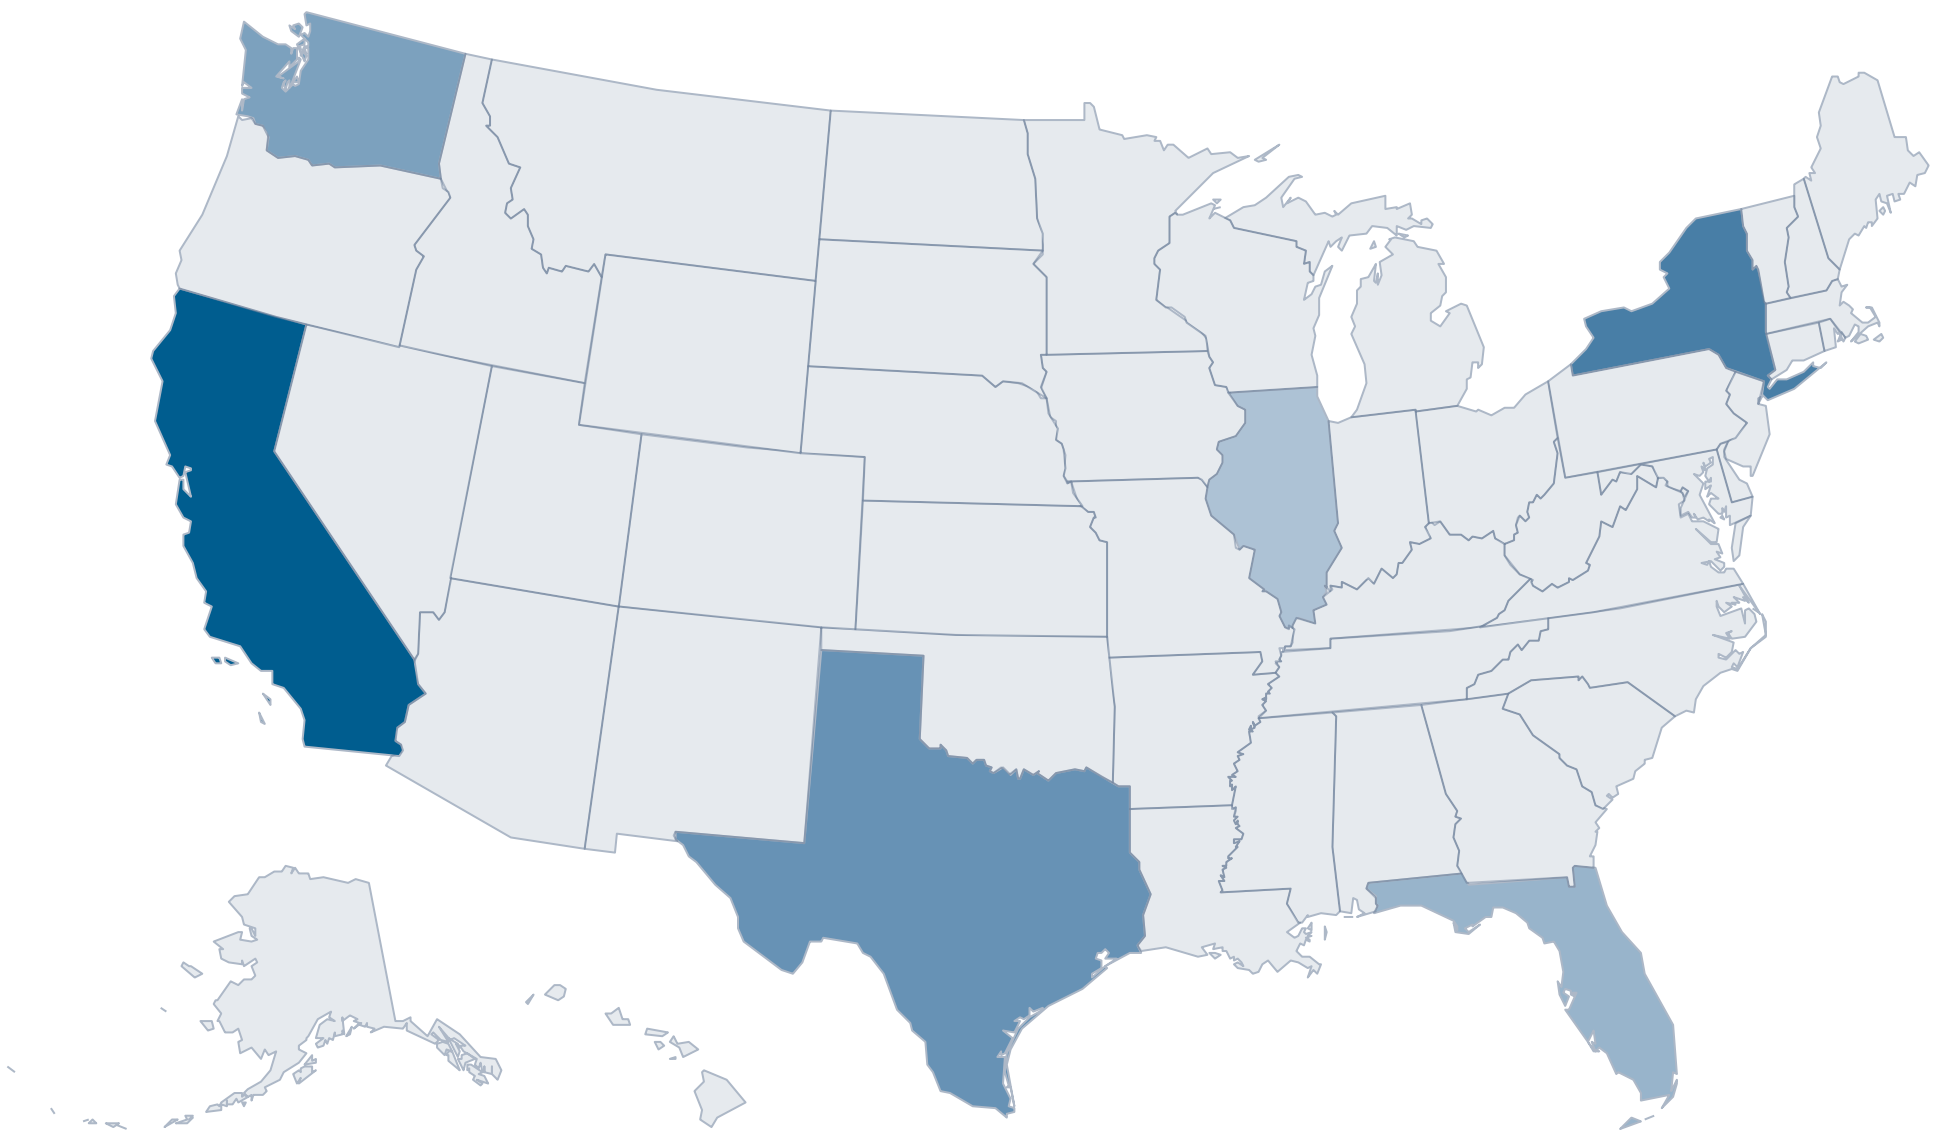

Cohorts on the impact/effort board.

Big bets	2
Fill-ins	2

ADOPTION BY STATE

Where the rollout landed.

California	92
New York	81
Texas	74
Washington	69
Florida	63
Illinois	58

Landscape unchanged. Portrait, finally whole.

The legend-below layout is gated on the deck's orientation, so a 16:9 boardroom deck renders exactly as it always did — while the same source, exported to a story or mobile size, fills the tall canvas instead of stranding the chart in a band.
