

LATTICE · COMPONENT ADAPTIVE SIZING —

SWEEP

# Adaptive by box, not by size.

Twelve more components, each rendered on a 9:16 frame. Every one reflows to the box it occupies — no size-specific variant was authored into the deck. Compare any slide against its landscape gallery: the structure changes, the type stays anchored.

# What you're inspecting.

# What you're inspecting.

---

Each layout below was authored once, with no portrait variant selected.

# What you're inspecting. (cont.)

---

The reflow fires purely from the container's aspect crossing a family boundary.

# What you're inspecting. (cont.)

---

**Multi-column grids collapse;  
horizontal strips stack; side-  
by-side panels go vertical.**

# What you're inspecting. (cont.)

---

The same decks render  
unchanged in landscape  
— the query is inert above  
1.05 aspect.

---

→ next: Judge each as a boardroom slide

# What you're inspecting. (cont.)

---

**Judge each as a boardroom  
slide: is the portrait read as  
composed as the landscape  
one?**

TRUSTED BY

# 400+ teams run board prep on Lattice.

---

# Children's data — three jurisdictions, three obligations.

What each jurisdiction  
requires

# Children's data — three jurisdictions, three obligations.

## FEDERAL

15 U.S.C. §6501 • COPPA

Verifiable parental consent for under-13 data.

In effect since 2000

→ next: State

# Children's data — three jurisdictions, three obligations. (cont.)

## STATE

Cal. Civ. Code §1798.120 • CCPA/CPRA

Opt-in to sell or share under-16 data; opt-out over-16.

Enforced 2023

→ next: Local

# Children's data — three jurisdictions, three obligations. (cont.)

LOCAL

NYC Admin Code §22-1201

Bias-audit obligation for employment AEDTs.

Effective 2023

**Buy the  
platform;  
build the  
difference.**

The reasoning →

BUY THE PLATFORM; BUILD THE DIFFERENCE.

---

## **Buy and configure.**

Adopt the vendor's data infrastructure — live in six weeks, freeing three engineer-quarters for the product layer where the difference actually lives.

next: Build in-house

BUY THE PLATFORM; BUILD THE DIFFERENCE.

---

## **Build in-house.**

Full control of schema and roadmap, but two to three engineer-quarters to reach parity with a platform we could adopt now and replace later.

next: Defer a year

BUY THE PLATFORM; BUILD THE DIFFERENCE.

---

## **Defer a year.**

Cheapest this quarter, dearest by 2028 — the renewal locks us in and the discount has already leaked to two prospects.

# What happens in the first hour of an incident.

Declare and page →

# What happens in the first hour of an incident.

---

## STEP 01

### **Declare and page**

Whoever notices opens the channel and pages on-call. Declaring is cheap.

---

→ next: Assign a commander

# What happens in the first hour of an incident. (cont.)

---

## STEP 02

### **Assign a commander**

One owner for coordination — directing the response, not debugging it.

---

→ next: Stop the bleeding

# What happens in the first hour of an incident. (cont.)

---

## STEP 03

### **Stop the bleeding**

Mitigate before diagnosing; root-cause once customers are safe.

---

→ next: Communicate on a clock

# What happens in the first hour of an incident. (cont.)

---

## STEP 04

### **Communicate on a clock**

A status update every 30 minutes —  
silence is what the retro remembers.

**Renew at list price, or  
hold the discount.**

Side by side →

RENEW AT LIST PRICE, OR HOLD THE DISCOUNT.

---

## **Hold the published rate**

Protect the list price and signal pricing discipline to the rest of the base. Risks four at-risk accounts worth \$2.1M ARR walking at renewal.

continues

RENEW AT LIST PRICE, OR HOLD THE DISCOUNT.

---

## **Extend the legacy discount**

Keep the four accounts by carrying their 2023 pricing one more year. Buys retention now, but the discount has already leaked to two prospects in the same segment.

# Who owns each part of the framework.

Owns the scoring model →

# Who owns each part of the framework.

---

## Owns the scoring model

Head of Product

Sets the weights and signs off changes after each calibration, then retunes them until the output agrees with the roadmap.

---

→ next: Runs the weekly signal review

# Who owns each part of the framework. (cont.)

---

## Runs the weekly signal review

Chief of Staff

Chairs the thirty minutes and keeps the decision log current.

→ next: Maintains the decision log

# Who owns each part of the framework. (cont.)

---

## Maintains the decision log

Program Manager

Every call recorded with its bet; chases the missing predicted outcomes.

**Change**

Comms, exec sponsorship, and the people who preferred the old way. *One comms partner · ships Q4*

**What the board will  
press on.**

The questions, answered →

# What the board will press on.

---

01

## Why not extend the current vendor one more year?

The renewal lands in Q3 and locks us in through 2028. Switching now costs a single quarter of migration; switching after renewal costs three.

---

→ next: What happens to the team mid-migration?

# What the board will press on. (cont.)

---

02

## What happens to the team mid-migration?

No headcount change. The same four engineers run both stacks through the eight-week overlap, then the legacy stack is decommissioned.

---

→ next: How confident are we in the savings?

# What the board will press on. (cont.)

---

03

## How confident are we in the savings?

The \$1.2M is contracted, not projected — the signed rate differential, before any usage growth.

**Four questions, one  
quadrant grid —  
collapsed to a  
column.**

The questions, answered →

# Four questions, one quadrant grid — collapsed to a column.

---

## 01 Why now?

The renewal locks us in through 2028.

---

→ next: Why this vendor?

# Four questions, one quadrant grid — collapsed to a column. (cont.)

---

## 02 Why this vendor?

The only one with a contracted export guarantee.

---

→ next: What does it cost?

# Four questions, one quadrant grid — collapsed to a column. (cont.)

---

## 03 What does it cost?

One quarter of migration, fully staffed.

# Four questions, one quadrant grid — collapsed to a column. (cont.)

---

## 04 What's the risk?

Manageable — data export is contractual.

Final Mar 2026

# What counts as "personal information" under CCPA.

---

Cal. Civ. Code §1798.140(o) • CCPA/CPRA

*"Personal information" means information that identifies, relates to, describes, is reasonably capable of being associated with, or could reasonably be linked, directly or indirectly, with a particular consumer or household.*

In plain English: any data tied to a household or device, not just a named person — IP addresses, cookie IDs, and device fingerprints are all in scope.

## WHAT WE MUST DO.

Treat household-level identifiers as PI in our notice, retention, and DSAR workflows.

# Split variant — two columns, collapsed to bands.

Cal. Civ. Code §1798.140(o) • CCPA/CPRA

*"Personal information" means information that could reasonably be linked, directly or indirectly, with a particular consumer or household.*

In plain English: device IDs and cookies are in scope, not just named people.

## WHAT WE MUST DO.

Treat household-level identifiers as PI across notice, retention, and DSAR.

# Triptych variant — three panels, collapsed to a stream.

---

Cal. Civ. Code §1798.140(o) • CCPA/CPRA

*"Personal information" means information that could reasonably be linked with a particular consumer or household.*

In plain English: device IDs and cookies count as personal information.

WHAT WE MUST DO.

Audit pixel and tag inventory; treat household identifiers as PI.

# Glossary C – P

The terms, defined →

# Glossary

C – P

| TERM           | DEFINITION                                                                                 |
|----------------|--------------------------------------------------------------------------------------------|
| <b>Consent</b> | A freely given, specific, informed agreement to processing — pre-ticked boxes don't count. |

→ next: Controller

| TERM       | DEFINITION                                                                                                  |
|------------|-------------------------------------------------------------------------------------------------------------|
| Controller | The party that decides why and how personal data is processed, and carries the legal accountability for it. |

→ next: DSAR

| TERM | DEFINITION                                                                                                           |
|------|----------------------------------------------------------------------------------------------------------------------|
| DSAR | Data Subject Access Request — a person's demand to see, correct, or delete the data held on them, on a 45-day clock. |

→ next: PII

| TERM       | DEFINITION                                                                                                         |
|------------|--------------------------------------------------------------------------------------------------------------------|
| <b>PII</b> | Personal information that identifies a person, read broadly enough to cover device IDs, cookies, and IP addresses. |

→ next: Processor

| TERM      | DEFINITION                                                                                       |
|-----------|--------------------------------------------------------------------------------------------------|
| Processor | A party that processes data on the controller's instructions — a vendor, not the decision-maker. |

# The closed-form estimator.

$$\hat{\beta} = (X^{\top} X)^{-1} X^{\top} y$$

WHERE

- $\hat{\beta}$  — OLS coefficient vector
- $X$  — design matrix,  $n \times p$
- $y$  — response vector, length  $n$
- $X^{\top} X$  — Gram matrix,  $p \times p$ , must be invertible

# Two estimators, side by side — collapsed to a column.

## ORDINARY LEAST SQUARES

---

$$\hat{\beta} = (X^{\top} X)^{-1} X^{\top} y$$

Unbiased, but unstable when  $X^{\top} X$  is near-singular.

## RIDGE

---

$$\hat{\beta} = (X^{\top} X + \lambda I)^{-1} X^{\top} y$$

Trades a little bias for a large drop in variance.

# A matrix and its properties — stacked in portrait.

$$M = \begin{pmatrix} 1 & 2 & 3 \\ 4 & 5 & 6 \end{pmatrix}$$

- 
- `SHAPE` —  $2 \times 3$
  - `RANK` — 2
  - `ROWS` — observations
  - `COLS` — features

# A rubric grid, where the table has to give ground.
