

FIT LADDER • THE UNIVERSAL ENVELOPE

Every split reads the same way

A slide that outgrows its box becomes several. Now it always becomes the same *shape*: a cover that carries the masthead, the body pages, and — only when earned — a dedicated insight.

Cover, body, insight

Cover — always →

Cover, body, insight

Cover — always. A masthead worth a lead-in

→ next: Body — the split content

Cover, body, insight (cont.)

Body — the split content,
heading repeated, (cont.)
from the second on

→ next: Key insight – its
own page, only when ear...

Cover, body, insight (cont.)

Key insight — its own page, only when earned. The takeaway never shares a page

→ next: Below-note — the last body page

Cover, body, insight (cont.)

**Below-note — the last body
page, one size down**

Two kinds of trailing material

A key insight is the run's
takeaway

Two kinds of trailing material

A key insight is the run's
takeaway — a whole page,
centered, sized up

→ continues

Two kinds of trailing material (cont.)

A below-note is a footnote of the content above it — the last body page, one size down

→ next: Before this, both shared one page

Two kinds of trailing material (cont.)

Before this, both shared one page — the wrong call for a takeaway

→ next: Neither repeats per body page

Two kinds of trailing material (cont.)

Neither repeats per body page
— that duplication was the
original bug

fourteen checks before the gate

KEY INSIGHT

The gate is the list — nothing ships until every row is checked.

Source: the launch board, reviewed every Thursday.

Where the quarter went

spend against plan

Four programs carried the quarter; the rest were holding patterns.

Signal intake →

Where the quarter went

spend against plan

Signal intake

Rebuilt end to end; latency down from minutes to seconds.

→ next: Scoring model

Where the quarter went (cont.)

spend against plan

Scoring model

Recalibrated on eighteen months of outcomes, then frozen.

→ next: Decision log

Where the quarter went (cont.)

spend against plan

Decision log

Every call has a written owner, a date, and its evidence.

→ next: Calibration loop

Where the quarter went (cont.)

spend against plan

Calibration loop

Weekly review closes the predicted-to-actual gap.

→ next: Partner onboarding

Where the quarter went (cont.)

spend against plan

Partner onboarding

Two of five signed; three await our security review.

→ next: Audit readiness

Where the quarter went (cont.)

spend against plan

Audit readiness

Evidence pack drafted, gaps listed, none signed yet.

→ next: the note

Where the quarter went

spend against plan

Four programs carried the quarter; the rest were holding patterns.

The three unfunded programs are listed in the appendix, not here.

Build versus buy versus delay

The full comparison →

Cost

BUILD High upfront, amortizes over years

BUY Predictable subscription, scales with seats

DELAY Zero now, compounds later

Speed

BUILD Slowest to first value

BUY Fastest to first value

DELAY Fastest of all, until it is not

Control

BUILD Full control of the roadmap

BUY Vendor roadmap, some influence

DELAY No roadmap at all

Risk

BUILD Execution risk concentrated in-house

BUY Vendor lock-in and pricing risk

DELAY Deferred risk, often the worst kind

next: the key insight

Build versus buy versus delay

KEY INSIGHT

The build option only pays off if we actually staff it — otherwise buy wins by default.

Source: vendor evaluation, Q3 procurement review.

Systems of record

what holds the truth

Customer identity →

Systems of record

what holds the truth

Customer identity.

The CRM is authoritative;

01 every downstream system
reads it and none writes
back.

→ next: Billing and entitlement

Systems of record (cont.)

what holds the truth

Billing and entitlement.

02

The ledger holds invoices, credits, and what a customer may actually use.

→ next: Product telemetry

Systems of record (cont.)

what holds the truth

Product telemetry.

03

Warehouse-derived, rebuilt nightly, never treated as evidence on its own.

→ next: Risk register

Systems of record (cont.)

what holds the truth

Risk register.

The board pack is

04 authoritative — reviewed
quarterly, versioned, signed
by counsel.

The invariant

The invariant

Every split run begins with
exactly one cover and carries **at
most one** key-insight page

→ next: A below-note rides the last body page

The invariant (cont.)

A below-note rides the **last body page** — never its own, never repeated

→ continues

The invariant (cont.)

A title-less slide has no
masthead to cover with, so it
keeps the plain partition

→ next: Nothing is dropped

The invariant (cont.)

Nothing is dropped: every
page is the source slide with
spans removed

One move, one shape

Cover, body, insight
