BOARD REVIEW · Q3 FY26

Unit economics, end to end.

SECTION 01

Where the money actually goes.

Cost to win

Fully loaded acquisition cost is $4,100, against $2,970 in the plan.

Acquisition cost rose fastest where we spent least.

- Paid search
  - Up 31% year on year; the auction cleared higher every month of the quarter.
- Outbound
  - Flat cost, half the volume. The team shrank and was not backfilled.
- Partner referral
  - Down 12%, and the only channel whose payback improved.

Lifetime value

Gross-margin LTV is $11,800, and the mix keeps shifting to the durable tier.

Payback

Fourteen months blended, against a nine-month plan.

SECTION 02

What breaks the model.

The renewal curve

Four points of retention is $2.1m of ARR, and it compounds into next year.

Logo retention

84% for two quarters running, against 88% in the plan.

Pricing floor

Two of the three at-risk accounts renewed below the floor, and both name the same competitor.

Payback is the number to fix first.
