ANIMA · HEATMAP · IN-PLACE CELL MOTION

The grid assembles itself.

Set `motion: on` once. Every cell a heatmap draws already declares its motion role, so the grid builds itself — and the exported PDF is unchanged.

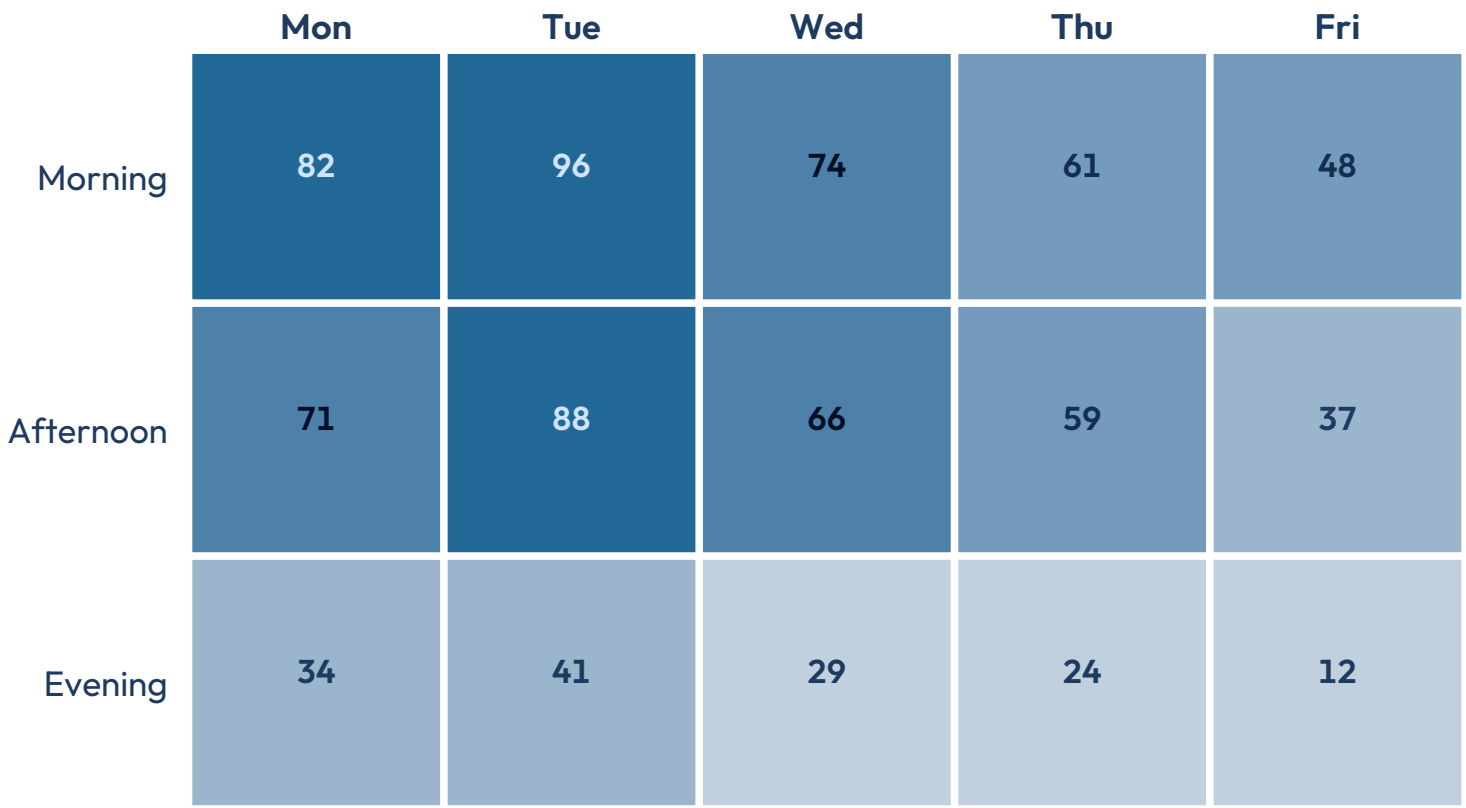

RETENTION · 2026 COHORTS

Retention decays fastest in month two.

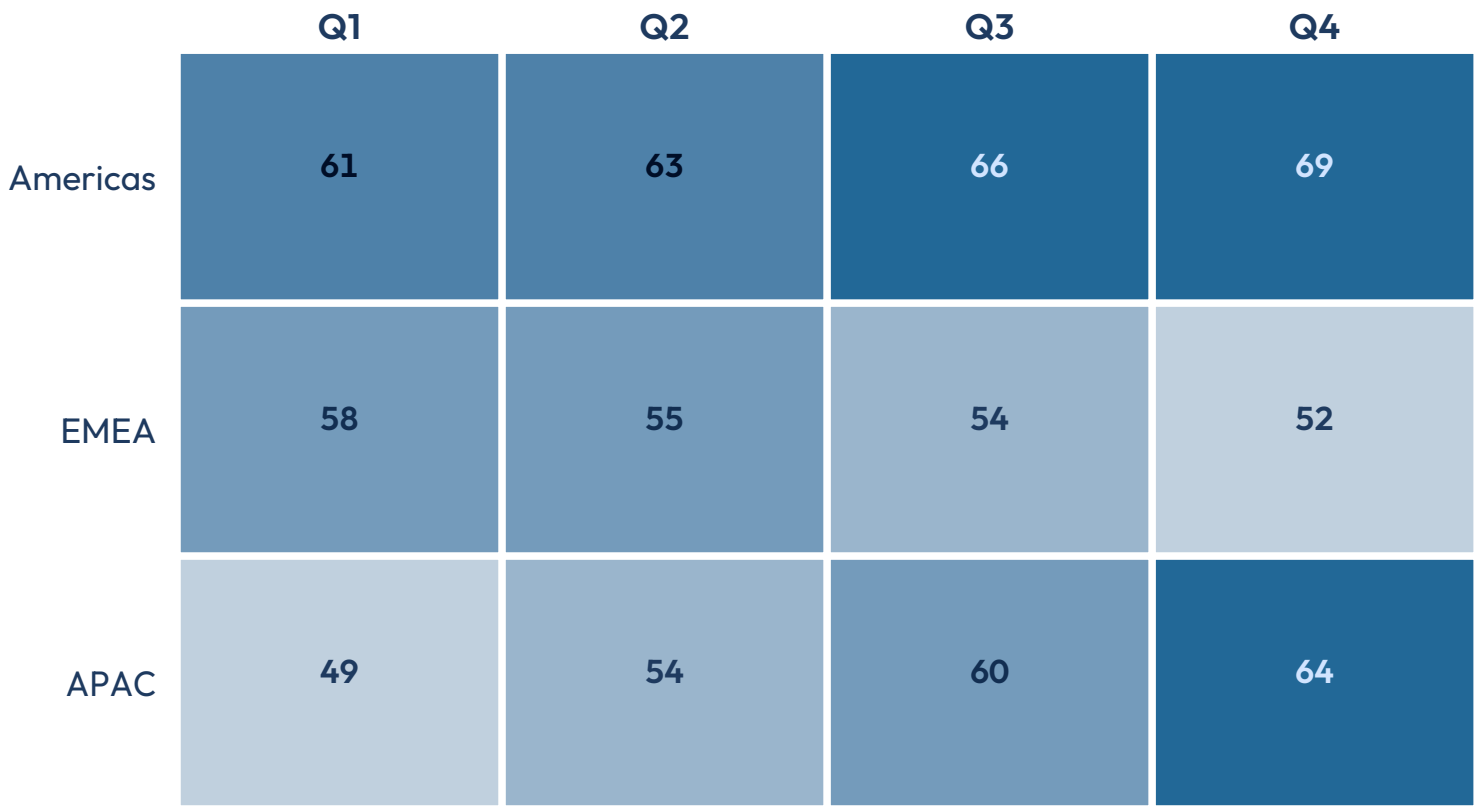

SUPPORT LOAD · BY WEEKDAY

Tuesday carries the week's backlog.

GROSS MARGIN · BY REGION

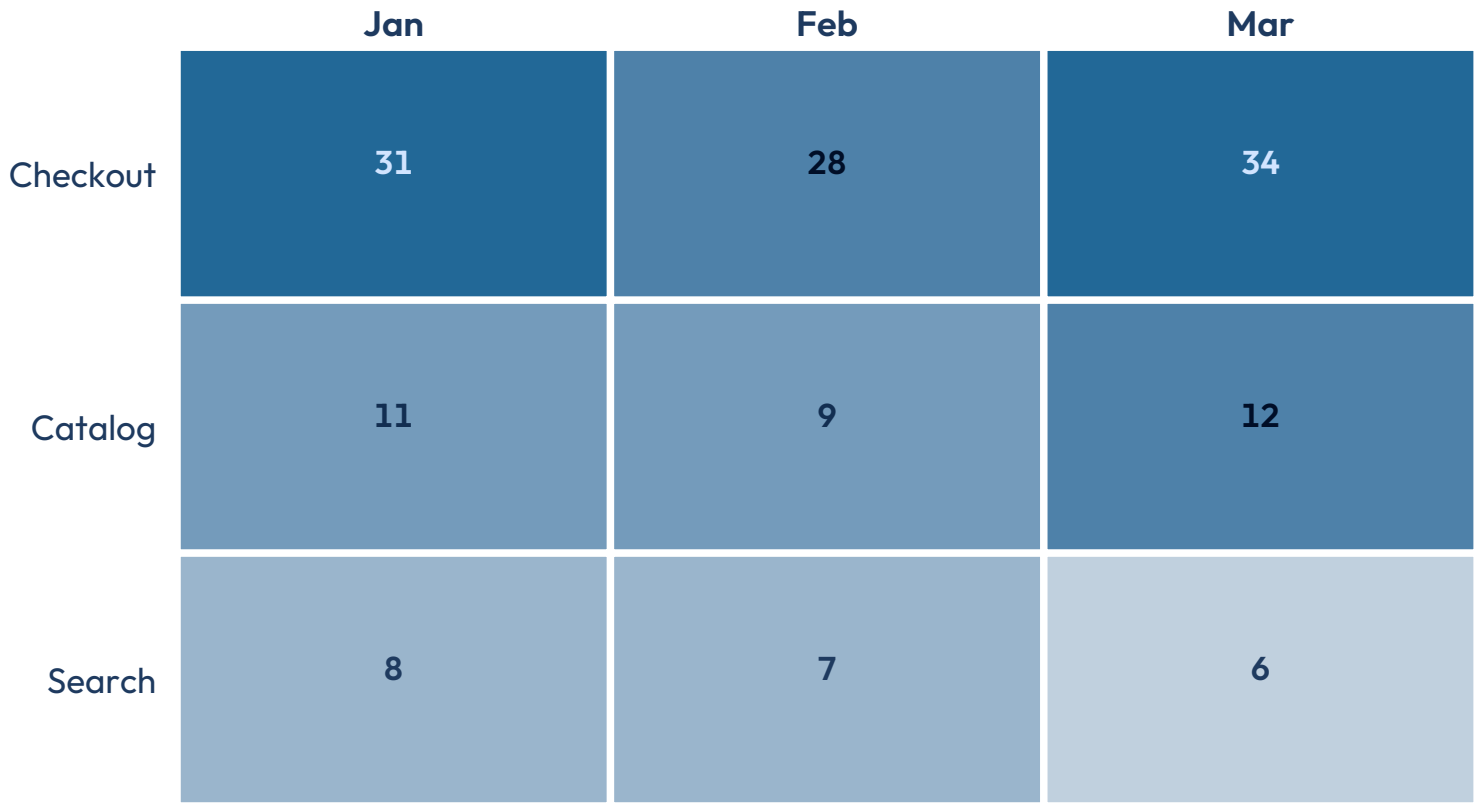

Margin recovered everywhere except EMEA.

motion-rise · each cell slides up into place

DEFECT DENSITY · BY SERVICE

Checkout carries three times the defect load.

One source, four surfaces.

- **Studio, Playground, Present.**
  - The grid builds, derived from the chart's own marks.
- **The exported PDF.**
  - The finished grid, still — byte-identical to a deck that never asked.
- **Reduced motion.**
  - The end state, mounted immediately.
- **The `--player` export.**
  - The build travels with the deck.
