MONTHLY ACTIVE TEAMS

A line reads, and narrates, the rise it draws.

A European number plots at its own value

Each stage is its own value, grouped with dots.

A European number plots at its own value

ORDERS PER REGION · THOUSAND

Table cells read the same rule as list rows.

	Q1	Q2	Q3
North	1234,5	1402	1388,5
South	980,5	1105	1260
East	2010,5	2150	2400,5

A European number plots at its own value

UNIT PRICE · €

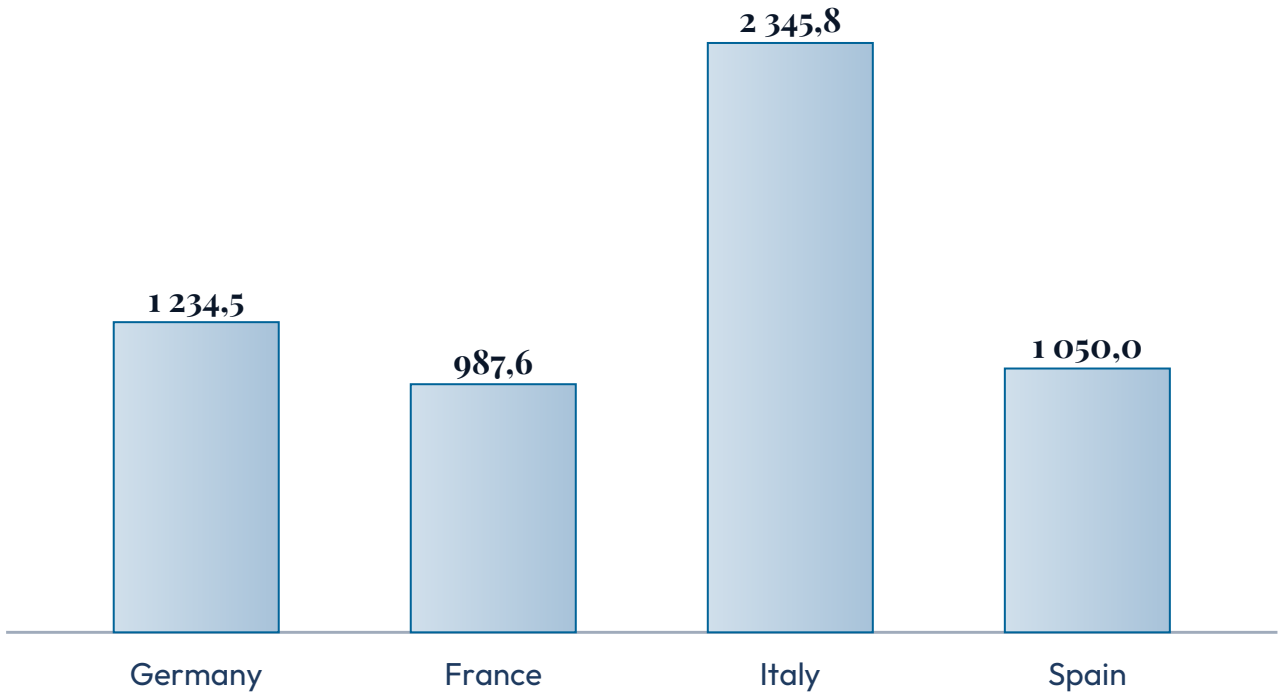

A lone dot group is still read the US way, as a decimal.

`12.000` *plots as 12. For twelve thousand, write* `12 000` *with a space, or a magnitude:* `12k`.

REVENUE · FY26 · € THOUSAND

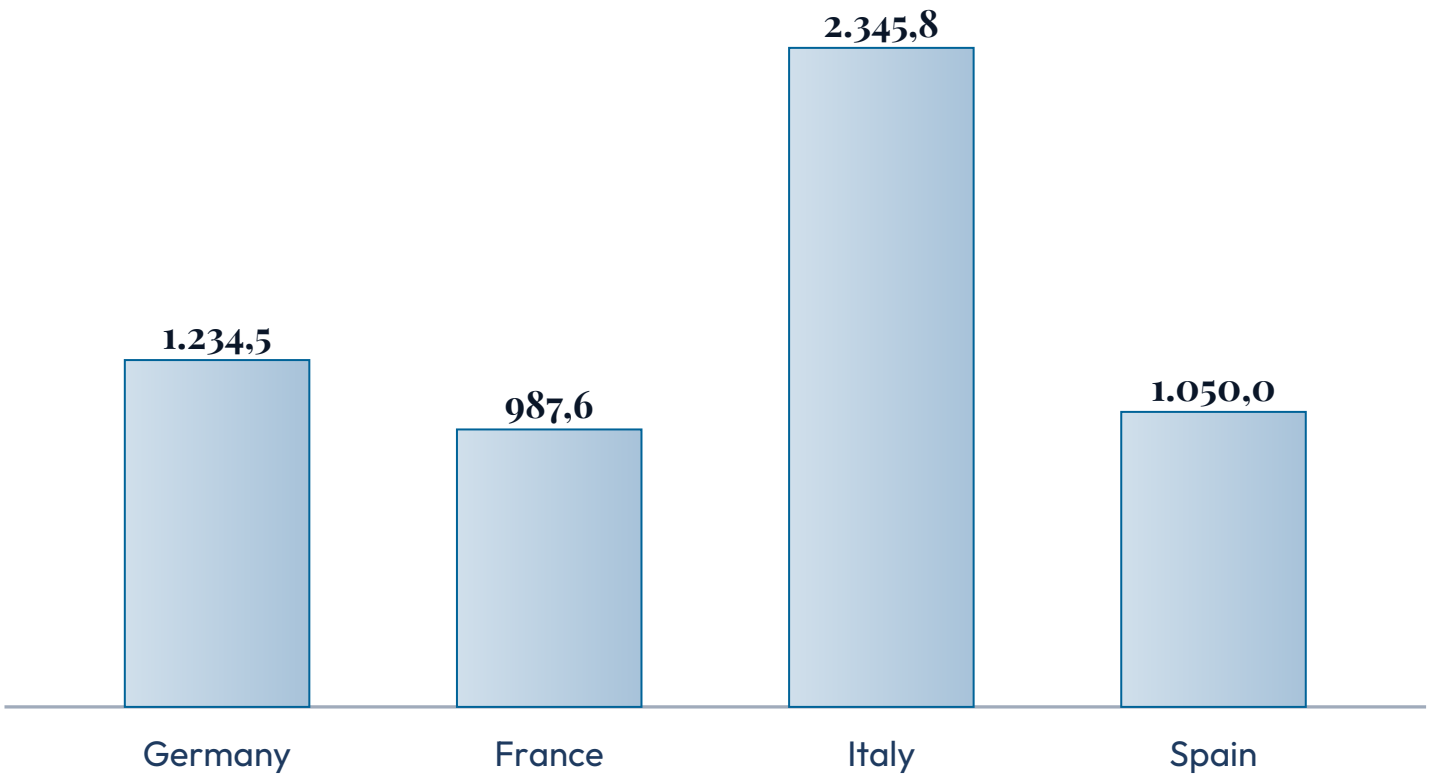

A space between thousands groups is the ISO spelling, and it reads too.

A European number plots at its own value
